HOW DID THE FUND PERFORM LAST YEAR AND WHAT AFFECTED ITS PERFORMANCE?

For the 12-month period ended June 30, 2025, the Fund outperformed its benchmark, the MSCI All Country World Index (ACWI).

WHAT FACTORS INFLUENCED PERFORMANCE

Outperformance was driven primarily by financials, consumer discretionary and industrials. Financials performed strongly in the face of volatility (e.g. Deutsche Boerse, B3), delivering counter-cyclical ballast to the portfolio. Industrials contributed to relative performance, particularly through the ongoing contribution of aerospace. Health Care contributed negatively, and we have exited two health care companies during the reporting period. Technology performed strongly in absolute terms. The Fund delivered downside capture during the market weakness in early 2025. While not an explicit target, we aim to identify companies that can help insulate our investors in bad times so we can compound a smaller loss thereafter.

POSITIONING

We are looking for high-quality companies with superior customer outcomes that we believe are able to pass on prices and generate high levels of recurring revenue while requiring low leverage. Sector and country diversification is an output of investment selection and capital allocation. During the year we added Rentokil and Experian. We exited TJX Companies, Adobe and Coloplast. We initiated and exited Illumina following an unusually short holding period due to a combination of supply-side and demand-side risks impacting our thesis.
