**WHAT WERE THE FUND COSTS FOR THE PAST YEAR?** (based on a hypothetical \$10,000 investment)

Class Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Institutional Shares	\$92	0.85%

**HOW DID THE FUND PERFORM LAST YEAR AND WHAT AFFECTED ITS PERFORMANCE?**

For the 12-month period ended June 30, 2025, the Fund underperformed its benchmark, the MSCI ACWI ex USA Index.

**WHAT FACTORS INFLUENCED PERFORMANCE**

Underperformance was driven primarily by Industrials and Information Technology. Within Technology it was mainly the exposure to semiconductor end markets that are still recovering from cyclical lows (eg. NXP Semiconductor; certain ASML end markets) that detracted from performance. Health Care was the largest relative, positive contributor to performance while Financials delivered the largest contribution to absolute returns. The main driver being the counter-cyclical revenue drivers of financial market infrastructure companies (eg. Deutsche Boerse, B3) that benefited from the market volatility in 2025.

**POSITIONING**

International equity indices outperformed both global and U.S. indices over the reporting period and especially since the beginning of 2025. The Fund benefited from its regional exposure with the largest allocation being to Europe. During the year we added Richemont, Amadeus IT, AstraZeneca, Anta Sports, SAP and Taiwan Semiconductor Manufacturing. We exited Coloplast. We look for competitively advantaged businesses that earn high returns on invested capital (ROIC), are run by capable management teams and are attractively valued, have the ability to generate attractive through-the-cycle shareholder returns. Sector and country diversification is an output of stock picking.
