Investor Shares	$48	0.47%

HOW DID THE FUND PERFORM LAST YEAR AND WHAT AFFECTED ITS PERFORMANCE?

For the 12-month period ended June 30, 2026, the Fund outperformed the Bloomberg Municipal 1-15 Year Index but underperformed the broader Bloomberg Municipal Bond Index.

WHAT FACTORS INFLUENCED PERFORMANCE

Active yield-curve positioning was the primary contributor as longer maturities benefited from a flatter municipal curve. Security selection and sector allocation also added value, including high-quality discount structures, Energy Prepay securities, Public Power utilities and Housing credits. Tight credit spreads limited compensation for incremental credit risk and reinforced the focus on structural value.

POSITIONING

The Fund maintained a 5.1-year effective duration and remained overweight revenue bonds and underweight general obligation bonds. Sustainable research continued to inform exposure across education, clean energy, health and wellness, affordable housing and clean water issuers, while the team preserved liquidity and portfolio flexibility.

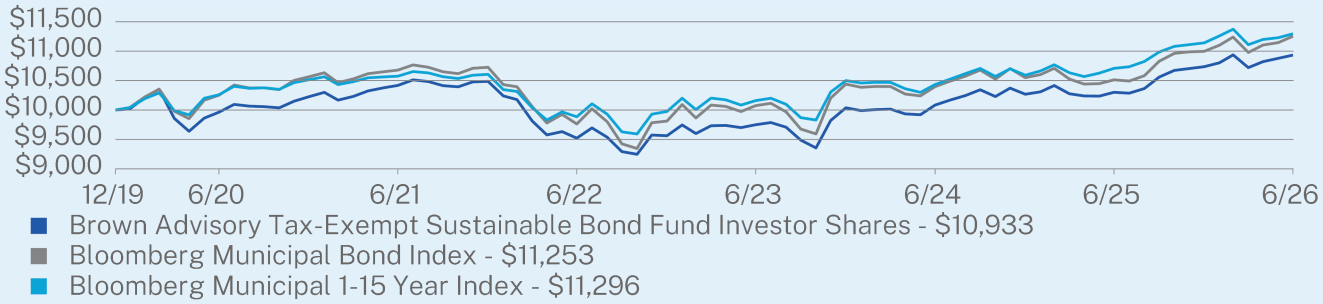

PERFORMANCE

Curve positioning and credit selection produced excess returns versus the Bloomberg Municipal 1-15 Year Index and supported a positive Fund return, although the broader municipal market generated a higher return for the period.

HOW DID THE FUND PERFORM SINCE INCEPTION?[1]

The following chart reflects a hypothetical $10,000 investment in the class of shares noted. The chart uses total return NAV performance and assumes reinvestment of dividends and capital gains. Fund expenses, including 12b-1 fees, management fees and other expenses were deducted. For comparative purposes, the performance of the Fund's benchmark and any additional performance benchmark(s) are also shown.
