BROWN ADVISORY SUSTAINABLE VALUE FUND

Institutional Shares (BASVX)
Investor Shares (BISVX)
Advisor Shares (Not Available for Sale)

This Statement of Additional Information (the "SAI") provides additional information to the Prospectus dated February 28, 2023, as may be amended from time to time. This SAI is not a prospectus and should only be read in conjunction with the Prospectus. You may obtain the Prospectus without charge by contacting U.S. Bank Global Fund Services at the address or telephone number listed above or by visiting the Fund's website at www.brownadvisory.com/mf/funds/sustainable-value-fund.

Investors in the Fund will be informed of the Fund's progress through periodic reports. Financial statements certified by an independent registered public accounting firm will be submitted to shareholders at least annually. Since the Fund had not commenced operations prior to the date of this SAI, financial statements are not currently available. The Annual Report for this Fund will become available after the Fund has commenced investment operations and has completed its fiscal year.

Once available, copies of the Annual Report may be obtained, without charge, upon request by contacting U.S. Bank Global Fund Services at the address or telephone number listed above.

GLOSSARY

As used in this SAI, the following terms have the meanings listed:

“Accountant” means U.S. Bank Global Fund Services.

“Administrator” means U.S. Bancorp Fund Services, LLC, doing business as U.S. Bank Global Fund Services.

“Adviser” means Brown Advisory LLC, the Fund’s investment adviser.

“Board” means the Board of Trustees of the Trust.

“CFTC” means Commodity Futures Trading Commission.

“Code” means the Internal Revenue Code of 1986, as amended the rules thereunder, IRS interpretations and any private letter rulings or similar authority upon which the Fund may rely.

“Custodian” means U.S. Bank National Association.

“Distributor” means ALPS Distributors, Inc.

“Fund” means Brown Advisory Sustainable Value Fund

“Fund Services” means U.S. Bancorp Fund Services, LLC, doing business as U.S. Bank Global Fund Services.

“Independent Trustee” means a Trustee that is not an interested person of the Trust as that term is defined in Section 2(a)(19) of the 1940 Act.

“IRS” means U.S. Internal Revenue Service.

“Moody’s” means Moody’s Investors Service.

“NAV” means net asset value per share.

“NRSRO” means a nationally recognized statistical rating organization.

“SAI” means Statement of Additional Information.

“SEC” means the U.S. Securities and Exchange Commission.

“S&P” means S&P Global Ratings.

“Transfer Agent” means U.S. Bancorp Fund Services, LLC, doing business as U.S. Bank Global Fund Services.

“Trust” means Brown Advisory Funds.

“U.S.” means United States.

“U.S. Government Securities” means obligations issued or guaranteed by the U.S. Government, its agencies or instrumentalities.

“1933 Act” means the Securities Act of 1933, as amended, and including rules and regulations as promulgated thereunder.

“1934 Act” means the Securities Exchange Act of 1934, as amended, and including rules and regulations as promulgated thereunder.

“1940 Act” means the Investment Company Act of 1940, as amended, and including rules and regulations, SEC interpretations and any exemptive order applicable to the Fund or interpretive relief promulgated thereunder.

THE TRUST

The Trust is a Delaware statutory trust organized on May 1, 2012, and is registered with the SEC as an open-end management investment company. The Trust's Declaration of Trust (the "Declaration of Trust") permits the Trust's Board of Trustees (the "Board") to issue an unlimited number of full and fractional shares of beneficial interest, without par value, which may be issued in any number of series and classes, with each series representing a separate portfolio of investments with its own investment objectives, policies and restrictions. The Board may, from time to time, issue additional series, the assets and liabilities of which will be separate and distinct from any other series.

As a Delaware statutory trust, the Trust is subject to Delaware law, including the Delaware Statutory Trust Act. The Delaware Statutory Trust Act provides that a shareholder of a Delaware statutory trust shall be entitled to the same limitation of personal liability extended to shareholders of Delaware corporations, and the Declaration of Trust further provides that no shareholder of the Trust shall be personally liable for the obligations of the Trust or of any series or class thereof except by reason of his or her own acts or conduct.

Fund History

The Fund is a diversified series of the Trust. Please see the Prospectus for a discussion of the principal investment policies and risks of investing in the Fund.

The Fund's Prospectus and this SAI are a part of the Trust's Registration Statement filed with the SEC. Copies of the Trust's complete Registration Statement may be obtained from the SEC upon payment of the prescribed fee or may be accessed free of charge at the SEC's website at www.sec.gov.

INVESTMENT POLICIES AND RISKS

The Fund's principal investment strategies and the risks associated with the same are described in the "Summary Section," "Additional Information about the Fund's Principal Investment Strategies" and "Principal Risks" sections of the Prospectus. The following discussion provides additional information about those principal investment strategies and related risks, as well as information about investment strategies (and related risks) that the Fund may utilize, even though they are not considered to be "principal" investment strategies. Accordingly, an investment strategy (and related risk) that is described below, but which is not described in the Fund's Prospectus, should not be considered to be a principal strategy (or related risk) applicable to the Fund.

Equity Securities

Common and Preferred Stock

General. The Fund may invest in common stock. Common stock represents an equity (ownership) interest in a company, and usually possesses voting rights and earns dividends. Dividends on common stock are not fixed but are declared at the discretion of the issuer. Common stock generally represents the riskiest investment in a company. In addition, common stock generally has the greatest appreciation and depreciation potential because increases and decreases in earnings are usually reflected in a company's stock price.

The Fund may invest in preferred stock. Preferred stock is a class of stock having a preference over common stock as to the payment of dividends and the recovery of investment should a company be liquidated, although preferred stock is usually junior to the debt securities of the issuer. Preferred stock typically does not possess voting rights and its market value may change based on changes in interest rates.

Risks. The fundamental risk of investing in common and preferred stock is the risk that the value of the stock might decrease. Stock values fluctuate in response to the activities of an individual company or in response to general market and/or economic conditions. Historically, common stocks have provided greater long-term returns and have entailed greater short-term risks than preferred stocks, fixed-income and money market investments. The market value of all securities, including common and preferred stocks, is based upon the market's perception of value and not necessarily the book value of an issuer or other objective measures of a company's worth. If you invest in the Fund, you should be willing to accept the risks of the stock market and should consider an investment in the Fund only as a part of your overall investment portfolio.

Convertible Securities

General. The Fund may invest in convertible securities. The Fund may also invest in U.S. or foreign securities convertible into foreign common stock. Convertible securities include debt securities, preferred stock or other securities that may be converted into or exchanged for a given amount of common stock of the same or a different issuer during a specified period and at a specified price in the future. A convertible security entitles the holder to receive interest on debt or the dividend on preferred stock until the convertible security matures or is redeemed, converted or exchanged.

Convertible securities rank senior to common stock in a company's capital structure but are usually subordinated to comparable nonconvertible securities. Convertible securities have unique investment characteristics in that they generally: (1) have higher yields than common stocks, but lower yields than comparable non-convertible securities; (2) are less subject to fluctuation in value than the underlying stocks since they have fixed income characteristics; and (3) provide the potential for capital appreciation if the market price of the underlying common stock increases.

A convertible security may be subject to redemption at the option of the issuer at a price established in the convertible security's governing instrument. If a convertible security is called for redemption, the Fund will be required to permit the issuer to redeem the security, convert it into the underlying common stock or sell it to a third party.

Risks. Investment in convertible securities generally entails less risk than an investment in the issuer's common stock. Convertible securities are typically issued by smaller capitalization companies whose stock price may be volatile. Therefore, the price of a convertible security may reflect variations in the price of the underlying common stock in a way that nonconvertible debt does not. The extent to which such risk is reduced, however, depends in large measure upon the degree to which the convertible security sells above its value as a fixed income security.

Security Ratings Information. The Fund's investments in convertible securities are subject to the credit risk relating to the financial condition of the issuers of the securities that the Fund holds. The Fund may purchase convertible securities of any rating – investment grade or non-investment grade. The Fund may purchase unrated convertible securities and preferred stock if, at the time of purchase, the Adviser believes that they are of comparable quality to rated securities that the Fund may purchase.

Unrated securities may not be as actively traded as rated securities. The Fund may retain securities whose rating has been lowered below the lowest permissible rating category (or that are unrated and determined by the Adviser to be of comparable quality to securities whose rating has been lowered below the lowest permissible rating category) if the Adviser determine that retaining such security is in the best interests of the Fund. Because a downgrade often results in a reduction in the market price of the security, the sale of a downgraded security may result in a loss.

Moody's, S&P and other NRSROs are private services that provide ratings of the credit quality of debt obligations, including convertible securities. A description of the range of ratings assigned to various types of bonds and other securities by several NRSROs is included in [Appendix A](#) to this SAI. The Fund may use these ratings to determine whether to purchase, sell or hold a security. Ratings are general and are not absolute standards of quality. Securities with the same maturity, interest rate and rating may have different market prices. To the extent that the ratings given by an NRSRO may change as a result of changes in such organizations or their rating systems, the Adviser will attempt to substitute comparable ratings. Credit ratings attempt to evaluate the safety of principal and interest payments and do not evaluate the risks of fluctuations in market value. Also, rating agencies may fail to make timely changes in credit ratings. An issuer's current financial condition may be better or worse than a rating indicates.

Credit ratings for debt securities provided by rating agencies evaluate the safety of principal and interest payments, not market value risk. The rating of an issuer is a rating agency's view of past and future potential developments related to the issuer and may not necessarily reflect actual outcomes. There can be a lag between the time of developments relating to an issuer and the time a rating is assigned and updated. See [Appendix A](#) for additional information on credit ratings.

Warrants

General. The Fund may invest in warrants. Warrants are securities, typically issued with preferred stock or bonds that give the holder the right to purchase a given number of shares of common stock at a specified price and time. The price of the warrant usually represents a premium over the applicable market value of the common stock at the time of the warrant's issuance. Warrants have no voting rights with respect to the common stock, receive no dividends and have no rights with respect to the assets of the issuer.

Risks. Investments in warrants involve certain risks, including the possible lack of a liquid market for the resale of the warrants, potential price fluctuations due to adverse market conditions or other factors and failure of the price of the common stock to rise. If the warrant is not exercised within the specified time period, it becomes worthless.

Depositary Receipts

General. The Fund may invest in sponsored and unsponsored American Depositary Receipts ("ADRs"), European Depositary Receipts ("EDRs"), Global Depositary Receipts ("GDRs"), Holding Company Depositary Receipts ("HOLDRs"), New York Registered Shares ("NYRs") American Depositary Shares ("ADSs"), or Non-Voting Depositary Receipts ("NVDRs"). ADRs typically are issued by a U.S. bank or trust company, evidence ownership of underlying securities issued by a foreign company, and are designed for use in U.S. securities markets. EDRs are issued by European financial institutions and typically trade in Europe and GDRs are issued by European financial institutions and typically trade in both Europe and the United States. HOLDRs trade on the American Stock Exchange and are fixed baskets of U.S. or foreign stocks that give an investor an ownership interest in each of the underlying stocks. NYRs, also known as Guilder Shares since most of the issuing companies are Dutch, are dollar-denominated certificates issued by foreign companies specifically for the U.S. market. ADSs are shares issued under a deposit agreement that represents an underlying security in the issuer's home country. (An ADS is the actual share trading, while an ADR represents a bundle of ADSs). NVDRs are listed securities through which investors receive the same financial benefits as those who invest directly in a company's common stock; however, unlike common stockholders, NVDR holders cannot be involved in proxy voting if the company solicits votes from stockholders.

The Fund invests in depositary receipts in order to obtain exposure to foreign securities markets. For purposes of the Fund's investment policies, the Fund's investment in an ADR will be considered an investment in the underlying securities of the applicable foreign company.

Risks. Un-sponsored depositary receipts may be created without the participation of the foreign issuer. Holders of these receipts generally bear all the costs of the depositary receipt facility, whereas foreign issuers typically bear certain costs of a sponsored depositary receipt. The bank or trust company depositary of an un-sponsored depositary receipt may be under no obligation to distribute shareholder communications received from the foreign issuer or to pass through voting rights. Accordingly, available information concerning the issuer may not be current and the prices of un-sponsored depositary receipts may be more volatile than the prices of sponsored depositary receipts.

Foreign Securities

The Fund may invest in foreign securities. Investments in the securities of foreign issuers may involve risks in addition to those normally associated with investments in the securities of U.S. issuers. All foreign investments are subject to risks of: (1) foreign political and economic instability such as war, hyperinflation, currency devaluations and overdependence on particular industries; (2) adverse movements in foreign exchange rates; (3) the imposition or tightening of exchange controls or other limitations on repatriation of foreign capital; and (4) changes in foreign governmental attitudes towards private investment, including potential nationalization, increased taxation or confiscation of the Fund's assets. The Fund may invest in non-US dollar denominated securities including debt obligations denominated in foreign or composite currencies (such as the European Currency Unit) issued by (1) foreign national, provincial, state or municipal governments or their political subdivisions; (2) international organizations designated or supported by governmental entities (e.g., the World Bank and the European Community); (3) non-dollar securities issued by the U.S. Government; and (4) foreign corporations. Economic sanctions could among other things, effectively restrict or eliminate the Fund's ability to purchase or sell securities or groups of securities for a substantial period of time, and may make the Fund's investments in such securities harder to value.

International trade tensions may arise from time to time which could result in trade tariffs, embargoes or other restrictions or limitations on trade. The imposition of any actions on trade could trigger a significant reduction in international trade, an oversupply of certain manufactured goods, substantial price reductions of goods and possible failure of individual companies or industries which could have a negative impact on Fund's performance. Events such as these are difficult to predict and may or may not occur in the future.

In addition, interest and dividends payable on foreign securities may be subject to foreign withholding taxes, thereby reducing the income available for distribution to you. Some foreign brokerage commissions and custody fees are higher than those in the U.S. Foreign accounting, auditing and financial reporting standards differ from those in the U.S. and therefore, less information may be available about foreign companies than is available about issuers of comparable U.S. companies. Foreign securities also may trade less frequently and with lower volume and may exhibit greater price volatility than U.S. securities.

Changes in foreign exchange rates will affect the U.S. dollar value of all foreign currency-denominated securities held by the Fund. Exchange rates are influenced generally by the forces of supply and demand in the foreign currency markets and by numerous other political and economic events occurring outside the United States, many of which may be difficult, if not impossible, to predict.

Income from foreign securities will be received and realized in foreign currencies and the Fund is required to compute and distribute income in U.S. dollars. Accordingly, a decline in the value of a particular foreign currency against the U.S. dollar after the Fund's income has been earned and computed in U.S. dollars may require the Fund to liquidate portfolio securities to acquire sufficient U.S. dollars to make a distribution. Similarly, if the exchange rate declines between the time the Fund incurs expenses in U.S. dollars and the time such expenses are paid, the

Fund may be required to liquidate additional foreign securities to purchase the U.S. dollars required to meet such expenses.

Emerging Markets

Investing in emerging markets can have more risk than investing in developed foreign markets. The risks of investing in these markets may be exacerbated relative to investments in foreign markets. Governments of developing and emerging market countries may be more unstable as compared to more developed countries. Developing and emerging market countries may have less developed securities markets or exchanges, and legal and accounting systems. In addition, companies in emerging market countries may not be subject to accounting, auditing, financial reporting and recordkeeping requirements that are as robust as those in more developed countries, and therefore, material information about a company may be unavailable or unreliable, and U.S. regulators may be unable to enforce a company's regulatory obligations. It may be more difficult to sell securities at acceptable prices and security prices may be more volatile than in countries with more mature markets. Currency values may fluctuate more in developing or emerging markets. Developing or emerging market countries may be more likely to impose government restrictions, including confiscatory taxation, expropriation or nationalization of a company's assets, and restrictions on foreign ownership of local companies. In addition, emerging markets may impose restrictions on the Fund's ability to repatriate investment income or capital and thus, may adversely affect the operations of the Fund. Certain emerging markets may impose constraints on currency exchange and some currencies in emerging markets may have been devalued significantly against the U.S. dollar. For these and other reasons, the prices of securities in emerging markets can fluctuate more significantly than the prices of securities of companies in developed countries. The less developed the country, the greater effect these risks may have on the Fund. Investors should be able to tolerate sudden, sometimes substantial, fluctuations in the value of their investments.

European Securities Risks

European countries can be significantly affected by the actions of their own individual governments as well as the actions of other European institutions, such as the European Union ("EU"), the European Economic and Monetary Union ("EMU") and the European Central Bank. The EU is an intergovernmental and supranational union consisting of 28 member states. One of the key responsibilities of the EU is to create and administer a unified trade policy. The member states created the EMU that established different stages and commitments that member states need to follow to achieve greater economic policy coordination and monetary cooperation. Member states relinquish their monetary control to the European Central Bank and use a single unified currency, the euro.

Investments in Europe are also subject to currency risks. Further, because many countries are dependent on foreign exports, any fluctuations in the euro exchange rate could have a negative effect on an issuer's profitability and performance.

The EU has been extending its influence to the east as it has accepted several new Eastern European countries as members. Some of the new members remain burdened by the inherited inefficiencies of centrally planned economies. Additionally, these countries are dependent on Western Europe for trade and credit. The current and future status of the EU continues to be the subject of political and regulatory controversy, with widely differing views both within and between member countries.

The European financial markets have experienced uncertainty over the past few years, largely because of concerns about rising government debt levels and increased budget deficits. Political and regulatory responses to address structural and policy issues have created even greater instability throughout the region. The high levels of public debt increases the likelihood that certain European issuers will either default or restructure their debt obligations,

which would have a negative effect on asset values. The use of austerity measures in countries such as Spain, Italy, Greece, Portugal and Ireland during times in which the eurozone has high levels of unemployment has limited economic growth. European countries can be adversely affected by the tight fiscal and monetary controls that the EMU requires its members to comply with. Due to the severity and prolonged economic crisis in Europe, it is possible that one or more of the EU members could abandon the euro and revert to a national currency, or otherwise cease to be a member of the EU. Although it is impossible to predict the effects of one or more countries exiting the EU, the outcome would likely lead to economic instability that would impact not only the EU member countries but the global economy as well.

In June 2016, the United Kingdom (“UK”) approved a referendum to leave the EU. The withdrawal, known colloquially as “Brexit”, was agreed to and ratified by the UK Parliament, and the UK left the EU on January 31, 2020. It began an 11-month transition period in which to negotiate a new trading relationship for goods and services that ended on December 31, 2020. The UK and EU reached an agreement, effective January 1, 2021, on the terms of their future trading relationship, which principally relates to the trading of goods. Further discussions are to be held between the UK and the EU in relation to matters not covered by the trade agreement, such as financial services. Brexit may have significant political and financial consequences for the Eurozone markets, including greater volatility in the global stock markets and illiquidity, fluctuations in currency and exchange rates, and an increased likelihood of a recession in the UK. At this time, the impact of Brexit cannot be predicted; however, market disruption in the EU and globally may have a negative effect on the value of the Fund’s investments. Additionally, the risks related to Brexit could be more pronounced if one or more additional EU member states seek to leave the EU.

On February 24, 2022, Russia commenced a military attack on Ukraine. The outbreak of hostilities between the two countries could result in more widespread conflict and could have a severe adverse effect on the region and the markets. In addition, sanctions imposed on Russia, Russian companies and financial institutions, Russian individuals and others by the United States and other countries, and any sanctions imposed in the future could have a significant adverse impact on the Russian economy and related markets. The price and liquidity of investments may fluctuate widely as a result of the conflict and related events. How long such conflict and related events will last and whether it will escalate further cannot be predicted.

Derivatives

Some of the instruments in which the Fund may invest may be referred to as “derivatives,” because their value “derives” from the value of an underlying asset, reference rate or index. These instruments include options, futures contracts, forward currency contracts, swap agreements and similar instruments. For regulatory reasons, certain structured securities that may involve a future payment obligation for the Fund may also be classified as derivatives. The market value of derivative instruments and securities sometimes may be more volatile than those of other instruments and each type of derivative instrument may have its own special risks. The use of derivatives is a highly specialized activity that involves strategies and risks that are different from those involving ordinary portfolio securities transactions, and generally depends on the manager’s ability to predict market movements. Moreover, even if the Adviser is correct in its forecast, there is still a risk that a derivative position may not perform as initially anticipated. Participation in the markets for derivative instruments involves investment risks and transaction costs to which the Fund may not be subject absent the use of these strategies.

Some over-the-counter (“OTC”) derivative instruments may expose the Fund to the credit risk of its counterparty. In the event the counterparty to such a derivative instrument becomes insolvent, the Fund potentially could lose all or a large portion of its investment in the derivative instrument.

Investing for hedging purposes or to increase the Fund's return may result in certain additional transaction costs that may reduce the Fund's performance. In addition, when used for hedging purposes, no assurance can be given that each derivative position will achieve a close correlation with the security or currency that is the subject of the hedge, or that a particular derivative position will be available when sought by the Adviser. While hedging strategies involving derivatives can reduce the risk of loss, they can also reduce the opportunity for gain or even result in losses by offsetting favorable price movements in other Fund investments. Certain derivatives may create a risk of loss greater than the amount invested.

It is possible that additional government regulation of various types of derivative instruments, including futures, options and swap agreements, and regulation of certain market participants' use of the same, may limit or prevent a Fund from using such instruments as a part of its investment strategy. It is not possible to fully predict the effects of current or future legislation and regulation by multiple regulators in this area, but the effects could be substantial and adverse. The futures, options and swaps markets are subject to comprehensive statutes, regulations, and margin requirements. The SEC recently implemented new regulations governing the use of derivatives by registered investment companies. Rule 18f-4 under the 1940 Act imposes limits on the amount of derivatives transactions a fund can enter into and requires funds whose use of derivatives is more than a limited specified exposure to establish and maintain a comprehensive derivatives risk management program and appoint a derivatives risk manager.

In addition, the SEC, CFTC and the exchanges are authorized to take extraordinary actions in the event of a market emergency, including, for example, the implementation or reduction of speculative position limits, the implementation of higher margin requirements, the establishment of daily price limits and the suspension of trading. The regulation of futures, options and swaps transactions in the United States is a changing area of law and is subject to modification by government and judicial action.

Swaps

The Fund may engage in swap transactions, including OTC swaps. OTC swaps are bilateral contracts entered into primarily by institutional investors for periods ranging from a few weeks to more than one year. In a standard OTC swap transaction, two parties agree to exchange the returns (or differentials in rates of return) earned or realized on particular predetermined investments or instruments. Whether the Fund's use of swaps will be successful will depend on the Adviser's ability to predict correctly whether certain types of investments are likely to produce greater returns than other investments. Moreover, the Fund bears the risk of loss of the amount expected to be received under a swap agreement in the event of the default or bankruptcy of a swap agreement counterparty. Swaps are highly specialized instruments that require investment techniques, risk analyses, and tax planning different from those associated with traditional investments. The use of a swap requires an understanding not only of the reference asset, reference rate, or index but also of the swap itself, without the benefit of observing the performance of the swap under all possible market conditions. Additionally, because OTC swaps are bilateral contracts, they may be subject to contractual restrictions on transferability and termination.

The Dodd-Frank Wall Street Reform and Consumer Protection Act ("Dodd-Frank Act") and related regulatory developments require the clearing and exchange-trading of certain standardized OTC derivative instruments that the CFTC and SEC have defined as "swaps." The CFTC has implemented mandatory exchange-trading and clearing requirements under the Dodd-Frank Act and the CFTC continues to approve contracts for central clearing. Central clearing is designed to reduce counterparty credit risk compared to uncleared OTC swaps because central clearing interposes the central clearinghouse as the counterparty to each participant's swap, but it does not eliminate those risks completely. Uncleared swaps are subject to certain margin requirements that mandate the posting and collection of minimum margin amounts on certain uncleared swaps transactions, which may result in the Fund and its counterparties posting higher margin amounts for uncleared swaps than would otherwise be the case.

Options and Futures

General

The Fund may (1) purchase or write options on securities in which it may invest or on market indices based in whole or in part on the securities in which it may invest; (2) invest in futures contracts on market indices based in whole or in part on securities in which it may invest; and (3) purchase or write put and call options on these futures contracts. The Fund will participate in such transactions to enhance the Fund's performance or hedge against a decline in the value of securities owned by the Fund or an increase in the price of securities that the Fund plans to purchase.

Options purchased or written by the Fund must be traded on an exchange or over-the-counter. Options and futures contracts are considered to be derivatives. Use of these instruments is subject to regulation by the SEC, the options and futures exchanges on which futures and options are traded or by the CFTC. No assurance can be given that any hedging or income strategy will achieve its intended result.

The Fund may invest more than 5% of its respective net assets in options and futures for purposes of achieving its investment objective, portfolio management, risk mitigation, hedging, equitizing cash or for purposes of enhancing total return.

To the extent that the Fund uses futures and/or options on futures and/or swaps, it will do so in accordance with Rule 4.5 under the Commodity Exchange Act ("CEA").

Options and Futures Contracts

Options on Securities. A call option is a contract under which the purchaser of the call option, in return for a premium paid, has the right to buy the security (or index) underlying the option at a specified price at any time during the term of the option. The writer of the call option, who receives the premium, has the obligation upon exercise of the option to deliver the underlying security against payment of the exercise price. A put option gives its purchaser, in return for a premium, the right to sell the underlying security at a specified price during the term of the option. The writer of the put, who receives the premium, has the obligation to buy, upon exercise of the option, the underlying security (or a cash amount equal to the value of the index) at the exercise price. The amount of a premium received or paid for an option is based upon certain factors including the market price of the underlying security, the relationship of the exercise price to the market price, the historical price volatility of the underlying security, the option period and interest rates.

Options on Stock Indices. A stock index assigns relative values to the stock included in the index, and the index fluctuates with changes in the market values of the stocks included in the index. Stock index options operate in the same way as the more traditional options on securities except that stock index options are settled exclusively in cash and do not involve delivery of securities. Thus, upon exercise of stock index options, the purchaser and writer of the option will exchange an amount based on the differences between the exercise price and the closing price of the stock index.

Options on Futures. Options on futures contracts are similar to options on securities except that an option on a futures contract gives the purchaser the right, in return for the premium paid, to assume a position in a futures contract rather than to purchase or sell a security, at a specified exercise price at any time during the period of the option. Upon exercise of the option, the delivery of the futures position to the holder of the option will be accompanied by transfer to the holder of an accumulated balance representing the amount by which the market price

of the futures contract exceeds, in the case of a call, or is less than, in the case of a put, the exercise price of the option on the future.

Futures Contracts and Index Futures Contracts. A futures contract is a bilateral agreement where one party agrees to accept, and the other party agrees to make, delivery of cash or an underlying debt security, as called for in the contract, at a specified date and at an agreed upon price.

An index futures contract involves the delivery of an amount of cash equal to a specified dollar amount multiplied by the difference between the index value at the close of trading of the contract and at the price designated by the futures contract. No physical delivery of the securities comprising the index is made. Generally, these futures contracts are closed out prior to the expiration date of the contracts.

A municipal bond futures contract is based on the value of the Bond Buyer Index (“BBI”) which is comprised of 40 actively traded general obligation and revenue bonds. The rating of a BBI issue must be at least “A.” To be considered, the issue must have at least 19 years remaining to maturity, a first call date between 7 and 16 years, and at least one call at par prior to redemption. No physical delivery of the securities is made in connection with municipal bond futures. Rather these contracts are usually settled in cash if they are not closed out prior to their expiration date.

A Treasury bond futures contract is based on the value of an equivalent 20-year, 6% Treasury bond. Generally, any Treasury bond with a remaining maturity or term to call of 15 years as of the first day of the month in which the contracts are scheduled to be exercised will qualify as a deliverable security pursuant to a Treasury bond futures contract. A Treasury note futures contract is based on the value of an equivalent 10-year, 6% Treasury note. Generally, any Treasury note with a remaining maturity or term to call of 6 1/2 years or 10 years, respectively, as of the first day of the month in which the contracts are scheduled to be exercised will qualify as a deliverable security pursuant to Treasury note futures contract.

Since a number of different Treasury notes will qualify as a deliverable security upon the exercise of the option, the price that the buyer will actually pay for those securities will depend on which ones are actually delivered. Normally, the exercise price of the futures contract is adjusted by a conversion factor that takes into consideration the value of the deliverable security if it were yielding 6% as of the first day of the month in which the contract is scheduled to be exercised.

Risks of Options and Futures Transactions

There are certain investment risks associated with options and futures transactions. These risks include: (1) dependence on the Adviser’s ability to predict movements in the prices of individual securities and fluctuations in the general securities markets; (2) imperfect correlation between movements in the prices of options and movements in the price of the securities (or indices) hedged or used for cover which may cause a given hedge not to achieve its objective; (3) the fact that the skills and techniques needed to trade these instruments are different from those needed to select the securities in which the Fund invests; and (4) lack of assurance that a liquid secondary market will exist for any particular instrument at any particular time, which, among other things, may hinder the Fund’s ability to limit exposures by closing its positions. The potential loss to the Fund from investing in certain types of futures transactions is unlimited.

Other risks include the inability of the Fund, as the writer of covered call options, to benefit from any appreciation of the underlying securities above the exercise price, and the possible loss of the entire premium paid for options purchased by the Fund. In addition, the futures exchanges may limit the amount of fluctuation permitted in certain

futures contract prices or related options during a single trading day. The Fund may be forced, therefore, to liquidate or close out a futures contract position at a disadvantageous price. There is no assurance that a counterparty in an over-the-counter option transaction will be able to perform its obligations. The Fund may use various futures contracts that are relatively new instruments without a significant trading history. As a result, there can be no assurance that an active secondary market in those contracts will develop or continue to exist. The Fund's activities in the futures and options markets may result in higher portfolio turnover rates and additional brokerage costs, which could reduce the Fund's yield.

Short Sales

The Fund may make short sales as a part of overall portfolio management or to offset a potential decline in the value of a security. A short sale involves the sale of a security that the Fund does not own, or if the Fund owns the security, is not to be delivered upon consummation of the sale. When the Fund makes a short sale of a security that it does not own, it must borrow from a broker-dealer the security sold short and deliver the security to the broker-dealer upon conclusion of the short sale.

If the price of the security sold short increases between the time of the short sale and the time the Fund replaces the borrowed security, the Fund will incur a loss; conversely, if the price declines, the Fund will realize a short-term capital gain. Although the Fund's gain is limited to the price at which it sold the security short, its potential loss is theoretically unlimited.

The Fund will fully-collateralize its shorts sales.

Typically, the Fund will only make short sales "against the box," which occurs when the Fund enters into a short sale transaction with respect to a security it either owns or has the right to obtain at no additional cost. However, with respect to the Fund the dollar amount of short sales at any one time (not including short sales against the box) may not exceed 25% of the net assets of the Fund, and it is expected that normally the dollar amount of such sales will not exceed 10% of the net assets of the Fund.

Illiquid and Restricted Securities

Illiquid Investments. The Fund may not acquire any illiquid investment if, immediately after the acquisition, the Fund would have invested more than 15% of its net assets in illiquid investments that are assets. An "illiquid investment" is any investment that may not reasonably be expected to be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the investment. The Adviser will monitor the amount of illiquid investments in the Fund's portfolio, under the supervision of the Board, to ensure compliance with the Fund's investment restrictions. If securities that were liquid at the time of purchase subsequently become illiquid and result in the Fund holding illiquid investments in excess of 15% of its net assets, the Fund will no longer purchase additional illiquid investments and will reduce its holdings of illiquid investments in an orderly manner, but it is not required to dispose of illiquid holdings immediately if it is not in the interest of the Fund.

Historically, illiquid investments have included securities subject to contractual or legal restrictions on resale because they have not been registered under the Securities Act of 1933, as amended (the "Securities Act"), securities which are otherwise not readily marketable and repurchase agreements having a maturity of longer than seven days. As described below, in some cases, securities subject to legal or contractual restrictions on resales may not be deemed to be illiquid (see "Restricted Securities" below). Mutual funds do not typically hold a significant amount of these illiquid securities because of the potential for delays on resale and uncertainty in valuation. Limitations on

resale may have an adverse effect on the marketability of portfolio securities, and the Fund might be unable to dispose of illiquid investment promptly or at reasonable prices and might thereby experience difficulty satisfying redemption requests within seven days.

The Fund has adopted a liquidity risk management program (the “LRM Program”) pursuant to which the Fund identifies illiquid investments. Under the LRM Program, the Adviser has been designated to administer the LRM Program and the Adviser has in turn delegated certain responsibilities to a Liquidity Risk Management Committee, which is comprised of certain operations, compliance, trading, and portfolio management representatives of the Adviser. The Adviser preliminarily identifies illiquid investments based on, among other things, the trading characteristics and market depth of a particular investment.

The Adviser classifies all portfolio holdings of the Fund at least monthly into one of four liquidity classifications pursuant to the procedure set forth in the LRM Program. The liquidity classifications, which are defined in Rule 22e-4 under the 1940 Act, are highly liquid, moderately liquid, less liquid, and illiquid investments. In determining these classifications, the Adviser will consider the relevant market, trading, and investment-specific considerations for a particular investment. Moreover, in making such classification determinations, the Adviser must determine whether trading varying portions of a position in a particular portfolio investment or asset class would be reasonably expected to significantly affect the Fund’s liquidity. In addition, the Adviser may also consider the following factors in its liquidity determinations: (i) the existence of an active market; (ii) whether the investment is exchange-traded; (iii) frequency of trades or quotes and average daily trading volume; (iv) volatility of trading prices; (v) bid-ask spreads; (vi) whether the asset has a relatively standardized and simple structure; (vii) the maturity and date of issue (as applicable); and (viii) any restrictions on transfer.

Restricted Securities. The Fund may invest in securities that are subject to restrictions on resale because they have not been registered under the Securities Act. These securities are sometimes referred to as private placements. Although securities which may be resold only to “qualified institutional buyers” in accordance with the provisions of Rule 144A under the Securities Act are technically considered “restricted securities,” the Fund may purchase Rule 144A securities without regard to the limitation on investments in illiquid securities described above in the “Illiquid Investments” section, provided that a determination is made that such securities have a readily available trading market. The Fund may also purchase certain commercial paper issued in reliance on the exemption from regulations in Section 4(a)(2) of the Securities Act (“4(a)(2) Paper”). The Adviser will determine the liquidity of Rule 144A securities and 4(a)(2) Paper under the supervision of the Adviser and the Board. The liquidity of Rule 144A securities and 4(a)(2) Paper will be monitored by the Adviser and if as a result of changed conditions it is determined that a Rule 144A security or 4(a)(2) Paper is no longer liquid, the Fund’s holdings of illiquid securities will be reviewed to determine what action, if any, is appropriate. The Fund may determine that it is appropriate to continue to hold such instrument for a period of time to avoid a distressed sale which would be harmful to shareholders.

Limitations on the resale of restricted securities may have an adverse effect on the marketability of portfolio securities and the Fund might be unable to dispose of restricted securities promptly or at reasonable prices and might thereby experience difficulty satisfying redemption requirements. The Fund might also have to register such restricted securities in order to dispose of them, resulting in additional expense and delay. Adverse market conditions could impede such a public offering of securities.

Determination of Liquidity

The Board has the ultimate responsibility for determining whether specific securities are liquid or illiquid and has delegated the function of making determinations of liquidity to the Valuation Committee and the Adviser, pursuant

to guidelines approved by the Board. The Adviser determines and monitors the liquidity of the portfolio securities and reports periodically on their decisions to the Board. In making such determinations they take into account a number of factors in reaching liquidity decisions, including but not limited to: (1) the frequency of trades and quotations for the security; (2) the number of dealers willing to purchase or sell the security and the number of other potential buyers; (3) the willingness of dealers to undertake to make a market in the security; and (4) the nature of the marketplace trades, including the time needed to dispose of the security, the method of soliciting offers and the mechanics of the transfer.

Private placement and other restricted securities may be considered illiquid securities as they typically are subject to restrictions on resale as a matter of contract or under federal securities laws. Restricted securities that are “illiquid” are subject to the Fund’s policy of not investing more than 15% of its net assets in illiquid securities. The Adviser will evaluate the liquidity characteristics of restricted securities on a case-by-case basis and will consider the factors described above in connection with its evaluation.

An institutional market has developed for certain restricted securities. Accordingly, contractual or legal restrictions on the resale of a security may not be indicative of the liquidity of the security. If such securities are eligible for purchase by institutional buyers in accordance with Rule 144A under the 1933 Act or other exemptions, the Adviser may determine that the securities are liquid.

Risks. Limitations on resale may have an adverse effect on the marketability of a security and the Fund might also have to register a restricted security in order to dispose of it, resulting in expense and delay. The Fund might not be able to dispose of private placements, restricted or illiquid securities promptly or at reasonable prices and might thereby experience difficulty satisfying redemption requests. There can be no assurance that a liquid market will exist for any security at any particular time. Any security, including securities determined by the Adviser to be liquid, can become illiquid.

Investment Company Securities

Open-End and Closed-End Investment Companies

General. The Fund may invest in other open-end and closed-end investment companies consistent with the Fund’s investment objectives and strategies. The Fund may also invest in money market mutual funds, pending investment of cash balances. The Fund will limit its investment in the securities of other open-end and closed-end investment companies to the extent permitted by the 1940 Act and the rules, regulations and exemptive orders thereunder. With certain exceptions, such provisions generally permit the Fund to invest up to 5% of its assets in another investment company, up to 10% of its assets in investment companies generally and hold up to 3% of the shares of another investment company, and may invest greater than 10% of its assets in other investment companies subject to applicable provisions of the 1940 Act and the rules adopted thereunder. The Fund’s investment in other investment companies may include money market mutual funds, which are not subject to certain of the percentage limitations set forth above. The Fund may invest in investment companies in excess of the statutory limits imposed by the 1940 Act in reliance on Rule 12d1-4 under the 1940 Act. These investments in other investment companies are subject to the applicable conditions of Rule 12d1-4, which, among other things, imposes certain limits on the investments and operations of the underlying investment company (including such underlying fund’s ability to invest in other investment companies and certain structured finance vehicles).

Risks. The Fund, as a shareholder of another investment company, will bear its pro-rata portion of the other investment company’s advisory fee and other expenses, in addition to its own expenses and will be exposed to the investment risks associated with the other investment company. To the extent that the Fund invests in closed-end

companies that invest primarily in the common stock of companies located outside the United States, see the risks related to foreign securities set forth in the section entitled “Investment Policies and Risks – Equity Securities – Foreign Securities Risks” above.

Exchange-Traded Funds and Exchange-Traded Notes

General. The Fund may invest in exchange-traded funds (“ETFs”). ETFs are investment companies that are bought and sold on a securities exchange. An ETF represents a fixed portfolio of securities designed to track a particular market segment or index. The Fund may also invest in exchange-traded notes (“ETNs”), which are structured debt securities. Whereas ETFs’ liabilities are secured by their portfolio securities, ETNs’ liabilities are unsecured general obligations of the issuer. Most ETFs and ETNs are designed to track a particular market segment or index. ETFs and ETNs have expenses associated with their operation, typically including, with respect to ETFs, advisory fees. When the Fund invests in an ETF or ETN, in addition to directly bearing expenses associated with its own operations, it will bear its pro rata portion of the ETF’s or ETN’s expenses. The Fund’s investments in ETFs are also subject to the limitations on investments in other investment companies discussed above.

Risks. The risks of owning an ETF or ETN generally reflect the risks of owning the underlying market segment or index it is designed to track. Lack of liquidity in an ETF, however, could result in it being more volatile than the underlying portfolio of securities. In addition, the Fund will incur expenses in connection with investing in ETFs and ETNs that may increase the cost of investing in the ETF or ETN versus the cost of directly owning the securities in the ETF or an ETN. The value of an ETN security should also be expected to fluctuate with the credit rating of the issuer.

Trust Securities and Unit Investment Trusts

General. The Fund may invest in trusts and unit investment trusts (“UITs”), including HOLDRS. HOLDRS are trust-issued receipts that represent beneficial ownership in the specific group of stocks held by the issuing trust. UITs are registered investment companies that are similarly unmanaged, or passively managed, and as such generally hold a static portfolio of securities, or track an index. The liabilities of trusts (including HOLDRS trusts) and UITs incur some expenses in connection with their operations; thus, when the Fund invests in a trust, HOLDR or UIT, in addition to directly bearing expenses associated with its own operations, it will bear its pro rata portion of the trust’s, HOLDRS’ or UIT’s expenses. Like ETFs, HOLDRS are exchange-listed and, therefore, may be purchased and sold on the secondary market. The Fund will limit its investment in the securities of trusts and unit investment trusts to the extent permitted by the 1940 Act.

Risks. The risks of owning a trust security (including a HOLDR) or a UIT security generally reflect the risks of owning the securities in the trust or UIT’s portfolio. Due to the unmanaged or passively managed nature of such vehicles, the relative weights of their portfolio securities may change over time, resulting in a change in the nature of the investment. In addition, due to the additional expenses associated with trusts (including HOLDRS trusts) and UITs, it may be more costly to own their securities than it would be directly to own their portfolio securities. In addition, there could be a lack of liquidity in the secondary market for HOLDRS, which could cause the market for HOLDRS to be more volatile than the market for the underlying portfolio securities.

Other Pooled Investment Vehicles

General. The Fund may invest in pooled investment vehicles, including limited partnerships. Examples of such vehicles include private equity funds and private equity funds of funds. A private equity fund generally invests in non-public companies that the fund’s manager believes will experience significant growth over a certain time period.

A private equity fund of funds invests in other private equity funds of the type described. Investments in private equity funds, once made, typically may not be redeemed for several years, though they may be sold to other investors under certain circumstances. The Fund will limit its investment in the securities of pooled investment vehicles, including limited partnerships, to the extent permitted by the 1940 Act.

Risks. To the extent that the Fund invests in Pooled Investment Vehicles, such investments generally will be deemed illiquid. (See “Illiquid and Restricted Securities” for the risks of investing in illiquid securities above). If such an investment is determined by the Adviser to be illiquid, it is subject to the Fund’s policy of not investing more than 15% of its net assets in illiquid securities. In addition, the Fund will bear its ratable share of such vehicles’ expenses, including its management expenses and performance fees. Performance fees are fees paid to the vehicle’s manager based on the vehicle’s investment performance (or returns) as compared to some benchmark. The fees the Fund pays to invest in a Pooled Investment Vehicle may be higher than the fees it would pay if the manager of the Pooled Investment Vehicle managed the Fund’s assets directly. Further, the performance fees payable to the manager of a Pooled Investment Vehicle may create an incentive for the manager to make investments that are riskier or more speculative than those it might make in the absence of an incentive fee.

Fixed Income Securities

U.S. Government Securities

General. The Fund may invest in U.S. Government Securities. U.S. Government Securities include securities issued by the U.S. Treasury and by U.S. Government agencies and instrumentalities. U.S. Government Securities may be supported by the full faith and credit of the United States; by the right of the issuer to borrow from the U.S. Treasury; by the discretionary authority of the U.S. Treasury to lend to the issuer; or solely by the creditworthiness of the issuer. Holders of U.S. Government Securities not backed by the full faith and credit of the United States must look principally to the agency or instrumentality issuing the obligation for repayment and may not be able to assert a claim against the United States in the event that the agency or instrumentality does not meet its commitment. No assurance can be given that the U.S. Government would provide support if it were not obligated to do so by law. Neither the U.S. Government nor any of its agencies or instrumentalities guarantees the market value of the securities they issue. On September 7, 2008, the Federal Housing Finance Agency placed Fannie Mae and Freddie Mac into conservatorship, which, in effect, has caused Fannie Mae and Freddie Mac to become supported by the U.S. Government. No assurance can be given as to whether the U.S. Government will continue to support Fannie Mae and Freddie Mac.

Yields on short-, intermediate- and long-term U.S. government securities are dependent on a variety of factors, including the general conditions of the money and bond markets, the size of a particular offering and the maturity of the obligation. Debt securities with longer maturities tend to produce higher capital appreciation and depreciation than obligations with shorter maturities and lower yields. The market value of U.S. government securities generally varies inversely with changes in the market interest rates. An increase in interest rates, therefore, generally would reduce the market value of the Fund’s portfolio investments in U.S. government securities, while a decline in interest rates generally would increase the market value of the Fund’s portfolio investments in these securities.

Corporate Debt Obligations

General. The Fund may invest in corporate debt obligations. Corporate debt obligations include corporate bonds, debentures, notes, commercial paper and other similar corporate debt instruments. These instruments are used by companies to borrow money from investors. The issuer pays the investor a fixed or variable rate of interest and must

repay the amount borrowed at maturity. Commercial paper (short-term unsecured promissory notes) is issued by companies to finance their current obligations and normally has a maturity of less than 9 months. The Fund may also invest in corporate fixed income securities registered and sold in the U.S. by foreign issuers (Yankee bonds) and those sold outside the U.S. by foreign or U.S. issuers (Eurobonds).

Government and Agency Mortgage-Backed Securities. The Fund may invest in government agency and mortgage-backed securities. The principal issuers or guarantors of mortgage-backed securities are the Government National Mortgage Association (“GNMA”), Fannie Mae (“FNMA”) and the Federal Home Loan Mortgage Corporation (“FHLMC” or “Freddie Mac”). GNMA, a wholly-owned U.S. Government corporation creates pass-through securities from pools of government guaranteed (Farmers’ Home Administration, Federal Housing Authority or Veterans Administration) mortgages. The principal and interest on GNMA pass-through securities are backed by the full faith and credit of the U.S. Government.

FNMA and Freddie Mac are U.S. Government-sponsored corporations and are subject to regulation by the Office of Federal Housing Enterprise Oversight (“OFHEO”). Both issue pass-through securities from pools of conventional and Federally insured and/or guaranteed residential mortgages. FNMA guarantees full and timely payment of all interest and principal, and FHLMC guarantees timely payment of interest and ultimate collection of principal of its pass-through securities. Mortgage-backed securities from FNMA and FHLMC are not backed by the full faith and credit of the U.S. Government. The U.S. Department of the Treasury has the authority to support FNMA and FHLMC by purchasing limited amounts of their respective obligations, and the U.S. government has, in the past, provided financial support to FNMA and FHLMC with respect to their debt obligations. However, no assurance can be given that the U.S. government will always do so or would do so yet again. Congress has been considering proposals to reduce the U.S. Government’s role in the mortgage market and whether to wind down Fannie Mae and Freddie Mac. The proposals include, among others, whether Fannie Mae and Freddie Mac should be nationalized, privatized, restructured or eliminated. Fannie Mae and Freddie Mac also are the subject of several continuing legal actions and investigations over certain accounting, disclosure and corporate governance matters, which may have an adverse effect on these entities. As a result, the future for Fannie Mae and Freddie Mac is uncertain, as is the impact of such proposals, actions and investigations on the Fund’s investments in securities issued by Fannie Mae and Freddie Mac.

Except for U.S. Treasury securities, obligations of U.S. Government agencies and instrumentalities may or may not be supported by the full faith and credit of the United States. Some are backed by the right of the issuer to borrow from the Treasury; others by discretionary authority of the U.S. Government to purchase the agencies’ obligations; while still others are supported only by the credit of the instrumentality. In the case of securities not backed by the full faith and credit of the United States, the investor must look principally to the agency or instrumentality issuing or guaranteeing the obligation for ultimate repayment and may not be able to assert a claim against the United States itself in the event the agency or instrumentality does not meet its commitment. The Fund will invest in securities of such agencies or instrumentalities only when the Adviser is satisfied that the credit risk is acceptable.

Risks – Specific to Mortgage-Backed Securities. The value of mortgage-backed securities may be significantly affected by changes in interest rates, the markets’ perception of issuers, the structure of the securities and the creditworthiness of the parties involved. The ability of the Fund to successfully utilize mortgage-backed securities depends in part upon the ability of the Adviser to forecast interest rates and other economic factors correctly. Some mortgage-backed securities have structures that make their reaction to interest rate changes and other factors difficult to predict.

Prepayments of principal of mortgage-backed securities by mortgagors or mortgage foreclosures affect the average life of the mortgage-backed securities. The occurrence of mortgage prepayments is affected by various factors,

including the level of interest rates, general economic conditions, the location and age of the mortgages and other social and demographic conditions. In periods of rising interest rates, the prepayment rate tends to decrease, lengthening the average life of a pool of mortgage-backed securities. In periods of falling interest rates, the prepayment rate tends to increase, shortening the average life of a pool. The volume of prepayments of principal on the mortgages underlying a particular mortgage-backed security will influence the yield of that security, affecting the Fund's yield. Because prepayments of principal generally occur when interest rates are declining, it is likely that the Fund, to the extent it retains the same percentage of fixed income securities, may have to reinvest the proceeds of prepayments at lower interest rates than those of their previous investments. If this occurs, the Fund's yield will correspondingly decline. Thus, mortgage-backed securities may have less potential for capital appreciation in periods of falling interest rates (when prepayment of principal is more likely) than other fixed income securities of comparable duration, although they may have a comparable risk of decline in market value in periods of rising interest rates. A decrease in the rate of prepayments may extend the effective maturities of mortgage-backed securities, increasing their sensitivity to changes in market interest rates. To the extent that the Fund purchases mortgage-backed securities at a premium, unscheduled prepayments, which are made at par, result in a loss equal to an unamortized premium.

To the extent that the Fund invests in commercial mortgage-backed securities ("CMBS"), CMBS are subject to credit risk and prepayment risk. Although prepayment risk is present, it is of a lesser degree in CMBS than in the residential mortgage market; commercial real estate property loans often contain provisions which substantially reduce the likelihood that such securities will be prepaid (e.g., significant prepayment penalties on loans and, in some cases, prohibition on principal payments for several years following origination).

To lessen the effect of the failures by obligors on Mortgage Assets to make payments, CMOs and other mortgage-backed securities may contain elements of credit enhancement, consisting of either (1) liquidity protection; or (2) protection against losses resulting after default by an obligor on the underlying assets and allocation of all amounts recoverable directly from the obligor and through liquidation of the collateral. This protection may be provided through guarantees, insurance policies or letters of credit obtained by the issuer or sponsor from third parties, through various means of structuring the transaction or through a combination of these. The Fund will not pay any additional fees for credit enhancements for mortgage-backed securities, although the credit enhancement may increase the costs of the mortgage-backed securities.

The Fund may manage counterparty exposure for forward-settling agency mortgage-backed securities ("MBS") transactions, including TBA purchase commitments, by requiring that such transactions be bilaterally margined.

Asset-Backed Securities

General. The Fund may invest in asset-backed securities. Asset-backed securities have structural characteristics similar to mortgage-backed securities but have underlying assets that are not mortgage loans or interests in mortgage loans. Asset-backed securities represent fractional interests in, or are secured by and payable from, pools of assets such as motor vehicle installment sales contracts, installment loan contracts, leases of various types of real and personal property and receivables from revolving credit (for example, credit card) agreements. Assets are securitized through the use of trusts and special purpose corporations that issue securities that are often backed by a pool of assets representing the obligations of a number of different parties. Repayments relating to the assets underlying the asset-backed securities depend largely on the cash flows generated by such assets. The credit quality of most asset-backed securities depends primarily on the credit quality of the assets underlying such securities, how well the entity issuing the security is insulated from the credit risk of the originator or any other affiliated entities, and the amount and quality of any credit enhancements associated with the securities. Payments or distributions of principal and interest on asset-backed securities may be supported by credit enhancements including letters of credit, an insurance

guarantee, reserve funds and over collateralization. Asset-backed securities have structures and characteristics similar to those of mortgage-backed securities and, accordingly, are subject to many of the same risks, although often, to a greater extent.

Risks – Specific to Asset-Backed Securities. Like mortgages-backed securities, the collateral underlying asset-backed securities are subject to prepayment, which may reduce the overall return to holders of asset-backed securities. Asset-backed securities present certain additional and unique risks. Primarily, these securities do not always have the benefit of a security interest in collateral comparable to the security interests associated with mortgage-backed securities. Credit card receivables are generally unsecured and the debtors are entitled to the protection of a number of state and Federal consumer credit laws, many of which give such debtors the right to set-off certain amounts owed on the credit cards, thereby reducing the balance due. Automobile receivables generally are secured by automobiles. Most issuers of automobile receivables permit the loan servicers to retain possession of the underlying obligations. If the servicer were to sell these obligations to another party, there is a risk that the purchaser would acquire an interest superior to that of the holders of the asset-backed securities. In addition, because of the large number of vehicles involved in a typical issuance and the technical requirements under state laws, the trustee for the holders of the automobile receivables may not have a proper security interest in the underlying automobiles. As a result, the risk that recovery on repossessed collateral might be unavailable or inadequate to support payments on asset-backed securities is greater for asset-backed securities than for mortgage-backed securities. In addition, because asset-backed securities are relatively new, the market experience in these securities is limited and the market's ability to sustain liquidity through all phases of an interest rate or economic cycle has not been tested.

Variable Amount Master Demand Notes

General. The Fund may invest in variable amount master demand notes. Variable amount master demand notes are unsecured demand notes that permit investment of fluctuating amounts of money at variable rates of interest pursuant to arrangements with issuers who meet certain quality criteria. All variable amount master demand notes acquired by the Fund will be payable within a prescribed notice period not to exceed seven days.

Variable and Floating Rate Securities

The Fund may invest in variable and floating rate securities. Fixed Income securities that have variable or floating rates of interest may, under certain limited circumstances, have varying principal amounts. These securities pay interest at rates that are adjusted periodically according to a specified formula, usually with reference to one or more interest rate indices or market interest rates (the "underlying index"). The interest paid on these securities is a function primarily of the underlying index upon which the interest rate adjustments are based. These adjustments minimize changes in the market value of the obligation. Similar to fixed rate debt instruments, variable and floating rate instruments are subject to changes in value based on changes in market interest rates or changes in the issuer's creditworthiness. The rate of interest on securities may be tied to U.S. Government Securities or indices on those securities as well as any other rate of interest or index, such as the London Interbank Offered Rate ("LIBOR"). On July 27, 2017, the head of the UK's Financial Conduct Authority announced a desire to phase out the use of LIBOR by the end of 2021. On December 31, 2021, certain LIBOR settings ceased to be published. However, the most widely used U.S. dollar LIBORs are still scheduled to be published through June 30, 2023. As of January 1, 2022, as a result of supervisory guidance from U.S. regulators, some U.S. regulated entities have ceased entering into new LIBOR contracts with limited exceptions. On March 15, 2022, the Adjustable Interest Rate (LIBOR) Act was signed into law. This law provides a statutory fallback mechanism on a nationwide basis to replace LIBOR with a benchmark rate that is selected by the Board of Governors of the Federal Reserve System and based on SOFR (defined below) for certain contracts that reference LIBOR and contain no, or insufficient, fallback provisions. It is

expected that implementing regulations in respect of the law will follow. Although the transition process away from LIBOR has become increasingly well-defined in advance of the anticipated discontinuation date, there remains uncertainty regarding the future utilization of LIBOR and the nature of any replacement rates. Accordingly, the potential effect of a transition away from LIBOR on the Fund or the debt securities or other instruments based on LIBOR in which the Fund invests cannot yet be determined. The transition process might lead to increased volatility and illiquidity in markets for instruments with terms tied to LIBOR. It could also lead to a reduction in the interest rates on, and the value of, some LIBOR-based investments and reduce the effectiveness of hedges mitigating risk in connection with LIBOR-based investments.

In June 2017, the Alternative Reference Rates Committee, a group of large U.S. banks working with the Federal Reserve, announced a replacement for LIBOR, the Secured Overnight Funding Rate ("SOFR"). The Federal Reserve Bank of New York began publishing the SOFR in April 2018, which is a broad measure of the cost of overnight borrowing of cash collateralized by Treasury securities. SOFR is intended to serve as a reference rate for U.S. dollar-based debt and derivatives and ultimately reduce the markets' dependence on LIBOR. Bank working groups and regulators in other countries have suggested other alternatives for their markets, including the Sterling Overnight Interbank Average Rate ("SONIA") in the UK.

Alteration of the terms of a debt instrument or a modification of the terms of other types of contracts to replace LIBOR or another interbank offered rate ("IBOR") with a new reference rate could result in a taxable exchange and the realization of income and gain/loss for U.S. Federal income tax purposes. The IRS has issued final regulations regarding the tax consequences of the transition from IBOR to a new reference rate in debt instruments and non-debt contracts. Under the final regulations, alteration or modification of the terms of a debt instrument to replace an operative rate that uses a discontinued IBOR with a qualified rate (as defined in the final regulations) including true up payments equalizing the fair market value of contracts before and after such IBOR transition, to add a qualified rate as a fallback rate to a contract whose operative rate uses a discontinued IBOR or to replace a fallback rate that uses a discontinued IBOR with a qualified rate would not be taxable. The IRS may provide additional guidance, with potential retroactive effect.

Variable and floating rate demand notes of corporations are redeemable upon a specified period of notice. These obligations include master demand notes that permit investment of fluctuating amounts at varying interest rates under direct arrangements with the issuer of the instrument. The issuer of these obligations often has the right, after a given period, to prepay the outstanding principal amount of the obligations upon a specified number of days' notice.

Certain securities may have an initial principal amount that varies over time based on an interest rate index, and, accordingly, the Fund might be entitled to less than the initial principal amount of the security upon the security's maturity. The Fund intends to purchase these securities only when the Adviser believes the interest income from the instrument justifies any principal risks associated with the instrument. The Adviser may attempt to limit any potential loss of principal by purchasing similar instruments that are intended to provide an offsetting increase in principal. There can be no assurance that the Adviser will be able to limit the effects of principal fluctuations and, accordingly, the Fund may incur losses on those securities even if held to maturity without issuer default.

There may not be an active secondary market for any particular floating or variable rate instruments, which could make it difficult for the Fund to dispose of the instrument during periods that the Fund is not entitled to exercise any demand rights it may have. The Fund could, for this or other reasons, suffer a loss with respect to those instruments. The Adviser monitors the liquidity of the Fund's investment in variable and floating rate instruments, but there can be no guarantee that an active secondary market will exist.

Non-U.S. Dollar Denominated Securities and Other Fixed Income Securities

The Fund may invest in short-term money market instruments issued in the U.S. or abroad, denominated in U.S. dollars or any foreign currency. Short-term money market instruments include repurchase agreements, short-term fixed or variable rate certificates of deposit, time deposits with a maturity no greater than 180 days, bankers' acceptances, commercial paper rated A-1 by S&P or Prime-1 by Moody's or in similar other money market securities. Certificates of deposit represent an institution's obligation to repay funds deposited with it that earn a specified interest rate over a given period. Bankers' acceptances are negotiable obligations of a bank to pay a draft, which has been drawn by a customer, and are usually backed by goods in international trade. Time deposits are non-negotiable deposits with a banking institution that earn a specified interest rate over a given period. Certificates of deposit and time deposits generally may be withdrawn on demand by the Fund but may be subject to early withdrawal penalties that could reduce the Fund's performance.

The Fund may also invest in other high quality fixed income securities denominated in U.S. dollars, any foreign currency or in a multi-national currency unit (e.g. the European Currency Unit).

The Fund may invest in non-U.S. dollar denominated securities including debt obligations denominated in foreign or composite currencies (such as the European Currency Unit) issued by (1) foreign national, provincial, state or municipal governments or their political subdivisions; (2) international organizations designated or supported by governmental entities (e.g., the World Bank and the European Community); (3) non-dollar securities issued by the U.S. Government; and (4) foreign corporations.

Inflation-Protected Securities.

The Fund may invest in U.S. Treasury Inflation Protected Securities ("U.S. TIPS"), to the extent permitted by the Prospectus. U.S. TIPS are fixed income securities issued by the U.S. Department of Treasury, the principal amounts of which are adjusted daily based upon changes in the rate of inflation. The Fund may also invest in other inflation-protected securities issued by non-U.S. governments or by private issuers. U.S. TIPS pay interest on a semi-annual basis, equal to a fixed percentage of the inflation-adjusted principal amount. The interest rate on these bonds is fixed at issuance, but over the life of the bond this interest may be paid on an increasing or decreasing principal value that has been adjusted for inflation.

Repayment of the original bond principal upon maturity (as adjusted for inflation) is guaranteed for U.S. TIPS, even during a period of deflation. However, because the principal amount of U.S. TIPS would be adjusted downward during a period of deflation, the Fund will be subject to deflation risk with respect to its investments in these securities. In addition, the current market value of the bonds is not guaranteed, and will fluctuate. If the Fund purchases in the secondary market U.S. TIPS whose principal values have been adjusted upward due to inflation since issuance, the Fund may experience a loss if there is a subsequent period of deflation. The Fund may also invest in other inflation-related bonds which may or may not provide a guarantee of principal. If a guarantee of principal is not provided, the adjusted principal value of the bond repaid at maturity may be less than the original principal amount.

The periodic adjustment of U.S. TIPS is currently tied to the Consumer Price Index for All Urban Consumers ("CPI-U"), which is calculated by the U.S. Department of Treasury. The CPI-U is a measurement of changes in the cost of living, made up of components such as housing, food, transportation and energy. Inflation-protected bonds issued by a non-U.S. government are generally adjusted to reflect a comparable inflation index, calculated by that government. There can no assurance that the CPI-U or any non-U.S. inflation index will accurately measure the real rate of inflation in the prices of goods and services. If interest rates rise due to reasons other than inflation (for example, due

to changes in currency exchange rates), investors in these securities may not be protected to the extent that the increase is not reflected in the bond's inflation measure. In addition, there can be no assurance that the rate of inflation in a non-U.S. country will be correlated to the rate of inflation in the United States.

In general, the value of inflation-protected bonds is expected to fluctuate in response to changes in real interest rates, which are in turn tied to the relationship between nominal interest rates and the rate of inflation. Therefore, if inflation were to rise at a faster rate than nominal interest rates, real interest rates might decline, leading to an increase in value of inflation-protected bonds. In contrast, if nominal interest rates increased at a faster rate than inflation, real interest rates might rise, leading to a decrease in value of inflation-protected bonds. If inflation is lower than expected during the period the Fund holds the security, the Fund may earn less on the security than on a conventional bond. Any increase in principal value is taxable in the year the increase occurs, even though holders do not receive cash representing the increase at that time. As a result, when the Fund invests in inflation-protected securities, it could be required at times to liquidate other investments, including when it is not advantageous to do so, in order to satisfy its distribution requirements as a regulated investment company ("RIC") and to eliminate any fund-level income tax liability under the Code.

Infrastructure Investments.

The Fund may invest in securities and other obligations of U.S. and non-U.S. issuers providing exposure to infrastructure investment. Infrastructure investments may be related to physical structures and networks that provide necessary services to society, such as transportation and communications networks, water and energy utilities, and public service facilities. Securities, instruments and obligations of infrastructure-related companies and projects are more susceptible to adverse economic or regulatory occurrences affecting their industries. Infrastructure companies may be subject to a variety of factors that may adversely affect their business or operations, including high interest costs in connection with capital construction programs, high leverage, costs associated with environmental and other regulations, the effects of economic slowdown, surplus capacity, increased competition from other providers of services, uncertainties concerning the availability of fuel at reasonable prices, the effects of energy conservation policies and other factors. Infrastructure companies and projects also may be affected by or subject to (i) regulation by various government authorities, including rate regulation; (ii) service interruption due to environmental, operational or other mishaps; (iii) the imposition of special tariffs and changes in tax laws, regulatory policies and accounting standards; and (iv) general changes in market sentiment towards infrastructure and utilities assets.

Short-Term Instruments

The Fund may invest in short-term money market instruments issued in the U.S. or abroad, denominated in U.S. dollars or any foreign currency. Short-term money market instruments include repurchase agreements, short-term fixed or variable rate certificates of deposit, time deposits with a maturity no greater than 180 days, bankers' acceptances, commercial paper rated A-1 by S&P or Prime-1 by Moody's or in similar other money market securities. Certificates of deposit represent an institution's obligation to repay funds deposited with it that earn a specified interest rate over a given period. Bankers' acceptances are negotiable obligations of a bank to pay a draft, which has been drawn by a customer, and are usually backed by goods in international trade. Time deposits are non-negotiable deposits with a banking institution that earn a specified interest rate over a given period. Certificates of deposit and time deposits generally may be withdrawn on demand by the Fund but may be subject to early withdrawal penalties that could reduce the Fund's performance.

The Fund may also invest in other high quality fixed income securities denominated in U.S. dollars, any foreign currency or in a multi-national currency unit (e.g. the European Currency Unit).

Risks of Debt Securities

General. Yields on debt securities, including municipal securities, are dependent on a variety of factors, including the general conditions of the debt securities markets, the size of a particular offering, the maturity of the obligation and the rating of the issue. Debt securities with longer maturities tend to produce higher yields and are generally subject to greater price movements than obligations with shorter maturities.

Debt securities may be subject to extension or prepayment risk, which refers to the change in total return on a security resulting from an extension or abbreviation of the security's maturity, respectively. If an issuer redeems the debt securities prior to final maturity, the Fund may have to replace these securities with lower yielding securities, which could result in a lower return. This is known as prepayment risk and is more likely occur in a falling interest rate environment. In a rising interest rate environment, prepayment on outstanding debt securities is less likely to occur. This is known as extension risk and may cause the value of debt securities to depreciate as a result of the higher market interest rates.

Issuers may prepay fixed rate debt securities when interest rates fall, forcing the Fund to invest in securities with lower interest rates. Issuers of debt securities are also subject to the provisions of bankruptcy, insolvency and other laws affecting the rights and remedies of creditors that may restrict the ability of the issuer to pay, when due, the principal of and interest on its debt securities. The possibility exists therefore, that, as a result of bankruptcy, litigation or other conditions, the ability of an issuer to pay, when due, the principal of and interest on its debt securities may become impaired.

Interest Rate Risk. The market value of the interest-bearing debt securities held by the Fund will be affected by changes in interest rates. There is normally an inverse relationship between the market value of securities sensitive to prevailing interest rates and actual changes in interest rates. The longer the remaining maturity (and duration) of a security, the more sensitive the security is to changes in interest rates. All debt securities, including U.S. Government Securities, can change in value when there is a change in interest rates. As a result, an investment in the Fund is subject to risk even if all debt securities in the Fund's investment portfolio are paid in full at maturity. In the past few years, the Board of Governors of the Federal Reserve System (the "Fed") has occasionally raised the "federal funds rate," and has also implemented reductions in the "federal funds rate." During periods of rising interest rates, the Fund is subject to heightened levels of interest rate risk. Over the past several years, the Fed has maintained the level of interest rates at or near historic lows, however, more recently, interest rates have begun to increase as a result of action that has been taken by the Fed which has raised, and may continue to raise, interest rates, which may negatively impact the Fund's performance or otherwise adversely impact the Fund. Interest rate increases may have sudden and unpredictable effects on the markets and the Fund's investments. Debt securities with longer durations tend to be more sensitive to changes in interest rates, often making them more volatile in response to interest rate changes than debt securities with shorter durations.

Credit Risk. Changes in the ability of an issuer to make payments of interest and principal and in the markets' perception of an issuer's creditworthiness will also affect the market value of that issuer's debt securities. The financial condition of an issuer of a debt security held by the Fund may cause it to default on interest or principal payments due on a security. This risk generally increases as security credit ratings fall.

To limit credit risk, the Fund may purchase unrated fixed income securities if, at the time of purchase, the Adviser believes that they are of comparable quality to rated securities that the Fund may purchase. It is anticipated that the average credit rating of the fixed income securities held by the Brown Advisory Total Return Fund will be "Aa" as per Moody's or "AA" as per S&P.

Moody's, S&P and other NRSROs are private services that provide ratings of the credit quality of debt obligations, including convertible securities. A description of the range of ratings assigned to various types of bonds and other securities by several NRSROs is included in Appendix A to this SAI. The Adviser may use these ratings to determine whether to purchase, sell or hold a security. Ratings are general and are not absolute standards of quality. Securities with the same maturity, interest rate and rating may have different market prices. If an issue of securities ceases to be rated or if its rating is reduced after it is purchased by the Fund, the Adviser will determine whether the Fund should continue to hold the obligation. Credit ratings attempt to evaluate the safety of principal and interest payments and do not evaluate the risks of fluctuations in market value. The rating of an issuer is a rating agency's view of potential developments related to the issuer and may not necessarily reflect actual outcomes. Also, rating agencies may fail to make timely changes in credit ratings. An issuer's current financial condition may be better or worse than a rating indicates. Unrated securities may not be as actively traded as rated securities. Because a downgrade often results in a reduction in the market price of the security, the sale of a downgraded security may result in a loss.

Credit ratings for debt securities provided by rating agencies evaluate the safety of principal and interest payments, not market value risk. The rating of an issuer is a rating agency's view of past and future potential developments related to the issuer and may not necessarily reflect actual outcomes. There can be a lag between the time of developments relating to an issuer and the time a rating is assigned and updated.

High Yield Debt or Junk Bond Securities. The Fund may invest in securities rated below investment grade; that is, rated at or below Ba by Moody's or BB by S&P, or the equivalent by any other NRSRO and may invest in securities rated as low as C by Moody's or D by S&P, or the equivalent by any other NRSRO. The Fund may invest in unrated debt securities determined by the Adviser to be of comparable quality or that is trading at a substantial discount to par value.

Foreign Debt Securities Risks. To the extent that the Fund invests in fixed income securities of companies located outside the United States, see the risks related to foreign securities set forth in the section entitled "Investment Policies and Risks – Equity Securities – Foreign Securities Risks" above.

Foreign Currencies Transactions

General

The Fund may temporarily hold funds in bank deposits in foreign currencies during the completion of investment programs and may conduct foreign currency exchange transactions either on a cash basis or at the rate prevailing in the foreign exchange market.

The Fund may enter into a forward foreign currency contract. A forward currency contract ("forward contract") involves an obligation to purchase or sell a specific amount of a specific currency at a future date, which may be any fixed number of days (usually less than one year) from the date of the contract agreed upon by the parties, at a price set at the time of the contract. At or before settlement of a forward currency contract, the Fund may either deliver the currency or terminate its contractual obligation to deliver the currency by purchasing an offsetting contract. If the Fund makes delivery of the foreign currency at or before the settlement of a forward contract, it may be required to obtain the currency through the conversion of assets of the Fund into the currency. The Fund may close out a forward contract obligating it to purchase currency by selling an offsetting contract, in which case, it will realize a gain or a loss.

Forward contracts are considered derivatives. The Fund enters into forward contracts in order to “lock in” the exchange rate between the currency it will deliver and the currency it will receive for the duration of the contract. In addition, the Fund may enter into forward contracts to hedge against risks arising from securities the Fund owns or anticipates purchasing, or the U.S. dollar value of interest and dividends paid on those securities. The Fund does not intend to enter into forward contracts on a regular or continuing basis and the Fund will not enter these contracts for speculative purposes.

Risks

Foreign currency transactions involve certain costs and risks. The Fund incurs foreign exchange expenses in converting assets from one currency to another. Forward contracts involve a risk of loss if the Adviser is inaccurate in its prediction of currency movements. The projection of short-term currency market movements is extremely difficult and the successful execution of a short-term hedging strategy is highly uncertain. The precise matching of forward contract amounts and the value of the securities involved is generally not possible. Accordingly, it may be necessary for the Fund to purchase additional foreign currency if the market value of the security is less than the amount of the foreign currency the Fund is obligated to deliver under the forward contract and the decision is made to sell the security and make delivery of the foreign currency. The use of forward contracts as a hedging technique does not eliminate fluctuations in the prices of the underlying securities the Fund owns or intends to acquire, but it does fix a rate of exchange in advance. Although forward contracts can reduce the risk of loss due to a decline in the value of the hedged currencies, they also limit any potential gain that might result from an increase in the value of the currencies. There is also the risk that the other party to the transaction may fail to deliver currency when due which may result in a loss to the Fund.

Leverage Transactions

General

The Fund may use leverage to increase potential returns. The Fund does not currently intend to use leverage in excess of 15% of total assets. Leverage involves special risks and may involve speculative investment techniques. Leverage exists when cash made available to the Fund through an investment technique is used to make additional Fund investments. Leverage transactions include borrowing for other than temporary or emergency purposes, lending portfolio securities, entering into reverse repurchase agreements, and purchasing securities on a when-issued, delayed delivery or forward commitment basis. The Fund uses these investment techniques only when the Adviser believes that the leveraging and the returns available to the Fund from investing the cash will provide investors with a potentially higher return. (See “Risks” below.)

Borrowing. The Fund may borrow money as a temporary measure for extraordinary or emergency purposes in amounts up to 33^{1/3}% of the Fund’s total assets at the time of borrowing. The Fund may invest in reverse repurchase agreements for other than temporary or emergency purposes, but such investments in reverse repurchase agreements are limited to 33^{1/3}% of the Fund’s total assets at the time of investments. Entering into reverse repurchase agreements and purchasing securities on a when-issued, delayed delivery or forward delivery basis may be limited by collateral requirements to cover these positions, as disclosed below under “Reverse Repurchase Agreements.”

Senior Securities. Pursuant to Section 18(f)(1) of the 1940 Act, the Fund may not issue any class of senior security or sell any senior security of which it is the issuer, except that the Fund shall be permitted to borrow from any bank so long as immediately after such borrowings, there is an asset coverage of at least 300% and that in the event such asset coverage falls below this percentage, the Fund shall reduce the amount of its borrowings, within 3 days, excluding holidays and Sundays, to an extent that the asset coverage shall be at least 300%. In accordance with

Section 18 of the 1940 Act, the Fund will not mortgage, pledge or hypothecate its assets in an amount exceeding 33^{1/3}% of the value of its total assets.

Securities Lending. The Fund may lend portfolio securities in an amount up to 33^{1/3}% of its total assets to brokers, dealers and other financial institutions.

In a portfolio securities lending transaction, the Fund receives from the borrower an amount equal to the interest paid or the dividends declared on the loaned securities during the term of the loan as well as the interest on the collateral securities, less any fees (such as finders or administrative fees) the Fund pays in arranging the loan. The Fund may share the interest it receives on the collateral securities with the borrower. The terms of the Fund's loans permit the Fund to reacquire loaned securities on five business days' notice or in time to vote on any important matter. Loans are subject to termination at the option of the Fund or the borrower at any time, and the borrowed securities must be returned when the loan is terminated. The Fund may pay fees to arrange for securities loans.

The SEC currently requires that the following conditions must be met whenever a Fund's portfolio securities are loaned: (1) the Fund must receive at least 100% cash collateral from the borrower; (2) the borrower must increase such collateral whenever the market value of the securities rises above the level of such collateral; (3) the Fund must be able to terminate the loan at any time; (4) the Fund must receive reasonable interest on the loan, as well as any dividends, interest or other distributions on the loaned securities, and any increase in market value; (5) the Fund may pay only reasonable custodian fees approved by the Board in connection with the loan; (6) while voting rights on the loaned securities may pass to the borrower, the Board must terminate the loan and regain the right to vote the securities if a material event adversely affecting the investment occurs, and (7) the Fund may not loan its portfolio securities so that the value of the loaned securities is more than one-third of its total asset value, including collateral received from such loans. These conditions may be subject to future modification. Such loans will be terminable at any time upon specified notice. The Fund might experience the risk of loss if the institution with which it has engaged in a portfolio loan transaction breaches its agreement with the Fund. In addition, the Fund will not enter into any portfolio security lending arrangement having a duration of longer than one year. The principal risk of portfolio lending is potential default or insolvency of the borrower. In either of these cases, the Fund could experience delays in recovering securities or collateral or could lose all or part of the value of the loaned securities. All of the collateral received in connection with securities lending transactions is held as cash or cash equivalents or in the form received from the borrower (if securities) or invested in other funds that are managed in accordance with the investment restrictions of Rule 2a-7 under the 1940 Act. In addition, all investments made with the collateral received are subject to the risks associated with such investments. If such investments lose value, the Fund will have to cover the loss when repaying the collateral.

Any loans of portfolio securities are fully collateralized based on values that are marked-to-market daily. Any securities that the Fund may receive as collateral will not become part of the Fund's investment portfolio at the time of the loan and, in the event of a default by the borrower, the Fund will, if permitted by law, dispose of such collateral except for such part thereof that is a security in which the Fund is permitted to invest. During the time securities are on loan, the borrower will pay the Fund any accrued income on those securities, and the Fund may invest the cash collateral and earn income or receive an agreed-upon fee from a borrower that has delivered cash-equivalent collateral.

Reverse Repurchase Agreements. The Fund may enter into reverse repurchase agreements which are transactions in which the Fund sells a security and simultaneously agrees to repurchase that security from the seller at an agreed upon price on an agreed upon future date, normally, one to seven days later. Such reverse repurchase agreements would represent no more than 15% of the Fund's assets.

Reverse repurchase agreements involve the risk that the market value of securities retained in lieu of sale by the Fund may decline below the price of the securities the Fund has sold but is obliged to repurchase. If the buyer of securities under a reverse repurchase agreement files for bankruptcy or becomes insolvent, such buyer or its trustee or receiver may receive an extension of time to determine whether to enforce the Fund's obligation to repurchase the securities. During that time, the Fund's use of the proceeds of the reverse repurchase agreement effectively may be restricted.

When-Issued Securities and Forward Commitments. The Fund may invest in securities offered on a "when-issued" and "forward commitment" basis (including a delayed delivery basis). Securities purchased on a "when-issued" or "forward commitment basis" are securities not available for immediate delivery despite the fact that a market exists for those securities. A purchase is made on a "delayed delivery" basis when the transaction is structured to occur sometime in the future.

When these transactions are negotiated, the price, which is generally expressed in yield terms, is fixed at the time the commitment is made, but delivery and payment for the securities take place at a later date. Normally, the settlement date occurs within two months after the transaction, but delayed settlements beyond two months may be negotiated. During the period between a commitment and settlement, no payment is made for the securities purchased by the purchaser and, thus, no interest accrues to the purchaser from the transaction. At the time the Fund makes the commitment to purchase securities on a when-issued basis or forward commitment, the Fund will record the transaction as a purchase and thereafter reflect the value each day of such securities in determining its NAV. No when-issued or forward commitments will be made by the Fund if, as a result, more than 25% of the Fund's total assets would be committed to such transactions.

Risks

Leverage creates the risk of magnified capital losses. Leverage may involve the creation of a liability that requires the Fund to pay interest (for instance, reverse repurchase agreements) or the creation of a liability that does not entail any interest costs (for instance, forward commitment costs).

The risks of leverage include a higher volatility of the NAV of the Fund's securities which may be magnified by favorable or adverse market movements or changes in the cost of cash obtained by leveraging and the yield from invested cash. So long as the Fund is able to realize a net return on its investment portfolio that is higher than interest expense incurred, if any, leverage will result in higher current net investment income for the Fund than if the Fund were not leveraged. Changes in interest rates and related economic factors could cause the relationship between the cost of leveraging and the yield to change so that rates involved in the leveraging arrangement may substantially increase relative to the yield on the obligations in which the proceeds of the leveraging have been invested. To the extent that the interest expense involved in leveraging approaches the net return on the Fund's investment portfolio, the benefit of leveraging will be reduced, and, if the interest expense incurred as a result of leveraging on borrowings were to exceed the net return to investors, the Fund's use of leverage would result in a lower rate of return than if the Fund were not leveraged. In an extreme case, if the Fund's current investment income were not sufficient to meet the interest expense of leveraging, it could be necessary for the Fund to liquidate certain of its investments at an inappropriate time.

Repurchase Agreements

General

The Fund may enter into repurchase agreements which are transactions in which the Fund purchases a security and simultaneously agrees to resell that security to the seller at an agreed upon price on an agreed upon future date, normally, one to seven days later. If the Fund enters into a repurchase agreement, it will maintain possession of the purchased securities and any underlying collateral. For purposes of the 1940 Act, a repurchase agreement is deemed to be a loan from the Fund to the seller of the security subject to the repurchase agreement. Repurchase agreements are not considered to be the making of loans for purposes of the Fund's fundamental investment limitations.

Risks

Repurchase transactions also involve credit risk. Credit risk is the risk that a counterparty to a transaction will be unable to honor its financial obligation. In the event that bankruptcy, insolvency or similar proceedings are commenced against a counterparty, the Fund may have difficulties in exercising its rights to the underlying securities or currencies, as applicable. The Fund may incur costs and expensive time delays in disposing of the underlying securities and it may suffer a loss of principal or a decline in interest payments regarding affected securities. Failure by the other party to deliver a security or currency purchased by the Fund may result in a missed opportunity to make an alternative investment. Certain repurchase agreements that the Fund may enter into may or may not be subject to an automatic stay in bankruptcy proceedings. Favorable insolvency laws that allow the Fund, among other things, to liquidate the collateral held in the event of the bankruptcy of the counterparty reduce counterparty insolvency risk.

Real Estate Investment Trusts

The Fund may invest in real estate investment trusts ("REITs"). Equity REITs invest directly in real property while mortgage REITs invest in mortgages on real property. REITs may be subject to certain risks associated with the direct ownership of real estate, including declines in the value of real estate, risks related to general and local economic conditions, overbuilding and increased competition, increases in property taxes and operating expenses and variations in rental income. To the extent the Fund invests in REITs, the Fund will also be subject to risks associated with extended vacancies of properties or defaults by borrowers or tenants, particularly during periods of disruptions to business operations or an economic downturn. REITs pay dividends to their shareholders based upon available funds from operations. It is quite common for these dividends to exceed a REIT's taxable earnings and profits, resulting in the excess portion of such dividends being designated as a return of capital. The Fund intends to include the gross dividends from such REITs in its distribution to its shareholders and, accordingly, a portion of the Fund's distributions may also be designated as a return of capital.

Changing Fixed Income Market Conditions

Because the Fed has begun, and may continue, to raise the federal funds rate, there is a risk that interest rates across the U.S. financial system will continue to rise. These policy changes may expose the market for debt instruments and related markets to heightened volatility and may reduce liquidity for certain Fund investments, which could cause the value of the Fund's investments and share price to decline. Because the Fund may invest in derivatives tied to fixed income markets the Fund may be more substantially exposed to these risks than a fund that does not invest in derivatives. To the extent that the Fund experiences high redemptions because of these policy changes, the Fund may experience increased portfolio turnover, which will increase the costs that the Fund incurs and may lower the Fund's performance. The liquidity levels of the Fund's portfolio may also be affected.

Bond markets have consistently grown over the past three decades while the capacity for traditional dealer counterparties to engage in fixed income trading has not kept pace and in some cases has decreased. As a result, dealer inventories of corporate bonds, which provide a core indication of the ability of financial intermediaries to “make markets,” are at or near historic lows in relation to market size. Because market makers provide stability to a market through their intermediary services, the significant reduction in dealer inventories could potentially lead to decreased liquidity and increased volatility in the fixed income markets. Such issues may be exacerbated during periods of economic uncertainty.

Temporary Defensive Position

Under normal circumstances, the Fund may have money received from the purchase of Fund shares, or money received on the sale of its portfolio securities for which suitable investments consistent with such Fund’s investment objectives are not immediately available. Under these circumstances, the Fund may have such monies invested in cash or cash equivalents in order to earn income on this portion of its assets. Cash equivalents include investments such as short-term U.S. Government Securities, commercial paper, bankers’ acceptances, certificates of deposit, interest-bearing savings deposits of commercial banks, repurchase agreements concerning securities in which the Fund may invest and money market mutual funds.

In addition, the Fund may reduce its holdings in equity and other securities and may invest in cash, prime quality cash equivalents such as prime commercial paper and other money market instruments, for temporary defensive purposes, during periods in which the Adviser believes changes in economic, financial or political conditions make it advisable. Prime quality instruments are those instruments that are rated in one of the two highest short-term rating categories by an NRSRO or, if not rated, determined by the Adviser to be of comparable quality.

Cyber Security Risk

As technology becomes more integrated into the Fund’s operations, the Fund will face greater operational risks through breaches in cyber security. A breach in cyber security refers to both intentional and unintentional events that may cause the Fund to lose proprietary information, suffer data corruption, or lose operational capacity. This in turn could cause the Fund to incur regulatory penalties, reputational damage, additional compliance costs associated with corrective measures, and/or financial loss. Cyber security threats may result from unauthorized access to the Fund’s digital information systems (e.g., through “hacking” or malicious software coding), but may also result from outside attacks such as denial-of-service attacks (i.e., efforts to make network services unavailable to intended users). In addition, because the Fund works closely with third-party service providers (e.g., administrators, transfer agents, and custodians), cyber security breaches at such third-party service providers may subject the Fund to many of the same risks associated with direct cyber security breaches. The Fund may experience investment losses in the event of cyber security breaches at any of the issuers in which the Fund may invest. While the Fund has established risk management systems designed to reduce the risks associated with cyber security, there can be no assurance that such measures will succeed.

Pandemic Risk

Disease outbreaks that affect local economies or the global economy may materially and adversely impact the Fund and/or the Adviser’s business. For example, uncertainties regarding the novel Coronavirus (“COVID-19”) outbreak have resulted in serious economic disruptions across the globe. These types of outbreaks can be expected to cause severe decreases in core business activities such as manufacturing, purchasing, tourism, business conferences and workplace participation, among others. These disruptions lead to instability in the market place, including stock market losses and overall volatility, as has occurred in connection with COVID-19. In the face of such instability,

governments may take extreme and unpredictable measures to combat the spread of disease and mitigate the resulting market disruptions and losses. The Adviser has in place business continuity plans reasonably designed to ensure that they maintain normal business operations, and they periodically test those plans. However, in the event of a pandemic or an outbreak, there can be no assurance that the Adviser, or the Fund's service providers will be able to maintain normal business operations for an extended period of time or will not lose the services of key personnel on a temporary or long-term basis due to illness or other reasons. Although vaccines for COVID-19 are becoming more widely available, the full impacts of a pandemic or disease outbreaks are unknown and the pace of recovery may vary from market to market, resulting in a high degree of uncertainty for potentially extended periods of time.

INVESTMENT LIMITATIONS

For purposes of all investment policies of the Fund: (1) the term "1940 Act" includes the rules thereunder, SEC interpretations and any exemptive order upon which the Fund may rely; and (2) the term "Code" includes the rules thereunder, IRS interpretations and any private letter ruling or similar authority upon which the Fund may rely.

The Fund has adopted the following policies and investment restrictions as fundamental policies (unless otherwise noted), which may not be changed without the affirmative vote of the holders of a "majority" of the outstanding voting securities of the Fund. Under the 1940 Act, the "vote of the holders of a majority of the outstanding voting securities" means the vote of the holders of the lesser of (i) 67% of the shares of the Fund represented at a meeting at which the holders of more than 50% of the Fund's outstanding shares are represented or (ii) more than 50% of the outstanding shares of the Fund.

Except with respect to borrowing, if a percentage or rating restriction on investment or use of assets set forth herein or in the Prospectus is adhered to at the time a transaction is effected, later changes in the percentage or rating resulting from any cause other than actions by the Fund will not be considered a violation of the Fund's investment restrictions. If the value of the Fund's holdings of illiquid securities at any time exceeds the percentage limitation applicable due to subsequent fluctuations in value or other reasons, the Board will consider what actions, if any, are appropriate to maintain adequate liquidity.

Fundamental Limitations

The Fund has adopted the following investment limitations that cannot be changed by the Board without shareholder approval.

1. Borrowing Money

The Fund may not borrow money if, as a result, outstanding borrowings would exceed an amount equal to 33^{1/3}% of the Fund's total assets.

2. Concentration

The Fund may not purchase a security if, as a result, more than 25% of the Fund's total assets would be invested in securities of issuers conducting their principal business activities in the same industry. For purposes of this limitation, there is no limit on: (1) investments in U.S. government securities, in repurchase agreements covering U.S. government securities, in tax-exempt securities issued by the states, territories or possessions of the United States ("municipal securities") or in foreign government securities; or (2) investments in issuers domiciled in a single jurisdiction. Notwithstanding anything to the contrary, to the extent permitted by the 1940 Act, the Fund may

invest in one or more investment companies; provided that, except to the extent the Fund invests in other investment companies pursuant to Section 12(d)(1)(A) or (F) of the 1940 Act, the Fund treats the assets of the investment companies in which it invests as its own for purposes of this policy.

3. Diversification

With respect to 75% of the Fund's total assets, the Fund may not purchase the securities of any issuer (other than securities issued or guaranteed by the U.S. government or any of its agencies or instrumentalities, or, to the extent permitted by the 1940 Act, the rules and regulations thereunder and any applicable exemptive relief, securities of other investment companies) if, as a result, (1) more than 5% of the Fund's total assets would be invested in the securities of that issuer; or (2) the Fund would hold more than 10% of the outstanding voting securities of that issuer.

The District of Columbia, each state and territory, each political subdivision, agency, instrumentality and authority thereof, and each multi-state agency of which the District of Columbia, a state or territory is a member is deemed to be a separate "issuer." When the assets and revenues of an agency, authority, instrumentality or other political subdivision are separate from the government creating the subdivision and the security is backed only by the assets and revenues of the subdivision, such subdivision is treated as the issuer. Similarly, in the case of private activity bonds, if the bond is backed only by the assets and revenues of the non-governmental user, then the non-governmental user is treated as the issuer. If in either case, however, the creating government or some other agency guarantees a security, that guarantee is considered a separate security and is treated as an issue of such government or other agency.

4. Underwriting Activities

The Fund may not underwrite securities issued by others, except to the extent that the Fund may be considered an underwriter within the meaning of the Securities Act of 1933 in the disposition of restricted securities or in connection with investments in other investment companies.

5. Making Loans

The Fund may not make loans to other parties. For purposes of this limitation, entering into repurchase agreements, lending securities and acquiring any debt security are not deemed to be the making of loans.

6. Purchases and Sales of Real Estate

The Fund may not purchase or sell real estate, except that, to the extent permitted by law, the Fund may (a) invest in securities or other instruments directly or indirectly secured by real estate, and (b) invest in securities or other instruments issued by issuers that invest in real estate.

7. Purchases and Sales of Commodities

The Fund may not purchase or sell commodities or commodity contracts unless acquired as a result of ownership of securities or other instruments issued by persons that purchase or sell commodities or commodity contracts; but this shall not prevent the Fund from purchasing, selling and entering into financial futures contracts (including futures contracts on indices of securities, interest rates and currencies), options on financial futures contracts (including futures contracts on indices of securities, interest rates and currencies), warrants, swaps, forward

contracts, foreign currency spot and forward contracts or other derivative instruments that are not related to physical commodities.

8. Issuance of Senior Securities

The Fund may not issue senior securities except pursuant to Section 18 of the 1940 Act, the rules and regulations thereunder, and any applicable exemptive or interpretive relief.

With respect to Fundamental Limitation #2, the Fund will limit investments in foreign government securities to no more than 25% of the Fund's total assets.

MANAGEMENT

Trustees and Executive Officers

The Board is responsible for the overall management of the Trust, including general supervision and review of the investment activities of the Fund managed by the Adviser. The Board, in turn, elects the Officers of the Trust, who are responsible for administering the day-to-day operations of the Trust and the Fund. The current Trustees and Officers of the Trust, their ages and positions with the Trust, term of office with the Trust and length of time served, their principal occupations for the past five years and other directorships held during the past five years are set forth in the following table.

Name, Address And Age	Position with the Trust	Term of Office and Length of Time Served	Principal Occupation(s) During Past 5 Years	Number of Portfolios in Fund Complex Overseen by Trustees	Other Directorships Held During the Past 5 Years ⁽²⁾
Independent Trustees of the Trust⁽¹⁾

- (1) The Trustees of the Trust who are not “interested persons” of the Trust as defined in the 1940 Act (“Independent Trustees”).
- (2) The directorships disclosed in this column include only the directorships of those companies that a Trustee serves on that are required to report to the SEC under applicable Federal securities laws including publicly traded corporations that are registered with the SEC under the 1934 Act and investment companies that are registered with the SEC under the 1940 Act, and it therefore excludes various other types of directorships that the Trustees of the Trust may currently hold in other types of organizations, including private companies and not-for-profit organizations, which are expressly excluded from the disclosure requirements for mutual fund board members.
- (3) Mr. Hankin is considered an “interested person” of the Trust, as defined in the 1940 Act, because of his current position with Brown Advisory Incorporated, the parent company of the Adviser, and Mr. Hardiman has been deemed by the Board to be an “interested person” of the Trust, as defined in the 1940 Act, because of his previous position with Brown Advisory Incorporated.

Additional Information Concerning the Board of Trustees

The Role of the Board

The Board oversees the management and operations of the Trust. Like all mutual funds, the day-to-day management and operation of the Trust is the responsibility of the various service providers to the Trust, such as the Adviser, the Distributor, the Administrator, the Custodian and the Transfer Agent, each of whom are discussed in greater detail in this Statement of Additional Information. The Board has appointed various senior employees of the Adviser and Administrator as officers of the Trust, with responsibility to monitor and report to the Board on the Trust’s operations. In conducting this oversight, the Board receives regular reports from these officers and the service providers. For example, the Treasurer reports as to financial reporting matters. In addition, the Adviser provides regular reports on the investment strategy and performance of the Fund. The Board has appointed a Chief Compliance Officer who administers the Trust’s compliance program and regularly reports to the Board as to compliance matters. These reports are provided as part of the Board’s regular quarterly Board Meetings, which are typically held quarterly, in person, and involve the Board’s review of recent operations.

Board Structure, Leadership

The Board has structured itself in a manner that it believes allows it to perform its oversight function effectively. It has established four standing committees – (1) an Audit Committee; (2) a Nominating and Corporate Governance Committee; (3) a Compliance Oversight Committee; and (4) a Valuation Committee – which are discussed in greater detail below under “Trust Committees.” At least a majority of the Board is comprised of Independent Trustees who are not affiliated with the Adviser, the principal underwriter, or their affiliates. The Nominating and Corporate Governance Committee, Audit Committee and Compliance Oversight Committee are each comprised entirely of Independent Trustees.

Except for any duties specified herein or pursuant to the Trust’s Declaration of Trust and By-Laws, the designation of Chairman for Mr. Hardiman, and the designation of Lead Independent Trustee for Mr. Hopkins, does not impose any duties, obligations or liabilities that are greater than the duties, obligations or liabilities imposed on each such person as a member of the Board. Mr. Hardiman is an interested person of the Trust (as such term is defined in the 1940 Act) based upon his former status as a member of the Board of Directors of Brown Advisory Incorporated, the parent company of the Adviser. The Board has taken into consideration the fact that Mr. Hardiman is an interested person of the Trust with respect to their selection of Mr. Hardiman to serve as the Chairman of the Board of the Trust and the Board of Trustees has determined that the use of an interested person as Chairman is appropriate and benefits shareholders because an interested Chairman has a personal as well as a professional stake in the management of the Trust. As noted, the majority of the Board is comprised of Independent Trustees and the Board believes that maintaining a Board that has a majority of Independent Trustees allows the Board to operate in a manner that provides for an appropriate level of independent oversight and action. In accordance with applicable regulations regarding the governance of the Trust, the Independent Trustees meet in a separate quarterly session in conjunction with each quarterly meeting of the Board during which they review matters relating to their independent oversight of the Trust. In addition, each of the Board committees is comprised entirely of Independent Trustees and the Chair of each of the Board committees is an Independent Trustee. Furthermore, Mr. Hopkins serves as Lead Independent Trustee of the Board. In his role as Lead Independent Trustee, Mr. Hopkins acts as the key liaison with the Adviser to ensure that the interests of the Independent Trustees are taken into consideration in connection with the ongoing management and operation of the Fund. Specifically, Mr. Hopkins reviews and approves the agenda for each Board meeting, facilitates communications between the Independent Trustees and the Adviser, chairs the separate quarterly sessions of the Independent Trustees and presides at meetings of the Board at which the Chairman of the Board is not present, among other duties. This permits the Independent Trustees to have a greater role in the leadership of the Fund. Finally, the Independent Trustees have determined that because they comprise a majority of the Board and because they have designated a Lead Independent Trustee, they can act independently and effectively without having an Independent Trustee serving as Chairman of the Board.

The Board reviews annually the structure and operation of the Board and its committees. The Board has determined that the composition of the Board and the function and composition of its various committees provide the appropriate means and communication channels to address any potential conflicts of interest that may arise.

Board Oversight of Risk Management

As part of its oversight function, the Board of Trustees receives and reviews various risk management reports and discusses these matters with appropriate management and other personnel. Because risk management is a broad concept comprised of many elements (e.g., investment risk, issuer and counterparty risk, compliance risk, operational risks, business continuity risks, etc.), the oversight of different types of risks is handled in different ways. For example, the Audit Committee meets with the Treasurer and the Trust’s independent registered public accounting firm to discuss, among other things, the internal control structure of the Trust’s financial reporting

function. The Board meets regularly with the Chief Compliance Officer to discuss compliance and operational risks and how they are managed. The Board also receives reports from the Adviser as to investment risks of the Fund.

Information about Each Trustee's Qualification, Experience, Attributes or Skills

The Board believes that each of the Trustees has the qualifications, experience, attributes and skills ("Trustee Attributes") appropriate to their continued service as Trustees of the Trust in light of the Trust's business and structure. In addition to a demonstrated record of business and/or professional accomplishment, each of the Trustees has demonstrated a commitment to discharging their oversight duties as trustees in the interests of shareholders. The Board annually conducts a "self-assessment" wherein the effectiveness of the Board is reviewed.

In addition to the information provided in the chart above, below is certain additional information concerning each particular Trustee and his/her Trustee Attributes.

Mr. Hankin's Trustee Attributes. As President and Chief Executive Officer of Brown Advisory Incorporated, the ultimate parent of the Adviser, Mr. Hankin is ultimately responsible for the management of the Fund's day-to-day operations. Mr. Hankin has spent over 20 years assisting a wide range of individuals and institutions on their investment and financial matters. Mr. Hankin also currently serves on the board of Stanley Black & Decker, Inc. an industrial tool and hardware company. Prior to working in the investment management industry, Mr. Hankin was a Partner with the law firm of Piper & Marbury LLP (now DLA Piper US LLP). The Board believes that Mr. Hankin's experience, qualifications, attributes and skills on an individual basis and in combination with those of the other Trustees lead to the conclusion that he possesses the requisite skills and attributes as a Trustee to carry out oversight responsibilities with respect to the Trust.

Mr. Hardiman's Trustee Attributes. Mr. Hardiman brings extensive financial, regulatory, broker-dealer, compliance and leadership experience to the Board having served as a President and Chief Executive Officer of the National Association of Securities Dealers, Inc. and the NASDAQ Stock Market. Mr. Hardiman has expertise in investment banking, capital markets and securities distribution from, among other things, his tenure with Alex. Brown & Sons and Soundview Technology Group, and he has extensive knowledge of the investment management business through his work on the boards of the DWS Scudder Funds and ISI Funds. Mr. Hardiman also has served as a member of the Board of Directors of Brown Investment Advisory & Trust Company, an affiliate of the Adviser and Brown Advisory Incorporated, the ultimate parent of the Adviser, as well as on the Board of Franklin Resources, Inc., a publicly traded investment management firm. Mr. Hardiman's experience, qualifications, attributes and skills on an individual basis and in combination with those of the other Trustees lead to the conclusion that he possesses the requisite skills and attributes as a Trustee to carry out oversight responsibilities with respect to the Trust.

Mr. Hopkins' Trustee Attributes. Mr. Hopkins brings over 35 years of prior legal experience in the mutual fund industry. In particular, Mr. Hopkins served as a legal counsel with T. Rowe Price Associates, Inc., a publicly traded investment management firm, from 1972 until 2008, where he held the position of Vice President and Chief Legal Counsel from 1998 until 2008, and Mr. Hopkins served as Chair of the firm's Ethics Committee for 35 years. During that time, he also served in various capacities and on various committees for the Investment Company Institute, the primary mutual fund trade association and the Investment Adviser Association, the primary investment adviser trade association. Mr. Hopkins is the former Chairman of ICI Mutual Insurance Company, the captive insurance company for the mutual fund industry. Since May 2015, Mr. Hopkins also serves as Lead Independent Trustee. The Board believes Mr. Hopkins' experience, qualifications, attributes and skills on an individual basis and in combination with those of the other Trustees lead to the conclusion that he possesses the requisite skills and attributes as a Trustee to carry out oversight responsibilities with respect to the Trust.

Ms. Kiser's Trustee Attributes. Ms. Kiser has senior executive experience in the investment management industry through her current experience as an Operating Executive, and previously as a Managing Director and the Chief Information Officer, at The Carlyle Group, an investment management firm. In addition, prior to joining The Carlyle Group, Ms. Kiser served in various executive positions at T. Rowe Price Associates, Inc., another investment management firm, including serving most recently as Vice President and Head of Enterprise Solutions and Capabilities within the Services and Technology Organization. Ms. Kiser also currently serves as a director of several corporations, including for Aflac Inc. (a global insurance company), Jacobs Engineering Group Inc. (a technical professional and consulting services firm), NCR Corporation (an enterprise technology provider) and Adtalem Global Education Inc. (a workforce solutions provider). The Board believes Ms. Kiser's qualifications, attributes and skills and diverse experiences on an individual basis and in combination with those of the other Trustees lead to the conclusion that she possesses the requisite skills and attributes as a Trustee to carry out oversight responsibilities with respect to the Trust.

Ms. Legg's Trustee Attributes. Ms. Legg has senior executive experience in the investment management industry through her experience as the former President and Chief Executive Officer of Legg Mason Capital Management ("LMCM"), an investment management firm. Prior to joining LMCM, Ms. Legg was a securities analyst with Alex. Brown & Sons, an investment banking firm. In total, Ms. Legg has more than 30 years of professional experience in the investment management and investment banking industries. Ms. Legg previously served as a director of BrightSphere Investment Group plc, an asset management holding company, and as a director of Sun Trust Banks, Inc., a bank holding company, and Eastman Kodak Co., a printing equipment and supplies company. The Board believes Ms. Legg's experience, qualifications, attributes and skills on an individual basis and in combination with those of the other Trustees lead to the conclusion that she possesses the requisite skills and attributes as a Trustee to carry out oversight responsibilities with respect to the Trust.

Mr. O'Neil's Trustee Attributes. Mr. O'Neil currently serves as Managing Director of Berkeley Research Group, a global management consulting firm serving multiple industries and markets, which he joined in 2021, and he also serves as a governance and compliance adviser and is a member of the boards of various private companies. Prior to January 2020, Mr. O'Neil served as the Global Chief Compliance Officer of Cigna Corporation, a health services company. Previously, Mr. O'Neil was the Founder and President of The Saranac Group LLC, a strategic consulting firm that advised boards of directors, board committees and senior management in the areas of business ethics, corporate crises, governance and compliance, resolutions of complex government controversies and monitoring. Prior to founding The Saranac Group LLC, Mr. O'Neil served in various senior management positions at WellCare Health Plans, Inc. and as a Partner and Joint Global Practice Group Leader at the international law firm DLA Piper US LLP. The Board believes Mr. O'Neil's experience, qualifications, attributes and skills on an individual basis and in combination with those of the other Trustees lead to the conclusion that he possesses the requisite skills and attributes as a Trustee to carry out oversight responsibilities with respect to the Trust.

Mr. Triplett's Trustee Attributes. Mr. Triplett is the President of DUMAC, Inc. ("DUMAC"), a professionally-staffed investment management organization controlled by Duke University that manages the school's endowment funds. He joined DUMAC in July 1999 and he was appointed President in January 2007. Since joining DUMAC Mr. Triplett has been directly involved with managing securities. Prior to completing business school, Mr. Triplett was a credit officer for the corporate and real estate portfolios at Wachovia Bank. Mr. Triplett holds the Chartered Financial Analyst designation. The Board believes Mr. Triplett's experience, qualifications, attributes and skills on an individual basis and in combination with those of the other Trustees lead to the conclusion that he possesses the requisite skills and attributes as a Trustee to carry out oversight responsibilities with respect to the Trust.

Trust Committees

The Trust has four standing committees: (1) the Audit Committee; (2) the Nominating and Corporate Governance Committee; (3) the Compliance Oversight Committee; and (4) the Valuation Committee.

The Audit Committee is comprised of all of the Independent Trustees. The function of the Audit Committee is to review the scope and results of the annual audit of the Fund and any matters bearing on the audit or the Fund's financial statements and to ensure the integrity of the Fund's financial reporting. The Audit Committee also recommends to the Board of Trustees the annual selection of the independent registered public accounting firm for the Fund's and it reviews and pre-approves audit and certain non-audit services to be provided by the independent registered public accounting firm. During the fiscal year ended June 30, 2022, the Audit Committee met five times.

The Nominating and Corporate Governance Committee, comprised of all the Independent Trustees, is responsible for seeking and reviewing candidates for consideration as nominees for Trustees and overseeing Board governance matters. Although the Nominating and Corporate Governance Committee does not have a policy with respect to the consideration of candidates for Trustee submitted by shareholders, if the Nominating and Corporate Governance Committee determined that it would be in the best interests of the Trust to fill a vacancy on the Board of Trustees, and a shareholder submitted a candidate for consideration by the Board of Trustees to fill the vacancy, the Nominating and Corporate Governance Committee would evaluate that candidate in the same manner as it evaluates nominees identified by the Nominating and Corporate Governance Committee. Nominee recommendations may be submitted to the Secretary of the Trust at the Trust's principal business address. The Committee meets on an as needed basis. During the fiscal year ended June 30, 2022, the Nominating and Corporate Governance Committee met five times.

The function of the Compliance Oversight Committee is to review and monitor compliance matters relating to the Fund's and to oversee the functions of the Fund's compliance program. The Committee meets on an as-needed basis. During the fiscal year ended June 30, 2022, the Compliance Oversight Committee met two times.

The Valuation Committee includes all of the Independent Trustees. The function of the Valuation Committee is to review quarterly reports from the Adviser, as the Funds' valuation designee pursuant to Rule 2a-5 under the 1940 Act, pursuant to the procedures used by the Adviser to value securities held by any of the Funds for which current and reliable market quotations are not "readily available" (as defined by Rule 2a-5 under the 1940 Act). The actions of the Valuation Committee are subsequently reviewed and ratified by the Board. The Valuation Committee meets quarterly and also on an as needed basis when deemed necessary. During the fiscal year ended June 30, 2022, the Valuation Committee met four times.

The Board has designated the Adviser as the Funds' valuation designee pursuant to Rule 2a-5 under the 1940 Act and has delegated fair value determinations to the Adviser, subject to the supervision of the Board. The Adviser, as the valuation designee, is responsible for periodically assessing any material risks associated with the determination of the fair value of a Fund's investments, establishing and applying fair value methodologies, testing the appropriateness of fair value methodologies and overseeing and evaluating third-party pricing services. The Adviser has a pricing committee which assists with its designated responsibilities as valuation designee.

Trustee Ownership of Fund Shares and Other Interests

As the Fund had not commenced operations prior to the date of this SAI, none of the Trustees beneficially own shares of the Fund. The following table shows the aggregate dollar range of equity securities in all registered investment companies overseen by the Trustees in the family of investment companies owned by the Trustees as of

December 31, 2022 using the following ranges: None, \$1-\$10,000, \$10,001-\$50,000, \$50,001-\$100,000, and Over \$100,000.

Name of Fund ⁽¹⁾	Joseph R. Hardiman Interested Trustee	Michael D. Hankin Interested Trustee	Henry H. Hopkins Independent Trustee	Georgette D. Kiser Independent Trustee	Kyle Prechtl Legg Independent Trustee	Thomas F. O'Neil III Independent Trustee	Neal F. Triplett Independent Trustee
Aggregate Dollar Range of Equity Securities in All Registered Investment Companies Overseen by Trustee in Family of Investment Companies	Over \$100,000	Over \$100,000	Over \$100,000	Over \$100,000	Over \$100,000	Over \$100,000	Over \$100,000

⁽¹⁾ Beneficial ownership is determined in accordance with Rule 16a-1(a)(2) under the Securities Exchange Act of 1934, as amended.

Neither the Independent Trustees nor members of their immediate family, own securities beneficially or of record in the Adviser, the Fund's principal underwriter, or any of their affiliates. Accordingly, during the two most recently completed calendar years, neither the Independent Trustees nor members of their immediate family, have had a direct or indirect interest, the value of which exceeds \$120,000, in the Adviser, the Trust's principal underwriter or any of its affiliates.

Compensation

Effective January 1, 2022, Trustees who are not employees of the Adviser receive a retainer fee of \$120,000 per year and \$6,000 for each meeting attended, as well as reimbursement for reasonable expenses incurred in connection with attendance at meetings (prior to January 1, 2022, the retainer was \$90,000 per year). In addition, the Board Chair, the Audit Committee Chair, the Nominating and Corporate Governance Committee Chair, the Valuation Committee Chair and the Compliance Oversight Committee Chair receive additional annual compensation of \$15,000, \$12,500, \$10,000, \$10,000 and \$10,000, respectively. Furthermore, the Lead Independent Trustee receives additional annual compensation of \$12,500. No other compensation or retirement benefits are received by any Trustee or officer from the Funds. The following compensation figures represent compensation for the fiscal year ended June 30, 2022 for each of the Trustees:

Name of Person/Position	Aggregate Compensation from the Funds ⁽¹⁾	Pension or Retirement Benefits Accrued as Part of Fund Expenses	Estimated Annual Benefits Upon Retirement	Total Compensation from the Funds and Fund Complex ⁽²⁾ Paid to Trustees
Henry H. Hopkins, Trustee	\$151,500	\$0	\$0	\$151,500
Georgette D. Kiser, Trustee ⁽³⁾	\$72,000	\$0	\$0	\$72,000
Kyle Prechtl Legg, Trustee	\$141,500	\$0	\$0	\$141,500
Thomas F. O'Neil III, Trustee	\$139,000	\$0	\$0	\$139,000
Neal F. Triplett, Trustee	\$139,000	\$0	\$0	\$139,000
Michael D. Hankin, Trustee	\$0	\$0	\$0	\$0
Joseph R. Hardiman, Trustee	\$144,000	\$0	\$0	\$144,000

⁽¹⁾ Trustee fees and expenses are allocated among the Funds in the Trust.

⁽²⁾ The Fund Complex currently consists of the 21 Funds in the Trust.

⁽³⁾ Ms. Kiser was appointed as a Trustee effective November 10, 2021.

Investment Adviser

Services of the Adviser

The Adviser serves as investment adviser to the Fund pursuant to an investment advisory agreement with the Trust (the “Advisory Agreement”). The Advisory Agreement with respect to the Fund was initially approved by the Board of Trustees on November 2, 2022 for an initial two year period. After the initial two year term, the Advisory Agreement will continue in effect from year to year as long as the continuance is approved at least annually (i) by the Trustees or by vote of a majority of the outstanding voting securities of the Fund, and (ii) by a vote of the majority of the Independent Trustees. The Adviser monitors the performance of the Fund and continuously reviews, supervises and administers its investment program, subject to the direction of, and policies established by, the Board.

Under the Advisory Agreement, the Adviser furnishes, at its own expense, all services, facilities and personnel necessary in connection with managing the Fund’s investments and effecting portfolio transactions for the Fund. The Adviser may also pay fees to certain brokers/dealers to have the Fund available for sale through such institutions as well for certain shareholder services provided to customers purchasing Fund shares through such institutions.

Ownership of the Adviser

The Adviser is a wholly-owned subsidiary of Brown Advisory Management, LLC, a Maryland limited liability company. Brown Advisory Management, LLC is controlled by Brown Advisory Incorporated, a holding company incorporated under the laws of Maryland in 1998. The Adviser does business under the name of Brown Advisory. The Adviser and its affiliates (“Brown Advisory”) have provided investment advisory and management services to clients for over 20 years.

Information Regarding the Portfolio Manager

The following information regarding the Fund’s portfolio manager has been provided by the Adviser.

Other Accounts Under Management. The table below identifies, for the portfolio manager of the Fund, the number of accounts managed (excluding the Fund) and the total assets in such accounts, within each of the following categories: registered investment companies, other pooled investment vehicles, and other accounts. Information in the table is shown as of December 31, 2022. Asset amounts are approximate and have been rounded.

Portfolio Manager	Number of Other Accounts Managed and Assets by Account Type			Number of Accounts and Assets for which Advisory Fee is Performance Based		
	Registered Investment Companies	Other Pooled Investment Vehicles	Other Accounts	Registered Investment Companies	Other Pooled Investment Vehicles	Other Accounts
Michael Poggi	0 \$0	0 \$0	1 \$11 million	0 \$0	0 \$0	0 \$0

Conflicts of Interest for the Portfolio Manager. Actual or apparent conflicts of interest may arise when a portfolio manager has day-to-day management responsibilities with respect to more than one Fund or other account. More specifically, portfolio managers who manage multiple Funds and/or other accounts may experience the following potential conflicts: The management of multiple accounts may result in a portfolio manager devoting unequal time and attention to the management of each account. Investment decisions for client accounts are also made consistent with a client’s individual investment objective and needs. Accordingly, there may be circumstances when purchases

or sales of securities for one or more client accounts will have an adverse effect on other clients. The Adviser may seek to manage such competing interests by: (1) having a portfolio manager focus on a particular investment discipline; (2) utilizing a quantitative model in managing accounts; and/or (3) reviewing performance differences between similarly managed accounts on a periodic basis to ensure that any such differences are attributable to differences in investment guidelines and timing of cash flows. The Adviser also maintains a Code of Ethics to establish standards and procedures for the detection and prevention of activities by which persons having knowledge of the investments and investment intentions of the Fund may abuse their fiduciary duties to the Fund.

If a portfolio manager identifies a limited investment opportunity that may be suitable for more than one client, the Fund may not be able to take full advantage of that opportunity due to an allocation of filled purchase or sale orders across all eligible accounts. To deal with these situations, the Adviser has adopted procedures for allocating portfolio transactions across multiple accounts and conducting trades on a soft dollar basis, if applicable.

With respect to securities transactions for clients, the Adviser determines which broker to use to execute each order. However, the Adviser may direct securities transactions to a particular broker/dealer for various reasons including receipt of research or participation interests in initial public offerings that may or may not benefit the Fund. To deal with these situations, the Adviser has adopted procedures to help ensure best execution of all client transactions.

Finally, the appearance of a conflict of interest may arise where the Adviser has an incentive, such as a performance-based management fee, which relates to the management of one but not all accounts for which a portfolio manager has day-to-day management responsibilities.

Information Concerning Compensation of Portfolio Managers. Each portfolio manager of the Adviser receives a compensation package that includes various components, including a base salary and variable incentive bonus. A portfolio manager who is also a member of the Adviser's management team maintains a significant equity interest in Brown Advisory Holdings Incorporated. The incentive bonus is subjective. It takes into consideration a number of factors including but not limited to performance, client satisfaction and service and the profitability of the Adviser's business. When evaluating a portfolio manager's performance the Adviser compares the pre-tax performance of a portfolio manager's accounts to a relative broad-based market index over a trailing 1, 3, and 5 year time period. Accounts managed in the below referenced styles are typically compared to the following indices:

Sustainable Value Fund

Russell 1000 Value Index

All portions of the portfolio manager's compensation package are paid by the Adviser and not by any client account.

Portfolio Manager Ownership in the Fund. No portfolio manager ownership information is provided for the Fund because the Fund had not commenced operations prior to the date of this SAI.

Advisory Fees

The Adviser's fee is calculated as a percentage of the Fund's average daily net assets. The fee, if not waived, is accrued daily by the Fund and is assessed to each class based on average net assets for the previous month. The Adviser's fee is paid monthly based on average net assets for the prior month.

In addition to receiving its advisory fee from the Fund, the Adviser may also act and be compensated as investment manager for its clients with respect to assets they invested in the Fund. If you have a separately managed account with the Adviser with assets invested in the Fund, the Adviser will credit an amount equal to all or a portion of the fees received by the Adviser against any investment management fee received from you.

The Adviser may also receive compensation from certain omnibus account providers for providing shareholder services to Fund shareholders.

No advisory fee information is provided for the Fund because the Fund had not commenced operations prior to the date of this SAI.

Expense Limitation Agreements

The Adviser has contractually agreed to waive its fees and/or reimburse certain expenses (excluding taxes, interest, portfolio transaction expenses, acquired fund fees and expenses and extraordinary expenses) in order to limit the Fund's total expenses as follows:

Fund	Institutional Shares	Investor Shares	Advisor Shares
Brown Advisory Sustainable Value Fund	0.70%	0.85%	1.10%

Under the Expense Limitation Agreements, the Adviser may recapture waived fees and expenses borne for a three-year period under specified conditions.

The Expense Limitation Agreement will remain in effect until October 31, 2024. The contractual waivers and expense reimbursements may be changed or eliminated at any time by the Board of Trustees upon 60 days' written notice to the Adviser, or by the Adviser with the consent of the Board of Trustees.

Other Provisions of Advisory Agreement

The Adviser is not affiliated with Fund Services, the Trust's administrator, fund accountant and transfer agent, or any company affiliated with Fund Services. The Advisory Agreement remains in effect for a period of two years from the date of its initial effectiveness. Subsequently, the Advisory Agreement must be approved at least annually by the Board or by majority vote of the shareholders, and in either case by a majority of the Trustees who are not parties to the agreement or interested persons of any such party (other than as Trustees of the Trust).

The Advisory Agreement is terminable without penalty by the Trust with respect to the Fund on 60 days' written notice when authorized either by vote of the Fund's shareholders or by a majority vote of the Board, or by the Adviser on 60 days' written notice to the Trust. The Advisory Agreement terminates immediately upon assignment (as defined in the 1940 Act).

Under the Advisory Agreement, the Adviser is not liable for any error of judgment, mistake of law, or in any event whatsoever except for willful misfeasance, bad faith or gross negligence in the performance of its duties or by reason of reckless disregard of its obligations and duties under the agreement.

Distributor

Distribution Services

ALPS Distributors, Inc., 1290 Broadway, Suite 1100, Denver, Colorado 80203 ("ALPS"), serves as the Fund's principal underwriter in a continuous public offering of the Fund's shares. Pursuant to the distribution agreement between the Trust and ALPS adopted on February 20, 2019 (the "Distribution Agreement"), ALPS acts as the Fund's principal underwriter and distributor and provides certain administration services and promotes and arranges

for the sale of the Fund's shares. ALPS is a registered broker-dealer under the Securities Exchange Act of 1934, as amended, and is a member of the Financial Industry Regulatory Authority ("FINRA"). ALPS is a wholly-owned subsidiary of SS&C Technologies, Inc., a publicly-traded company providing global investment and financial services.

The Distribution Agreement between the Trust and ALPS has an initial term of two years and subsequently will continue in effect only if such continuance is specifically approved at least annually by the Board or by vote of a majority of the Fund's outstanding voting securities and, in either case, by a majority of the Independent Trustees. The Distribution Agreement is terminable without penalty by the Trust on behalf of the Fund on a 60-day written notice when authorized either by a majority vote of the Fund's shareholders or by vote of a majority of the Board, including a majority of the Independent Trustees, or by ALPS on a 60-day written notice, and will automatically terminate in the event of its "assignment" (as defined in the 1940 Act).

Distribution Plan – (Advisor Shares)

On May 2, 2012, the Trust adopted a distribution plan for their Advisor Shares pursuant to Rule 12b-1 under the 1940 Act (the "12b-1 Plan"). Under the 12b-1 Plan, the Fund pays a fee to the Distributor for distribution services (the "Distribution Fee") at an annual rate of 0.25% for Advisor Shares of the Fund's average daily net asset value of its Advisor Shares. The 12b-1 Plan provides that the Distributor may use all or any portion of such Distribution Fee to finance any activity that is principally intended to result in the sale of Fund shares, subject to the terms of the 12b-1 Plan, or to provide certain shareholder services.

The Distribution Fee is payable to the Distributor regardless of the distribution-related expenses actually incurred. Because the Distribution Fee is not directly tied to expenses, the amount of distribution fees paid by the Advisor Shares of the Fund during any year may be more or less than actual expenses incurred pursuant to the 12b-1 Plan. For this reason, this type of distribution fee arrangement is characterized by the staff of the SEC as a "compensation" plan.

The Distributor may use the Distribution Fee to pay for services covered by the 12b-1 Plan including, but not limited to, advertising, compensating underwriters, dealers and selling personnel engaged in the distribution of Fund shares, the printing and mailing of prospectuses, statements of additional information and reports, the printing and mailing of sales literature pertaining to the Fund, and obtaining whatever information, analyses and reports with respect to marketing and promotional activities that the Fund may, from time to time, deem advisable.

The 12b-1 Plan provides that it will continue from year to year upon approval by the majority vote of the Board, including a majority of the trustees who are not "interested persons" of the Fund, as defined in the 1940 Act, and who have no direct or indirect financial interest in the operations of the 12b-1 Plan or in any agreement related to such plan (the "Qualified Trustees"), as required by the 1940 Act, currently cast in person at a meeting called for that purpose, provided that such trustees have made a determination that there is a reasonable likelihood that the 12b-1 Plan will benefit the Fund and its shareholders. It is also required that the trustees who are not "interested persons" of the Fund, select and nominate all other trustees who are not "interested persons" of the Fund. The 12b-1 Plan and any related agreements may not be amended to materially increase the amounts to be spent for distribution expenses without approval of shareholders holding a majority of the Fund shares outstanding. All material amendments to the 12b-1 Plan or any related agreements must be approved by a vote of a majority of the Board and the Qualified Trustees, cast in person at a meeting called for the purpose of voting on any such amendment.

The 12b-1 Plan requires that the Distributor provide to the Board, at least quarterly, a written report on the amounts and purpose of any payment made under the 12b-1 Plan. The Distributor is also required to furnish the Board with

such other information as may reasonably be requested in order to enable the Board to make an informed determination of whether the 12b-1 Plan should be continued.

As noted above, the 12b-1 Plan provides for the ability to use Fund assets to pay financial intermediaries (including those that sponsor mutual fund supermarkets), plan administrators and other service providers to finance any activity that is principally intended to result in the sale of Fund shares (distribution services) and for the provision of personal services to shareholders. The payments made by the Fund to financial intermediaries are based primarily on the dollar amount of assets invested in the Fund through the financial intermediaries. These financial intermediaries may pay a portion of the payments that they receive from the Fund to their investment professionals. In addition to the ongoing asset-based fees paid to these financial intermediaries under the Fund's 12b-1 Plan, the Fund may, from time to time, make payments under the 12b-1 Plan that help defray the expenses incurred by these intermediaries for conducting training and educational meetings about various aspects of the Fund for their employees. In addition, the Fund may make payments under the 12b-1 Plan for exhibition space and otherwise help defray the expenses these financial intermediaries incur in hosting client seminars where the Fund is discussed.

In addition, the Fund may participate in various “fund supermarkets” in which a mutual fund supermarket sponsor (usually a broker-dealer) offers many mutual funds to the sponsor’s customers without charging the customers a sales charge. In connection with its participation in such platforms, the Distributor may use all or a portion of the Distribution Fee to pay one or more supermarket sponsors a negotiated fee for distributing the Fund's shares. In addition, in its discretion, the Adviser may pay additional fees to such intermediaries from its own assets.

Any material amendment to the 12b-1 Plan must be approved by the Board, including a majority of the Independent Trustees, or by a vote of a “majority” (as defined in the 1940 Act) of the outstanding voting securities of the applicable class or classes. The 12b-1 Plan may be terminated, with respect to a class or classes of the Fund, without penalty at any time: (1) by vote of a majority of the Board, including a majority of the Independent Trustees; or (2) by a vote of a “majority” (as defined in the 1940 Act) of the outstanding voting securities of the applicable class or classes.

No 12b-1 information is provided for the Fund because the Fund had not commenced operations prior to the date of this SAI.

Shareholder Servicing Plan – (Advisor and Investor Shares)

Pursuant to the Shareholder Servicing Plan (the “Plan”) adopted by the Trust on May 2, 2012 with respect to the Advisor and Investor Shares of the Fund, the Adviser is authorized to provide, or arrange for others to provide personal shareholder services relating to the servicing and maintenance of shareholder accounts not otherwise provided to the Fund (“Shareholder Servicing Activities”). Under the Plan, the Adviser may enter into shareholder service agreements with securities broker-dealers and other securities professionals (“Service Organizations”) who provide Shareholder Servicing Activities for their clients invested in the Fund.

Shareholder Servicing Activities shall include one or more of the following: (1) establishing and maintaining accounts and records relating for shareholders of the Fund; (2) aggregating and processing orders involving the shares of the Fund; (3) processing dividend and other distribution payments from the Fund on behalf of shareholders; (4) providing information to shareholders as to their ownership of Fund shares or about other aspects of the operations of the Fund; (5) preparing tax reports or forms on behalf of shareholders; (6) forwarding communications from the Fund to shareholders; (7) assisting shareholders in changing the Fund's records as to their addresses, dividend options, account registrations or other data; (8) providing sub-accounting with respect to shares beneficially owned by shareholders, or the information to the Fund necessary for sub-accounting; (9) responding to shareholder inquiries relating to the services performed; (10) providing shareholders with a service that invests the

assets of their accounts in shares pursuant to specific or pre-authorized instructions; and (11) providing such other similar services as the Adviser may reasonably request to the extent the Service Organization is permitted to do so under applicable statutes, rules or regulations.

As compensation for the Shareholder Servicing Activities, the Fund pays the Adviser a fee of up to 0.15% of average daily net assets for Shareholder Servicing Activities.

Business Management Services

Pursuant to the Business Management Agreement, the Adviser also provides certain business management services to the Fund, including, without limitation, monitoring of the Fund's relationships with third-party service providers, and assisting with necessary and appropriate services to the Board of the Trust. For these services, the Adviser is entitled to receive a fee from the Fund at a rate of 0.05% of the Fund's average daily net assets.

No business management services fee information is provided for the Fund because the Fund had not commenced operations prior to the date of this SAI.

Securities Lending Activities

No securities lending information is provided for the Fund because the Fund had not commenced operations prior to the date of this SAI.

Other Fund Service Providers

Administrator and Accountant

U.S. Bancorp Fund Services, LLC, doing business as U.S. Bank Global Fund Services ("Fund Services"), 615 East Michigan Street, Milwaukee, Wisconsin 53202, acts as administrator to the Fund pursuant to an administration agreement (the "Administration Agreement"). Fund Services provides certain administrative services to the Fund, including, among other responsibilities, coordinating the negotiation of contracts and fees with, and the monitoring of performance and billing of, the Fund's independent contractors and agents; preparation for signature by an officer of the Trust of all documents required to be filed for compliance by the Trust and the Fund with applicable laws and regulations excluding those of the securities laws of various states; arranging for the computation of performance data, including NAV and yield; responding to shareholder inquiries; and arranging for the maintenance of books and records of the Fund, and providing, at its own expense, office facilities, equipment and personnel necessary to carry out its duties. In this capacity, Fund Services does not have any responsibility or authority for the management of the Fund, the determination of investment policy, or for any matter pertaining to the distribution of Fund shares.

Pursuant to the Administration Agreement, the Administrator will receive a portion of fees from the Fund as part of a bundled-fees agreement for services performed as fund administrator, fund accountant and transfer agent to the Trust.

No administration fee information is provided for Fund because the Fund had not commenced operations prior to the date of this SAI.

Custodian

U.S. Bank, National Association is the custodian for the Fund (the "Custodian") and safeguards and controls the Fund's cash and securities, determines income and collects interest on Fund investments. The Custodian's address is

1555 North RiverCenter Drive, Suite 302, Milwaukee, Wisconsin 53212. The Custodian does not participate in decisions relating to the purchase and sale of securities by the Fund. Fund Services, U.S. Bank, National Association, and the Fund's principal underwriter are affiliated entities under the common control of U.S. Bancorp. The Custodian and its affiliates may participate in revenue sharing arrangements with the service providers of mutual funds in which the Fund may invest.

Legal Counsel

Dechert LLP, 1900 K Street, NW, Washington, DC 20006, serves as legal counsel to the Trust.

Independent Registered Public Accounting Firm

Tait, Weller & Baker LLP, located at Two Liberty Place, 50 South 16th Street, Suite 2900, Philadelphia, Pennsylvania 19102, is the Fund's independent registered public accounting firm, providing audit services, tax services and assistance with respect to the preparation of filings with the U.S. Securities and Exchange Commission.

PORTFOLIO TRANSACTIONS

The Adviser is responsible for decisions to buy and sell securities for the Fund and for the placement of the Fund's securities business, the negotiation of the commissions to be paid on such transactions and the allocation of portfolio brokerage and principal business.

How Securities are Purchased and Sold

Purchases and sales of portfolio securities that are fixed income securities (for instance, money market instruments and bonds, notes and bills) usually are principal transactions. In a principal transaction, the party from whom the Fund purchases or to whom the Fund sells is acting on its own behalf (and not as the agent of some other party such as its customers). These securities normally are purchased directly from the issuer or from an underwriter or market maker for the securities. There are usually no stated brokerage commissions paid for these securities, but the price usually includes an undisclosed commission or markup.

Purchases and sales of portfolio securities that are equity securities (for instance common stock and preferred stock) are generally effected: (1) if the security is traded on an exchange, through brokers who charge commissions; and (2) if the security is traded in the "over-the-counter" markets, in a principal transaction directly from a market maker. In transactions on stock exchanges, commissions are negotiated. When transactions are executed in an over-the-counter market, the Adviser will seek to deal with the primary market makers; but when necessary in order to obtain best execution, the Adviser will utilize the services of others.

The price of securities purchased from underwriters includes a disclosed fixed commission or concession paid by the issuer to the underwriter, and prices of securities purchased from dealers serving as market makers reflects the spread between the bid and asked price.

In the case of fixed income and equity securities traded in the over-the-counter markets, there is generally no stated commission, but the price usually includes an undisclosed commission or markup.

Commissions Paid

No brokerage commissions information is provided for the Fund because the Fund had not commenced operations prior to the date of this SAI.

Adviser Responsibility for Purchases and Sales

The Adviser places orders for the purchase and sale of securities with broker-dealers selected by and in the discretion of the Adviser. The Fund does not have any obligation to deal with a specific broker or dealer in the execution of portfolio transactions. Allocations of transactions to brokers and dealers and the frequency of transactions are determined by the Adviser in its best judgment and in a manner deemed to be in the best interest of the Fund rather than by any formula.

The Adviser seeks “best execution” for all portfolio transactions. This means that the Adviser seeks the most favorable price and execution available. The Adviser’s primary consideration in executing transactions for the Fund is prompt execution of orders in an effective manner and at the most favorable price available.

Choosing Broker-Dealers

The Fund may not always pay the lowest commission or spread available. Rather, in determining the amount of commissions (including certain dealer spreads) paid in connection with securities transactions, the Adviser takes into account factors such as size of the order, difficulty of execution, efficiency of the executing broker’s facilities (including the research services described below) and any risk assumed by the executing broker.

Consistent with applicable rules and the Adviser’s duties, the Adviser may consider payments made by brokers effecting transactions for the Fund. These payments may be made to the Fund or to other persons on behalf of the Fund for services provided to the Fund for which those other persons would be obligated to pay.

The Adviser may also utilize a broker and pay a slightly higher commission if, for example, the broker has specific expertise in a particular type of transaction (due to factors such as size or difficulty), or it is efficient in trade execution.

Obtaining Research from Brokers

The Adviser has full brokerage discretion. The Adviser evaluates the range and quality of a broker’s services in placing trades such as securing best price, confidentiality, clearance and settlement capabilities, promptness of execution and the financial stability of the broker-dealer. The Adviser may give consideration to research services furnished by brokers to the Adviser for its use and may cause the Fund to pay these brokers a higher amount of commission than may be charged by other brokers. This research is designed to augment the Adviser’s own internal research and investment strategy capabilities. This research may include reports that are common in the industry such as industry research reports and periodicals, quotation systems, software for portfolio management and formal databases. Typically, the research will be used to service all of the Adviser accounts, although a particular client may not benefit from all the research received on each occasion. The Adviser fees are not reduced by reason of receipt of research services. Most of the brokerage commissions for research are for investment research on specific companies or industries. And, because the Adviser will follow a limited number of securities most of the commission dollars spent research will directly benefit clients and the Fund’s investors.

No soft-dollar arrangement information is provided for the Fund because the Fund had not commenced operations prior to the date of this SAI.

Counterparty Risk

The Adviser monitors the creditworthiness of counterparties to the Fund transactions and intends to enter into a transaction only when it believes that the counterparty presents minimal and appropriate credit risks.

Transactions through Affiliates

The Adviser may effect brokerage transactions through affiliates of the Adviser (or affiliates of those persons) pursuant to procedures adopted by the Trust.

Other Accounts of the Adviser

Investment decisions for the Fund are made independently from those for any other account or investment company that is or may in the future become advised by the Adviser or its affiliates. Investment decisions are the product of many factors, including basic suitability for the particular client involved. Likewise, a particular security may be bought or sold for certain clients even though it could have been bought or sold for other clients at the same time. Likewise, a particular security may be bought for one or more clients when one or more clients are selling the security. In some instances, one client may sell a particular security to another client. In addition, two or more clients may simultaneously purchase or sell the same security, in which event, each day's transactions in such security are, insofar as is possible, averaged as to price and allocated between such clients in a manner which, in the Adviser's opinion, is in the best interest of the affected accounts and is equitable to each and in accordance with the amount being purchased or sold by each. There may be circumstances when purchases or sales of a portfolio security for one client could have an adverse effect on another client that has a position in that security. In addition, when purchases or sales of the same security for the Fund and other client accounts managed by the Adviser occurs contemporaneously, the purchase or sale orders may be aggregated in order to obtain any price advantages available to large denomination purchases or sales.

Portfolio Turnover

The frequency of portfolio transactions of the Fund (the portfolio turnover rate) will vary from year to year depending on many factors. From time to time, the Fund may engage in active short-term trading to take advantage of price movements affecting individual issues, groups of issues or markets. An annual portfolio turnover rate of 100% would occur if all the securities in the Fund were replaced once in a period of one year. Higher portfolio turnover rates may result in increased brokerage costs to the Fund and a possible increase in short-term capital gains or losses.

No portfolio turnover information is provided for the Fund because the Fund had not commenced operations prior to the date of this SAI.

Securities of Regular Broker-Dealers

From time to time, the Fund may acquire and hold securities issued by its "regular brokers and dealers" or the parents of those brokers and dealers. For this purpose, regular brokers and dealers are the 10 brokers or dealers that: (1) received the greatest amount of brokerage commissions during the Fund's last fiscal year; (2) engaged in the largest amount of principal transactions for portfolio transactions of the Fund during the Fund's last fiscal year; or (3) sold the largest amount of the Fund's shares during the Fund's last fiscal year.

No ownership information of regular broker-dealers is provided for the Fund because the Fund had not commenced operations prior to the date of this SAI.

Portfolio Holdings

The Trust, on behalf of the Fund, has adopted a portfolio holdings disclosure policy that governs the timing and circumstances of disclosure of portfolio holdings of the Fund. The Adviser has also adopted a policy with respect to disclosure of portfolio holdings of the Fund (the “Adviser’s Policy”). Information about the Fund’s portfolio holdings will not be distributed to any third party except in accordance with the Trust’s portfolio holdings policies and the Adviser’s Policy (the “Disclosure Policies”). The Adviser and the Board considered the circumstances under which the Fund’s portfolio holdings may be disclosed under the Disclosure Policies and the actual and potential material conflicts that could arise in such circumstances between the interests of the Fund’s shareholders and the interests of the Adviser, the distributor or any other affiliated person of the Fund. After due consideration, the Adviser and the Board determined that the Fund has a legitimate business purpose for disclosing portfolio holdings to persons described in the Disclosure Policies, including mutual fund rating or statistical agencies, or persons performing similar functions, and internal parties involved in the investment process, administration or custody of the Fund. Pursuant to the Disclosure Policies, the Trust’s Chief Compliance Officer (“CCO”), President and Treasurer are each authorized to consider and authorize dissemination of portfolio holdings information to additional third parties, after considering the best interests of the Fund’s shareholders and potential conflicts of interest in making such disclosures. The Disclosure Policies are each consistent with the Trust’s portfolio holdings disclosure policy and are used in furtherance of the Trust’s policy.

The Board exercises continuing oversight of the disclosure of the Fund’s portfolio holdings by (1) overseeing the implementation and enforcement of the Disclosure Policies, Codes of Ethics and other relevant policies of the Fund and its service providers by the Trust’s CCO, (2) by considering reports and recommendations by the Trust’s CCO concerning any material compliance matters (as defined in Rule 38a-1 under the 1940 Act), and (3) by considering to approve any amendment to the Disclosure Policies. The Board reserves the right to amend the Disclosure Policies at any time without prior notice to shareholders in its sole discretion.

Disclosure of the Fund’s complete holdings is required to be made after the periods covered by the Fund’s Annual Report and Semi-Annual Report to Fund shareholders and in the quarterly holdings report on Form N-PORT. These reports are available, free of charge, on the EDGAR database on the SEC’s website at www.sec.gov. The Fund discloses its complete portfolio holdings on its website at www.browoadvisory.com/mf within 10 business days after the calendar month-end. Portfolio holdings information posted on the Fund’s website may be separately provided to any person, commencing on the day after it is first published on the Fund’s website. In addition, the Fund may provide its complete portfolio holdings at the same time that it is filed with the SEC.

In the event of a conflict between the interests of the Fund and the interests of the Adviser or an affiliated person of the Adviser, the CCO of the Adviser, in consultation with the Trust’s CCO, shall make a determination in the best interests of the Fund, and shall report such determination to the Board at the end of the quarter in which such determination was made. Any employee of the Adviser who suspects a breach of this obligation must report the matter immediately to the Adviser’s CCO or to his or her supervisor.

In addition, material non-public holdings information may be provided without lag as part of the normal investment activities of the Fund to each of the following entities, which, by explicit agreement or by virtue of their respective duties to the Fund, are required to maintain the confidentiality of the information disclosed, including a duty not to trade on non-public information: the fund administrator, fund accountant, custodian, transfer agent, auditors, counsel to the Fund or the Board, broker-dealers (in connection with the purchase or sale of securities or requests for price quotations or bids on one or more securities), distributor, proxy services, printers, liquidity, classification agents, and

regulatory authorities. Portfolio holdings information not publicly available with the SEC or through the Fund's website may only be provided to additional third parties, including mutual fund ratings or statistical agencies, in accordance with the Disclosure Policies, when the Fund has a legitimate business purpose and the third party recipient is subject to a confidentiality agreement that includes a duty not to trade on non-public information.

Service providers are subject to a duty of confidentiality pursuant to contract, applicable policies and procedures, or professional code and may not disclose non-public portfolio holdings information unless specifically authorized. In some cases, a service provider may be required to execute a non-disclosure agreement. Non-disclosure agreements include the following provisions:

- The recipient agrees to keep confidential any portfolio holdings information received.
- The recipient agrees not to trade on the non-public information received
- The recipient agrees to refresh its representation as to confidentiality and abstention from trading upon request from the Adviser.

Portfolio holdings disclosure may also be made pursuant to prior written approval by the CCO. Prior to approving any such disclosure, the CCO will ensure that procedures, processes and agreements are in place to provide reasonable assurance that the portfolio holdings information will only be used in accordance with the objectives of the Disclosure Policies.

In no event shall the Adviser, its affiliates or employees, the Fund, or any other party receive any direct or indirect compensation in connection with the disclosure of information about the Fund's portfolio holdings.

There can be no assurance that the Disclosure Policies will protect the Fund from potential misuse of portfolio holdings information by individuals or entities to which it is disclosed.

From time to time, the Adviser may make additional disclosure of the Fund's portfolio holdings on the Fund's website. Shareholders can access the Fund's website at www.brownadvisory.com/mf for additional information about the Fund, including, without limitation, the periodic disclosure of its portfolio holdings.

ADDITIONAL PURCHASE AND REDEMPTION INFORMATION

The information provided below supplements the information contained in the Prospectus regarding the purchase and redemption of the Fund's shares.

How to Buy Shares

In addition to purchasing shares directly from the Fund, you may purchase shares of the Fund through certain financial intermediaries and their agents that have made arrangements with the Fund and are authorized to buy and sell shares of the Fund (collectively, "Financial Intermediaries"). Investors should contact their Financial Intermediary directly for appropriate instructions, as well as information pertaining to accounts and any service or transaction fees that may be charged. If you transmit your order to these Financial Intermediaries before the Fund's close, which is the close of regular trading (generally 4:00 p.m., Eastern time) on a day that the NYSE is open for business, your order will be priced based on the Fund's NAV next computed after it is received by the Financial Intermediary. Investors should check with their Financial Intermediary to determine if it participates in these arrangements.

Shares are purchased at the Fund's NAV next determined after Fund Services receives your order in proper form, as discussed in the Fund's Prospectus. The Fund and the Transfer Agent will be deemed to have received a purchase or redemption order when an authorized broker or, if applicable, a broker's authorized designee receives the order. In order to receive that day's NAV, Fund Services must receive your order in proper form before the close of regular trading on the NYSE, generally 4:00 p.m., Eastern time. If the NYSE is closed due to inclement weather, technology problems or any other reason on a day it would normally be open for business, or the NYSE has an unscheduled early closing on a day it has opened for business, the Fund reserves the right to treat such day as a business day and accept purchase and redemption orders until, and calculate the Fund's NAV as of, the normally scheduled close of regular trading on the NYSE for that day, so long as the Adviser believes there remains an adequate market to meet purchase and redemption orders for that day. On any business day when the Securities Industry and Financial Markets Association recommends that the bond markets close trading early, the Fund reserves the right to close at such earlier closing time, and therefore accept purchase and redemption orders until, and calculate the Fund's NAV as of, such earlier closing time.

The Trust reserves the right in its sole discretion (i) to suspend the continued offering of the Fund's shares, (ii) to reject purchase orders in whole or in part when in the judgment of the Adviser or the distributor such rejection is in the best interest of the Fund, and (iii) to reduce or waive the minimum for initial and subsequent investments for certain fiduciary accounts or under circumstances where certain economies can be achieved in sales of the Fund's shares.

In addition to cash purchases, the Fund's shares may be purchased by tendering payment in-kind in the form of shares of stock, bonds or other securities. Any securities used to buy the Fund's shares must be readily marketable, their acquisition consistent with the Fund's objective and otherwise acceptable to the Adviser and the Board.

Automatic Investment Plan

As discussed in the Prospectus, the Fund provides an Automatic Investment Plan ("AIP") for the convenience of investors who wish to purchase shares of the Fund on a regular basis. All record keeping and custodial costs of the AIP are paid by the Fund. The market value of the Fund's shares is subject to fluctuation. Prior to participating in the AIP the investor should keep in mind that this plan does not assure a profit nor protect against depreciation in declining markets.

How to Sell Shares and Delivery of Redemption Proceeds

You can sell your Fund shares any day the NYSE is open for regular trading, either directly to the Fund or through your Financial Intermediary.

Payments to shareholders for shares of the Fund redeemed directly from the Fund will be made as promptly as possible, but no later than seven days after receipt by the Fund's transfer agent of the written request in proper form, with the appropriate documentation as stated in the Prospectus, except that the Fund may suspend the right of redemption or postpone the date of payment during any period when (a) trading on the NYSE is restricted as determined by the SEC or the NYSE is closed for other than weekends and holidays; (b) an emergency exists as determined by the SEC making disposal of portfolio securities or valuation of net assets of the Fund not reasonably practicable; or (c) for such other period as the SEC may permit for the protection of the Fund's shareholders. Under unusual circumstances, the Fund may suspend redemptions, or postpone payment for more than seven days, but only as authorized by SEC rules.

The value of shares on redemption or repurchase may be more or less than the investor's cost, depending upon the market value of the Fund's portfolio securities at the time of redemption or repurchase.

Telephone Redemptions

Shareholders with telephone transaction privileges established on their account may redeem the Fund's shares by telephone. Upon receipt of any instructions or inquiries by telephone from the shareholder the Fund or its authorized agents may carry out the instructions and/or to respond to the inquiry consistent with the shareholder's previously established account service options. For joint accounts, instructions or inquiries from either party will be carried out without prior notice to the other account owners. In acting upon telephone instructions, the Fund and its agents use procedures that are reasonably designed to ensure that such instructions are genuine. These include recording all telephone calls, requiring pertinent information about the account and sending written confirmation of each transaction to the registered owner.

Fund Services will employ reasonable procedures to confirm that instructions communicated by telephone are genuine. If Fund Services fails to employ reasonable procedures, the Fund and Fund Services may be liable for any losses due to unauthorized or fraudulent instructions. If these procedures are followed, however, that to the extent permitted by applicable law, neither the Fund nor its agents will be liable for any loss, liability, cost or expense arising out of any redemption request, including any fraudulent or unauthorized request. For additional information, contact Fund Services.

Redemptions In-Kind

The Trust has filed an election under Rule 18f-1 of the 1940 Act committing to pay in cash all redemptions by a shareholder of record up to amounts specified by the rule (in excess of the lesser of (i) \$250,000 or (ii) 1% of the Fund's assets). The Fund has reserved the right to pay the redemption price of its shares in excess of the amounts specified by the rule, either totally or partially, by a distribution in-kind of portfolio securities (instead of cash). The securities so distributed would be valued at the same amount as that assigned to them in calculating the NAV for the shares being sold. If a shareholder receives a distribution in-kind, the shareholder could incur subsequent brokerage or other charges in converting the securities to cash and will bear any market risks associated with such securities until they are converted into cash. A redemption in-kind is treated as a taxable transaction and a sale of the redeemed shares, generally resulting in capital gain or loss to you, subject to certain loss limitation rules.

The Fund does not intend to hold any significant percentage of its portfolio in illiquid securities, although the Fund, like virtually all mutual funds, may from time to time hold a small percentage of securities that are illiquid. In the unlikely event the Fund were to elect to make an in-kind redemption, the Fund expects that it would follow the normal protocol of making such distribution by way of a pro rata distribution based on its entire portfolio. If the Fund held illiquid securities, such distribution may contain a pro rata portion of such illiquid securities or the Fund may determine, based on a materiality assessment, not to include illiquid securities in the in-kind redemption. The Fund does not anticipate that it would ever selectively distribute a greater than pro rata portion of any illiquid securities to satisfy a redemption request. If such securities are included in the distribution, shareholders may not be able to liquidate such securities and may be required to hold such securities indefinitely. Shareholders' ability to liquidate such securities distributed in-kind may be restricted by resale limitations or substantial restrictions on transfer imposed by the issuers of the securities or by law. Shareholders may only be able to liquidate such securities distributed in-kind at a substantial discount from their value, and there may be higher brokerage costs associated with any subsequent disposition of these securities by the recipient.

Distributions

Distributions of net investment income will be reinvested at the Fund's NAV (unless you elect to receive distributions in cash) as of the payment date. Distributions of capital gain will be reinvested at the NAV of the Fund (unless you elect to receive distributions in cash) on the payment date for the distribution. Cash payments may be made more than seven days following the date on which distributions would otherwise be reinvested.

Additional Payments to Dealers

The Adviser, out of its own resources and without additional cost to the Fund or its shareholders, may provide additional cash payments or other compensation to certain financial intermediaries who sell shares of the Fund. You may wish to take such payment arrangements into account when considering and evaluating any recommendations relating to the Fund's shares.

Set forth below is a list of the member firms of FINRA to which the Adviser, the Distributor or their affiliates made payments out of their revenues in connection with the sale and distribution of shares of the Fund or for services to the Fund and its shareholders in the fiscal year ended June 30, 2021 ("Additional Payments"). Such payments are in addition to any amounts paid to such FINRA firms in the form of fees for shareholder servicing or distribution. The payments are discussed in further detail in the Prospectus in the section entitled "Choosing a Shares Class - Additional Payments to Dealers". Any additions, modification, or deletions to the member firms identified in this list that have occurred since June 30, 2022, are not reflected:

FINRA MEMBER FIRMS:

- Ameriprise Financial Services, LLC
- Charles Schwab & Co., Inc.
- Edward D. Jones & Co., L.P.
- Fidelity Investments Institutional Services Company, Inc.
- Goldman Sachs & Co.
- Merrill Lynch, Pierce, Fenner & Smith Incorporated
- Morgan Stanley & Co.
- National Financial Services, LLC
- Pershing LLC
- Raymond James & Associates, Inc.
- RBC Capital Markets, LLC
- TD Ameritrade, Inc.
- TIAA-REF Individual and Institutional Services, LLC
- UBS Financial Services Inc.
- Vanguard Marketing Corporation
- Wells Fargo Clearing Services, LLC

The prospect of receiving, or the receipt of, additional payments or other compensation as described above by financial intermediaries may provide such intermediaries and/or their salespersons with an incentive to favor sales of shares of the Fund, and other mutual funds whose affiliates make similar compensation available, over sale of shares of mutual funds (or non-mutual fund investments) not making such payments. You may wish to take such payment arrangements into account when considering and evaluating any recommendations relating to Fund shares.

TAXATION

The tax information set forth in the Prospectus and the information in this section relates solely to Federal income tax law and assumes that the Fund qualifies as a regulated investment company (as discussed below). Such information is only a summary of certain key Federal income tax considerations affecting the Fund and its shareholders and is in addition to the information provided in the Prospectus. No attempt has been made to present a complete explanation of the Federal tax treatment of the Fund or the tax implications to shareholders. The discussions here and in the Prospectus are not intended as substitutes for careful tax planning.

This “Taxation” section is based on the Code and applicable regulations in effect on the date of the Prospectus. Future legislative or administrative changes or court decisions may significantly change the tax rules applicable to the Fund and its shareholders. Any of these changes or court decisions may have a retroactive effect.

All investors should consult their own tax advisors as to the Federal, state, local and foreign tax consequences of an investment in the Fund.

Qualification as a Regulated Investment Company

The Fund intends, for each tax year, to qualify as a “regulated investment company” under the Code.

Federal Income Tax Consequences of Qualification

As a regulated investment company, the Fund will not be subject to Federal income tax on the portion of its investment company taxable income (that is, taxable interest, dividends, net short-term capital gains and other taxable ordinary income, net of expenses) and net capital gain (that is, the excess of net long-term capital gains over net short-term capital losses) that it distributes to shareholders. In order to qualify to be taxed as a regulated investment company, generally the Fund must satisfy the following requirements:

- The Fund must distribute an amount at least equal to the sum of 90% of its investment company taxable income, determined without regard to any deduction for dividends paid, plus 90% of its net tax-exempt interest, if any, each tax year (certain distributions made by the Fund after the close of its tax year are considered distributions attributable to the previous tax year for purposes of satisfying this requirement (the “Distribution Requirement”).
- The Fund must derive at least 90% of its gross income each year from dividends, interest, payments with respect to securities loans, and gains from the sale or other disposition of stocks, securities, and currencies, or other income (including gains from options and futures contracts) derived from its business of investing in such stocks, securities, and currencies and net income derived from interests in qualified publicly traded partnerships.
- The Fund must satisfy the following asset diversification tests at the close of each quarter of the Fund’s tax year: (1) at least 50% of the value of the Fund’s assets must consist of cash, cash items, U.S. Government securities, securities of other regulated investment companies, and securities of other issuers (as to which the Fund has not invested more than 5% of the value of the Fund’s total assets in securities of an issuer and as to which the Fund does not hold more than 10% of the outstanding voting securities of the issuer); and (2) no more than 25% of the value of the Fund’s total assets may be invested in the securities of any one issuer (other than U.S. Government securities and securities of other regulated investment companies), or in

two or more issuers which the Fund controls and which are engaged in the same or similar trades or businesses or in the securities of one or more qualified publicly traded partnerships.

While the Fund presently intends to make cash distributions (including distributions reinvested in Fund shares) for each tax year of an aggregate amount sufficient to satisfy the Distribution Requirement and eliminate Federal income tax, the Fund may use “equalization accounting” (in lieu of making some or all cash distributions) for those purposes. The Fund that uses equalization accounting will allocate a portion of its undistributed investment company taxable income and net capital gain to redemptions of Fund shares and will correspondingly reduce the amount of such income and gain that it distributes in cash. If the IRS determines that the Fund’s allocation is improper and that the Fund has under-distributed its income and gain for any tax year, the Fund may be liable for Federal income and/or excise tax, and, if the Distribution Requirement has not been met, may also be unable to continue to qualify for tax treatment as a regulated investment company (see discussion below on what happens if the Fund fails to qualify for that treatment).

Failure to Qualify

If for any tax year the Fund does not qualify for tax treatment as a regulated investment company, all of its taxable income (including its net capital gain) will be subject to tax at regular corporate rates without any deduction for dividends paid to shareholders, and the dividends will generally be taxable to the shareholders as ordinary income to the extent of the Fund’s current and accumulated earnings and profits.

Failure to qualify as a regulated investment company would thus have a negative impact on the Fund’s income and performance. It is possible that the Fund will not qualify as a regulated investment company in any given tax year.

Fund Distributions

The Fund anticipates distributing substantially all of its investment company taxable income and net tax-exempt interest (if any) for each tax year. These distributions are taxable to you as ordinary income.

A portion of the Fund’s distributions may be treated as “qualified dividend income,” taxable to individuals, under current law, at a maximum Federal income tax rate of either 15% or 20% (depending on whether the individual’s income exceeds certain threshold amounts). A distribution is treated as qualified dividend income to the extent that the Fund receives dividend income from taxable domestic corporations and certain qualified foreign corporations, provided that holding period and other requirements are met by the Fund and the shareholder. To the extent the Fund’s distributions are attributable to other sources, such as interest or capital gains, the distributions are not treated as qualified dividend income. The Fund’s distributions of dividends that it received from REITs generally do not constitute “qualified dividend income.”

A portion of the Fund’s distributions, to the extent derived from dividends from domestic corporations, may be eligible for the corporate dividends-received deduction if certain holding period and other requirements are met.

Individuals (and certain other non-corporate entities) are generally eligible for a 20% deduction with respect to taxable ordinary REIT dividends and taxable income from master limited partnerships (“MLPs”). Treasury regulations allow the Fund to pass through to its shareholders such taxable ordinary REIT dividends. Accordingly, individual (and certain other non-corporate) shareholders of the Fund that have received such taxable ordinary REIT dividends may be able to take advantage of this 20% deduction with respect to any such amounts passed through. However, the regulations do not provide a mechanism for the Fund to pass through to its shareholders MLP net income, if any, or the 20% deduction with respect to taxable income from MLPs.

Certain distributions reported by the Fund as Section 163(j) interest dividends may be treated as interest income by shareholders for purposes of the tax rules applicable to interest expense limitations under Section 163(j) of the Code. Such treatment by the shareholder is generally subject to holding period requirements and other potential limitations, although the holding period requirements are generally not applicable to dividends declared by money market funds and certain other funds that declare dividends daily and pay such dividends on a monthly or more frequent basis. The amount that the Fund is eligible to report as a Section 163(j) dividend for a tax year is generally limited to the excess of the Fund's business interest income over the sum of the Fund's (i) business interest expense and (ii) other deductions properly allocable to the Fund's business interest income.

A 3.8% Medicare tax is imposed on certain net investment income (including ordinary dividends and capital gain distributions received from the Fund and net gains from redemptions or other taxable dispositions of Fund shares) of U.S. individuals, estates and trusts to the extent that such person's "modified adjusted gross income" (in the case of an individual) or "adjusted gross income" (in the case of an estate or trust) exceeds certain threshold amounts.

The Fund anticipates distributing substantially all of its net capital gain for each tax year. These distributions generally are made only once a year, usually in November or December, but the Fund may make additional distributions of net capital gain at any time during the year. These distributions are taxable to you as long-term capital gain, regardless of how long you have held shares. These distributions do not qualify for the dividends-received deduction.

The Fund may have capital loss carryovers (unutilized capital losses from prior years). Net capital losses can be carried forward without expiration.

No capital loss carryover information is provided because the Fund had not commenced operations prior to the date of this SAI.

The Fund's ability to use certain tax benefits could be limited if the Fund experiences an "ownership change" within the meaning of Section 382 of the Code. Such tax benefits include net capital losses and certain built-in losses. An ownership change may occur if there is a greater than 50% change in the value of the stock of the Fund owned by five percent shareholders during the testing period (generally three years). An ownership change may be triggered by the purchase and sale, redemption, or new issuance of Fund shares or by a merger of the Fund with another regulated investment company.

The Fund operates using a fiscal and taxable year ending on June 30 of each year.

Distributions by the Fund that do not constitute ordinary income dividends or capital gain dividends will be treated as a return of capital. Return of capital distributions reduce your tax basis in the shares and are treated as gain from the sale of the shares to the extent your basis would be reduced below zero.

All distributions by the Fund will be treated in the manner described above regardless of whether the distribution is paid in cash or reinvested in additional shares of the Fund (or of another fund). If you receive distributions in the form of additional shares, you will be treated as receiving a distribution in an amount equal to the amount of cash that would have been received instead of such shares.

You may purchase shares with a NAV at the time of purchase that reflects undistributed net investment income or recognized capital gain, or unrealized appreciation in the value of the assets of the Fund. Distributions of these amounts are taxable to you in the manner described above, although the distribution economically constitutes a return of capital to you.

Ordinarily, you are required to take distributions by the Fund into account in the tax year in which they are received. However, a distribution declared in October, November or December of any year and payable to shareholders of record on a specified date in those months, however, is deemed to be paid by the Fund and received by you on December 31 of that calendar year if the distribution is actually paid in January of the following year.

The Fund will send you information annually as to the Federal income tax consequences of distributions made (or deemed made) during the year.

Certain Tax Rules Applicable to the Fund's Transactions

For Federal income tax purposes, when put and call options purchased by the Fund expire unexercised, the premiums paid by the Fund give rise to short- or long-term capital losses at the time of expiration (depending on the length of the respective exercise periods for the options). When put and call options written by the Fund expire unexercised, the premiums received by the Fund give rise to short-term capital gains at the time of expiration. When the Fund exercises a call, the purchase price of the underlying security is increased by the amount of the premium paid by the Fund. When the Fund exercises a put, the proceeds from the sale of the underlying security are decreased by the premium paid. When a put or call written by the Fund is exercised, the purchase price (selling price in the case of a call) of the underlying security is decreased (increased in the case of a call) for tax purposes by the premium received.

Some of the debt securities that may be acquired by the Fund may be treated as debt securities that are issued with original issue discount ("OID"). Generally, the amount of the OID is treated as interest income and is included in income over the term of the debt security, even though payment of that amount is not received until a later time, usually when the debt security matures. Additionally, some of the debt securities that may be acquired by the Fund in the secondary market may be treated as having market discount. Generally, any gain recognized on the disposition of, and any partial payment of principal on, a debt security having market discount is treated as ordinary income to the extent the gain, or principal payment, does not exceed the "accrued market discount" on such debt security. The Fund may make one or more of the elections applicable to debt securities having market discount, which could affect the character and timing of recognition of income. The Fund generally will be required to distribute dividends to shareholders representing discount on debt securities that is currently includable in income, even though cash representing such income may not have been received by the Fund. Cash to pay such dividends may be obtained from sales proceeds of securities held by the Fund.

The Fund may invest a portion of its net assets in below investment grade instruments. Investments in these types of instruments may present special tax issues for the Fund. Federal income tax rules are not entirely clear about issues such as when the Fund may cease to accrue interest, OID or market discount, when and to what extent deductions may be taken for bad debts or worthless instruments, how payments received on obligations in default should be allocated between principal and income and whether exchanges of debt obligations in a bankruptcy or workout context are taxable. These and other issues will be addressed by the Fund to the extent necessary in order to seek to ensure that it distributes sufficient income to maintain its status as a regulated investment company and that it does not become subject to U.S. Federal income or excise tax.

Certain listed options, regulated futures contracts and forward currency contracts are considered "Section 1256 contracts" for Federal income tax purposes. Section 1256 contracts held by the Fund at the end of each tax year are "marked to market" and treated for Federal income tax purposes as though sold for fair market value on the last business day of the tax year. Gains or losses realized by the Fund on Section 1256 contracts generally are considered

60% long-term and 40% short-term capital gains or losses. The Fund can elect to exempt its Section 1256 contracts that are part of a “mixed straddle” (as described below) from the application of Section 1256 of the Code.

Any option, futures contract or other position entered into or held by the Fund in conjunction with any other position held by the Fund may constitute a “straddle” for Federal income tax purposes. A straddle of which at least one, but not all, the positions are Section 1256 contracts, may constitute a “mixed straddle.” In general, straddles are subject to certain rules that may affect the character and timing of the Fund’s gains and losses with respect to straddle positions by requiring, among other things, that: (1) the loss realized on disposition of one position of a straddle may not be recognized to the extent that the Fund has unrealized gains with respect to the other position in such straddle; (2) the Fund’s holding period in straddle positions be suspended while the straddle exists (possibly resulting in a gain being treated as short-term capital gain rather than long-term capital gain); (3) the losses recognized with respect to certain straddle positions which are part of a mixed straddle and which are non-Section 1256 contracts be treated as 60% long-term and 40% short-term capital loss; (4) losses recognized with respect to certain straddle positions which would otherwise constitute short-term capital losses be treated as long-term capital losses; and (5) the deduction of interest and carrying charges attributable to certain straddle positions may be deferred. Various elections are available to the Fund, which may mitigate the effects of the straddle rules, particularly with respect to mixed straddles. In general, the straddle rules described above do not apply to any straddles held by the Fund if all of the offsetting positions consist of Section 1256 contracts.

Certain rules may affect the timing and character of gain if the Fund engages in transactions that reduce or eliminate its risk of loss with respect to appreciated financial positions. If the Fund enters into certain transactions in property while holding substantially identical property, the Fund would be treated as if it had sold and immediately repurchased the property and would be taxed on any gain (but not loss) from the constructive sale. The character of gain from a constructive sale would depend upon the Fund’s holding period in the property. Loss from a constructive sale would be recognized when the property was subsequently disposed of, and its character would depend on the Fund’s holding period and the application of various loss deferral provisions of the Code.

Under the Code, gains or losses attributable to fluctuations in exchange rates which occur between the time the Fund accrues interest or other receivables or accrues expenses or other liabilities denominated in a foreign currency and the time the Fund actually collects such receivables or pays such liabilities are treated as ordinary income or ordinary loss. Similarly, gains or losses from the disposition of foreign currencies, from the disposition of debt securities denominated in a foreign currency, or from the disposition of a forward contract, certain financial contracts or options denominated in a foreign currency which are attributable to fluctuations in the value of the foreign currency between the date of acquisition of the asset and the date of disposition also are treated as ordinary income or loss. These gains or losses, referred to under the Code as “Section 988” gains or losses, generally increase or decrease the amount of the Fund’s investment company taxable income available to be distributed to its shareholders as ordinary income, rather than increasing or decreasing the amount of the Fund's net capital gain.

The Fund may invest in shares of foreign corporations which may be classified under the Internal Revenue Code as passive foreign investment companies (“PFICs”). In general, a foreign corporation is classified as a PFIC if at least one-half of its assets constitute investment-type assets or 75% or more of its gross income is investment-type income. If the Fund receives a so-called “excess distribution” with respect to PFIC stock, the Fund itself may be subject to a tax on a portion of the excess distribution, whether or not the corresponding income is distributed by the Fund to shareholders. In general, under the PFIC rules, an excess distribution is treated as having been realized ratably over the period during which the Fund held the PFIC shares. The Fund itself will be subject to tax on the portion, if any, of an excess distribution that is so allocated to prior Fund taxable years and an interest factor will be added to the tax, as if the tax had been payable in such prior taxable years. Certain distributions from a PFIC as well as gain from the sale of PFIC shares are treated as excess distributions. Excess distributions are characterized as

ordinary income even though, absent application of the PFIC rules, certain excess distributions might have been classified as capital gain.

The Fund may be eligible to elect alternative tax treatment with respect to PFIC shares. Under an election that currently is available in some circumstances, the Fund generally would be required to include in its gross income its share of the earnings of a PFIC on a current basis, regardless of whether distributions are received from the PFIC in a given year. If this election were made, the special rules, discussed above, relating to the taxation of excess distributions, would not apply.

Alternatively, the Fund may elect to mark-to-market its PFIC shares at the end of each tax year (as well as on certain other dates as prescribed in the Code), with the result that unrealized gains would be treated as though they were realized and reported as ordinary income. Any mark-to-market losses would be deductible as ordinary losses to the extent of any net mark-to-market gains included in income in prior tax years.

Because the application of the PFIC rules may affect, among other things, the character of gains, the amount of gain or loss and the timing of the recognition of income with respect to PFIC shares, as well as subject the Fund itself to tax on certain income from PFIC shares, the amount that must be distributed to shareholders, and which will be taxed to shareholders as ordinary income or long-term capital gain, may be increased or decreased substantially as compared to the fund that did not invest in PFIC shares. Note that distributions from a PFIC are not eligible for the reduced rate of tax on “qualified dividend income.”

The Fund or some of the REITs in which the Fund may invest will be permitted to hold residual interests in real estate mortgage investment conduits (“REMIC”s). Under Treasury regulations not yet issued, but that may apply retroactively, a portion of the Fund’s income from a REIT that is attributable to the REIT’s residual interest in a REMIC (referred to in the Code as an “excess inclusion”) will be subject to federal income tax in all events. These regulations are expected to provide that excess inclusion income of a RIC, such as the Fund, will be allocated to shareholders of the RIC in proportion to the dividends received by shareholders, with the same consequences as if shareholders held the related REMIC residual interest directly.

In general, excess inclusion income allocated to shareholders (i) cannot be offset by net operating losses (subject to a limited exception for certain thrift institutions), (ii) will constitute unrelated business taxable income to entities (including a qualified pension plan, an individual retirement account, a 401(k) plan, a Keogh plan or other tax-exempt entity) subject to tax on unrelated business income, thereby potentially requiring such an entity that is allocated excess inclusion income, and that otherwise might not be required to file a tax return, to file a tax return and pay tax on such income, and (iii) in the case of a non-U.S. shareholder, will not qualify for any reduction in U.S. federal withholding tax.

If at any time during any taxable year a “disqualified organization” (as defined in the Code) is a record holder of a share in a RIC, then the RIC will be subject to a tax equal to that portion of its excess inclusion income for the taxable year that is allocable to the disqualified organization, multiplied by the highest federal income tax rate imposed on corporations. It is not expected that a substantial portion of the Fund’s assets will be residual interests in REMICs. Additionally, the Fund does not intend to invest in REITs in which a substantial portion of the assets will consist of residual interests in REMICs.

The Fund may invest in MLPs that are expected to be treated as partnerships for U.S. federal income tax purposes. The cash distributions received by the Fund from an MLP may not correspond to the amount of income allocated to the Fund by the MLP in any given taxable year. If the amount of income allocated by an MLP to the Fund exceeds the amount of cash received by the Fund from such MLP, the Fund may have difficulty making distributions to its

shareholders in the amounts necessary to satisfy the requirements for maintaining its status as a regulated investment company or avoiding U.S. federal income or excise taxes. Accordingly, the Fund may have to dispose of securities under disadvantageous circumstances in order to generate sufficient cash to satisfy such requirements.

Federal Excise Tax

A 4% nondeductible excise tax is imposed on a regulated investment company that fails to distribute in each calendar year an amount at least equal to the sum of: (1) 98% of its ordinary taxable income (taking into account certain deferrals and elections) for the calendar year; (2) 98.2% of its capital gain net income (adjusted for certain ordinary losses) for the one-year period ended on October 31 of the calendar year; plus (3) all ordinary taxable income and capital gains for previous years that were not distributed during such years. The balance of the Fund's income must be distributed during the next calendar year. The Fund will be treated as having distributed any amount on which it is subject to income tax for any tax year ending in the calendar year.

For purposes of calculating the excise tax, the Fund: (1) reduces its capital gain net income (but not below its net capital gain) by the amount of any net ordinary loss for the calendar year; and (2) excludes foreign currency gains and losses (and certain other ordinary gains and losses) incurred after October 31 of any year in determining the amount of ordinary taxable income for the current calendar year. The Fund will include foreign currency gains and losses incurred after October 31 in determining ordinary taxable income for the succeeding calendar year.

The Fund intends to make sufficient distributions of its ordinary taxable income and capital gain net income prior to the end of each calendar year to avoid liability for the excise tax. Investors should note, however, that the Fund might in certain circumstances be required to liquidate portfolio investments to make sufficient distributions to avoid excise tax liability.

Sale, Exchange or Redemption of Shares

In general, you will recognize gain or loss on the sale, exchange or redemption of shares of the Fund in an amount equal to the difference between the proceeds of the sale, exchange or redemption and your adjusted tax basis in the shares. All or a portion of any loss so recognized may be disallowed if you purchase (for example, by reinvesting dividends) Fund shares within 30 days before or after the sale, exchange or redemption (a "wash sale"). If disallowed, the loss will be reflected in an upward adjustment to the basis of the shares purchased. In general, any gain or loss arising from the sale, exchange or redemption of shares of the Fund will be considered capital gain or loss and will be long-term capital gain or loss if the shares were held for longer than one year. Any capital loss arising from the sale, exchange or redemption of shares held for six months or less, however, will be treated as a long-term capital loss to the extent of the amount of distributions of net capital gain received on such shares. In determining the holding period of such shares for this purpose, any period during which your risk of loss is offset by means of options, short sales or similar transactions is not counted. Capital losses in any year are deductible only to the extent of capital gains plus, in the case of a non-corporate taxpayer, \$3,000 of ordinary income.

The Fund (or its administrative agent) is required to report to the IRS and furnish to shareholders the cost basis information for sale transactions of shares. Shareholders may elect to have one of several cost basis methods applied to their account when calculating the cost basis of shares sold, including average cost, FIFO ("first-in, first-out") or some other specific identification method. Unless you instruct otherwise, the Fund will use average cost as its default cost basis method. The cost basis method a shareholder elects may not be changed with respect to a redemption of shares after the settlement date of the redemption. Shareholders should consult with their tax advisors to determine the best cost basis method for their tax situation. Shareholders that hold their shares through a financial

intermediary should contact such financial intermediary with respect to reporting of cost basis and available elections for their accounts.

Backup Withholding

The Fund will be required in certain cases to withhold and remit to the U.S. Treasury at a rate under current law of 24% of taxable distributions and the proceeds of redemptions of shares paid to you if you: (1) have failed to provide your correct taxpayer identification number; (2) are otherwise subject to backup withholding by the IRS for failure to report the receipt of interest or dividend income properly; or (3) have failed to certify to the Fund that you are not subject to backup withholding or that you are a corporation or other “exempt recipient.” Backup withholding is not an additional tax; rather any amounts so withheld may be credited against your Federal income tax liability or refunded if proper documentation is provided.

State and Local Taxes

The tax rules of the various states of the U.S. and their local jurisdictions with respect to an investment in the Fund can differ from the Federal income taxation rules described above. These state and local rules are not discussed herein. You are urged to consult your tax advisor as to the consequences of state and local tax rules with respect to an investment in the Fund.

Foreign Income Tax

Investment income received by the Fund from sources within foreign countries may be subject to foreign income taxes withheld at the source. The United States has entered into tax treaties with many foreign countries that may entitle the Fund to a reduced rate of such taxes or exemption from taxes on such income. It is impossible to know the effective rate of foreign tax in advance since the amount of the Fund’s assets to be invested within various countries cannot be determined. If more than 50% of the value of the Fund's total assets at the close of its taxable year consists of stocks or securities of foreign corporations, or if at least 50% of the value of the Fund’s total assets at the close of each quarter of its taxable year is represented by interests in other regulated investment companies, the Fund will be eligible and intends to file an election with the IRS to pass through to its shareholders the amount of foreign taxes paid by the Fund subject to certain exceptions. However, there can be no assurance that the Fund will be able to do so. Pursuant to this election, you will be required to (1) include in gross income (in addition to taxable dividends actually received) your pro rata share of foreign taxes paid by the Fund, (2) treat your pro rata share of such foreign taxes as having been paid by you and (3) either deduct such pro rata share of foreign taxes in computing your taxable income or treat such foreign taxes as a credit against Federal income taxes. You may be subject to rules which limit or reduce your ability to fully deduct, or claim a credit for, your pro rata share of the foreign taxes paid by the Fund.

Foreign Shareholders

The foregoing discussion relates only to U.S. Federal income tax law as applicable to U.S. persons (i.e., U.S. citizens and residents and U.S. domestic corporations, partnerships, trusts and estates). Shareholders who are not U.S. persons (“foreign shareholders”) should consult their tax advisers regarding U.S. and foreign tax consequences of ownership of shares of the Fund including the likelihood that taxable distributions to them would be subject to withholding of U.S. tax at a rate of 30% (or a lower treaty rate for eligible investors). Two categories of dividends, “short-term capital gain dividends” and “interest-related dividends,” if reported by the Fund in writing to its shareholders, are generally exempt from such withholding tax. “Short-term capital gain dividends” are dividends that are attributable to net short-term capital gain, computed with certain adjustments. “Interest-related dividends”

are dividends that are attributable to “qualified net interest income” (i.e., “qualified interest income,” which generally consists of certain original issue discount, interest on obligations “in registered form,” and interest on deposits, less allocable deductions) from sources within the United States. Depending on the circumstances, the Fund may report all, some or none of the Fund’s potentially eligible dividends as eligible for exemption from withholding tax, and a portion of the Fund’s distributions (e.g., interest and dividends from non-U.S. sources or any non-U.S. currency gains) would be ineligible for such exemption. In order to qualify for this exemption from withholding, a non-U.S. shareholder must have provided appropriate withholding certificates (e.g., an executed W-8BEN, etc.) certifying foreign status. An investment in the Fund may also be included in determining a foreign shareholder’s U.S. estate tax liability.

The Fund is required to withhold U.S. tax (at a 30% rate) on payments of taxable dividends made to certain non-U.S. entities that fail to comply (or be deemed compliant) with extensive reporting and withholding requirements designed to inform the U.S. Department of the Treasury of U.S.-owned foreign investment accounts. Shareholders may be requested to provide additional information to the Fund to enable the Fund to determine whether withholding is required.

OTHER MATTERS

Control Persons and Principal Shareholders

A principal shareholder is any person who owns of record or beneficially 5% or more of the outstanding shares of the Fund. A control person is one who owns beneficially or through controlled companies more than 25% of the voting securities of the Fund or acknowledges the existence of control.

No information about ownership of the Fund by the Trustees and officers, as a group, is provided because the Fund had not commenced operations prior to the date of this SAI.

No principal shareholder information is provided for the Fund because the Fund had not commenced operations prior to the date of this SAI.

Proxy Voting Procedures

The Board has adopted Proxy Voting Policies and Procedures (the “Trust Proxy Voting Policies”) on behalf of the Trust which delegate the responsibility for voting proxies to the Adviser, as applicable, subject to the Board’s continuing oversight. The Trust Proxy Voting Policies require that the Adviser vote proxies received in a manner consistent with the best interests of the Fund and its shareholders. The Adviser has adopted its own separate Proxy Voting Policies and Procedures (the “Adviser’s Proxy Voting Policies”), and copies of the Adviser’s Proxy Voting Policies are attached hereto in [Appendix B](#) to this SAI.

The Adviser recognizes that under certain circumstances it may have a conflict of interest in voting proxies on behalf of the Fund. A “conflict of interest,” means any circumstance when the Adviser (including their respective officers, directors, agents and employees) knowingly does business with, receives compensation from, or sits on the board of, a particular issuer or closely affiliated entity, and, therefore, may appear to have a conflict of interest between its own interests and the interests of the Fund and its shareholders in how proxies of that particular issuer are voted. The Adviser will comply with the Trust Proxy Voting Procedures as they relate to the resolution of conflicts of interest with respect to voting shares of the Fund.

The Trust will file a Form N-PX containing the Fund's complete proxy voting record for the 12-months ended June 30, no later than August 31st of each year. When available, Form N-PX for the Fund will be provided without charge, upon request, by calling (800) 540-6807 (toll free) or (414) 203-9064 and also on the SEC's website at www.sec.gov.

Code of Ethics

The Trust, the Adviser, and the Distributor have each adopted a code of ethics under Rule 17j-1 of the 1940 Act which are designed to eliminate conflicts of interest between the Fund and personnel of the Trust, the Adviser, and the Distributor. The codes permit such personnel to invest in securities, including securities that may be purchased or held by the Fund, subject to certain limitations.

Registration Statement

This SAI and the Prospectus do not contain all the information included in the Trust's registration statement filed with the SEC under the 1933 Act with respect to the securities offered hereby. The registration statement, including the exhibits filed therewith, are available on the SEC's website at www.sec.gov.

Statements contained herein and in the Prospectus as to the contents of any contract or other documents are not necessarily complete, and, in each instance, are qualified by, reference to the copy of such contract or other documents filed as exhibits to the registration statement.

Capital Stock

The Declaration of Trust authorizes the Board of Trustees to issue an unlimited number of shares, which are shares of beneficial interest. The Trust's Declaration of Trust authorizes the Board of Trustees to divide or redivide any unissued shares of the Trust into one or more additional series by setting or changing in any one or more respects their respective preferences, conversion or other rights, voting power, restrictions, limitations as to dividends, qualifications, and terms and conditions of redemption, and to establish separate classes of shares. Shares have no subscription or preemptive rights and only such conversion or exchange rights as the Board of Trustees may grant in its discretion. When issued for payment as described in the Prospectus and this SAI, the shares will be fully paid and non-assessable.

The Board of Trustees has authorized three separate classes of shares for the Fund - Institutional Shares, Investor Shares and Advisor Shares. The shares of each class of the Fund represent an interest in the same portfolio of investments of the Fund. Some classes may currently not be available for sale by the Fund.

With respect to voting rights of shareholders, each share outstanding entitles the holder to one vote. On certain issues, such as the election of Trustees, all shares of the Trust vote together. The shareholders of the Fund, however, would vote separately on issues affecting only the Fund, such as the approval of a change in the fundamental investment restriction for the Fund. Also, the shareholders of a particular class will vote separately on issues affecting only that particular class.

With respect to dividend rights, the shareholders of each class of the Fund are entitled to receive dividends or other distributions declared by the Fund for each such class. No shares of the Fund have priority or preference over any other shares of the Fund with respect to distributions. Distributions will be made from the assets of the Fund and will be paid pro rata to all shareholders of a particular class according to the number of shares of the class held by shareholders on the record date. The amount of dividends per share may vary between separate share classes of the

Fund based upon differences in the net asset values of the different classes and differences in the way that expenses are allocated between share classes pursuant to a multiple class plan approved by the Fund's Board of Trustees.

Financial Statements

Financial statements certified by an independent registered public accounting firm will be submitted to shareholders at least annually. The Fund had not commenced operations as of the date of this SAI and does not yet have financial statements.

Once available, copies of the Annual Report to Shareholders may be obtained, without charge, upon request by contacting U.S. Bancorp Fund Services, LLC at the address or telephone number listed on the cover of this SAI.

APPENDIX A – DESCRIPTION OF SECURITIES RATINGS

Short-Term Credit Ratings

An *S&P Global Ratings* short-term issue credit rating is generally assigned to those obligations considered short-term in the relevant market. The following summarizes the rating categories used by S&P Global Ratings for short-term issues:

“A-1” - A short-term obligation rated “A-1” is rated in the highest category by S&P Global Ratings. The obligor’s capacity to meet its financial commitments on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor’s capacity to meet its financial commitment on these obligations is extremely strong.

“A-2” - A short-term obligation rated “A-2” is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor’s capacity to meet its financial commitments on the obligation is satisfactory.

“A-3” - A short-term obligation rated “A-3” exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to weaken an obligor’s capacity to meet its financial commitments on the obligation.

“B” - A short-term obligation rated “B” is regarded as vulnerable and has significant speculative characteristics. The obligor currently has the capacity to meet its financial commitments; however, it faces major ongoing uncertainties that could lead to the obligor’s inadequate capacity to meet its financial commitments.

“C” - A short-term obligation rated “C” is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitments on the obligation.

“D” - A short-term obligation rated “D” is in default or in breach of an imputed promise. For non-hybrid capital instruments, the “D” rating category is used when payments on an obligation are not made on the date due, unless S&P Global Ratings believes that such payments will be made within any stated grace period. However, any stated grace period longer than five business days will be treated as five business days. The “D” rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. A rating on an obligation is lowered to “D” if it is subject to a distressed debt restructuring.

Local Currency and Foreign Currency Ratings - S&P Global Ratings’ issuer credit ratings make a distinction between foreign currency ratings and local currency ratings. A foreign currency rating on an issuer can differ from the local currency rating on it when the obligor has a different capacity to meet its obligations denominated in its local currency, versus obligations denominated in a foreign currency.

“NR” - This indicates that a rating has not been assigned or is no longer assigned.

Moody’s Investors Service (“Moody’s”) short-term ratings are forward-looking opinions of the relative credit risks of financial obligations with an original maturity of thirteen months or less and reflect both on the likelihood of a default or impairment on contractual financial obligations and the expected financial loss suffered in the event of default or impairment.

Moody's employs the following designations to indicate the relative repayment ability of rated issuers:

"P-1" - Issuers (or supporting institutions) rated Prime-1 reflect a superior ability to repay short-term obligations.

"P-2" - Issuers (or supporting institutions) rated Prime-2 reflect a strong ability to repay short-term obligations.

"P-3" - Issuers (or supporting institutions) rated Prime-3 reflect an acceptable ability to repay short-term obligations.

"NP" - Issuers (or supporting institutions) rated Not Prime do not fall within any of the Prime rating categories.

"NR" - Is assigned to an unrated issuer.

Fitch, Inc. / Fitch Ratings Ltd. ("Fitch") short-term issuer or obligation rating is based in all cases on the short-term vulnerability to default of the rated entity and relates to the capacity to meet financial obligations in accordance with the documentation governing the relevant obligation. Short-term deposit ratings may be adjusted for loss severity. Short-term ratings are assigned to obligations whose initial maturity is viewed as "short-term" based on market convention.¹ Typically, this means up to 13 months for corporate, sovereign, and structured obligations and up to 36 months for obligations in U.S. public finance markets. The following summarizes the rating categories used by Fitch for short-term obligations:

"F1" - Securities possess the highest short-term credit quality. This designation indicates the strongest intrinsic capacity for timely payment of financial commitments; may have an added "+" to denote any exceptionally strong credit feature.

"F2" - Securities possess good short-term credit quality. This designation indicates good intrinsic capacity for timely payment of financial commitments.

"F3" - Securities possess fair short-term credit quality. This designation indicates that the intrinsic capacity for timely payment of financial commitments is adequate.

"B" - Securities possess speculative short-term credit quality. This designation indicates minimal capacity for timely payment of financial commitments, plus heightened vulnerability to near term adverse changes in financial and economic conditions.

"C" - Securities possess high short-term default risk. Default is a real possibility.

"RD" - Restricted default. Indicates an entity that has defaulted on one or more of its financial commitments, although it continues to meet other financial obligations. Typically applicable to entity ratings only.

"D" - Default. Indicates a broad-based default event for an entity, or the default of a short-term obligation.

¹ A long-term rating can also be used to rate an issue with short maturity.

Plus (+) or minus (-) - The “F1” rating may be modified by the addition of a plus (+) or minus (-) sign to show the relative status within that major rating category.

“NR” - Is assigned to an unrated issue of a rated issuer.

The *DBRS Morningstar® Ratings Limited (“DBRS Morningstar”)* short-term debt rating scale provides an opinion on the risk that an issuer will not meet its short-term financial obligations in a timely manner. Ratings are based on quantitative and qualitative considerations relevant to the issuer and the relative ranking of claims. The R-1 and R-2 rating categories are further denoted by the sub-categories “(high)”, “(middle)”, and “(low)”.

The following summarizes the ratings used by DBRS Morningstar for commercial paper and short-term debt:

“R-1 (high)” - Short-term debt rated “R-1 (high)” is of the highest credit quality. The capacity for the payment of short-term financial obligations as they fall due is exceptionally high. Unlikely to be adversely affected by future events.

“R-1 (middle)” - Short-term debt rated “R-1 (middle)” is of superior credit quality. The capacity for the payment of short-term financial obligations as they fall due is very high. Differs from “R-1 (high)” by a relatively modest degree. Unlikely to be significantly vulnerable to future events.

“R-1 (low)” - Short-term debt rated “R-1 (low)” is of good credit quality. The capacity for the payment of short-term financial obligations as they fall due is substantial. Overall strength is not as favorable as higher rating categories. May be vulnerable to future events, but qualifying negative factors are considered manageable.

“R-2 (high)” - Short-term debt rated “R-2 (high)” is considered to be at the upper end of adequate credit quality. The capacity for the payment of short-term financial obligations as they fall due is acceptable. May be vulnerable to future events.

“R-2 (middle)” - Short-term debt rated “R-2 (middle)” is considered to be of adequate credit quality. The capacity for the payment of short-term financial obligations as they fall due is acceptable. May be vulnerable to future events or may be exposed to other factors that could reduce credit quality.

“R-2 (low)” - Short-term debt rated “R-2 (low)” is considered to be at the lower end of adequate credit quality. The capacity for the payment of short-term financial obligations as they fall due is acceptable. May be vulnerable to future events. A number of challenges are present that could affect the issuer’s ability to meet such obligations.

“R-3” - Short-term debt rated “R-3” is considered to be at the lowest end of adequate credit quality. There is a capacity for the payment of short-term financial obligations as they fall due. May be vulnerable to future events and the certainty of meeting such obligations could be impacted by a variety of developments.

“R-4” - Short-term debt rated “R-4” is considered to be of speculative credit quality. The capacity for the payment of short-term financial obligations as they fall due is uncertain.

“R-5” - Short-term debt rated “R-5” is considered to be of highly speculative credit quality. There is a high level of uncertainty as to the capacity to meet short-term financial obligations as they fall due.

“D” - Short-term debt rated “D” is assigned when the issuer has filed under any applicable bankruptcy, insolvency or winding up statute or there is a failure to satisfy an obligation after the exhaustion of grace periods, a downgrade to “D” may occur. DBRS Morningstar may also use “SD” (Selective Default) in cases where only some securities are impacted, such as the case of a “distressed exchange”.

Long-Term Credit Ratings

The following summarizes the ratings used by *S&P Global Ratings* for long-term issues:

“AAA” - An obligation rated “AAA” has the highest rating assigned by S&P Global Ratings. The obligor’s capacity to meet its financial commitments on the obligation is extremely strong.

“AA” - An obligation rated “AA” differs from the highest-rated obligations only to a small degree. The obligor’s capacity to meet its financial commitments on the obligation is very strong.

“A” - An obligation rated “A” is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories.

However, the obligor’s capacity to meet its financial commitments on the obligation is still strong.

“BBB” - An obligation rated “BBB” exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to weaken the obligor’s capacity to meet its financial commitments on the obligation.

“BB,” “B,” “CCC,” “CC” and “C” - Obligations rated “BB,” “B,” “CCC,” “CC” and “C” are regarded as having significant speculative characteristics. “BB” indicates the least degree of speculation and “C” the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposure to adverse conditions.

“BB” - An obligation rated “BB” is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions that could lead to the obligor’s inadequate capacity to meet its financial commitments on the obligation.

“B” - An obligation rated “B” is more vulnerable to nonpayment than obligations rated “BB”, but the obligor currently has the capacity to meet its financial commitments on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor’s capacity or willingness to meet its financial commitments on the obligation.

“CCC” - An obligation rated “CCC” is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitments on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitments on the obligation.

“CC” - An obligation rated “CC” is currently highly vulnerable to nonpayment. The “CC” rating is used when a default has not yet occurred but S&P Global Ratings expects default to be a virtual certainty, regardless of the anticipated time to default.

“C” - An obligation rated “C” is currently highly vulnerable to nonpayment, and the obligation is expected to have lower relative seniority or lower ultimate recovery compared with obligations that are rated higher.

“D” - An obligation rated “D” is in default or in breach of an imputed promise. For non-hybrid capital instruments, the “D” rating category is used when payments on an obligation are not made on the date due, unless S&P Global Ratings believes that such payments will be made within five business days in the absence of a stated grace period or within the earlier of the stated grace period or 30 calendar days. The “D” rating also will be used upon the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. A rating on an obligation is lowered to “D” if it is subject to a distressed debt restructuring.

Plus (+) or minus (-) - The ratings from “AA” to “CCC” may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the rating categories.

“NR” - This indicates that a rating has not been assigned, or is no longer assigned.

Local Currency and Foreign Currency Ratings - S&P Global Ratings’ issuer credit ratings make a distinction between foreign currency ratings and local currency ratings. A foreign currency rating on an issuer can differ from the local currency rating on it when the obligor has a different capacity to meet its obligations denominated in its local currency, versus obligations denominated in a foreign currency.

Moody’s long-term ratings are forward-looking opinions of the relative credit risks of financial obligations with an original maturity of one year or more. Such ratings reflect both on the likelihood of default or impairment on contractual financial obligations and the expected financial loss suffered in the event of default or impairment. The following summarizes the ratings used by Moody’s for long-term debt:

“Aaa” - Obligations rated “Aaa” are judged to be of the highest quality, subject to the lowest level of credit risk.

“Aa” - Obligations rated “Aa” are judged to be of high quality and are subject to very low credit risk.

“A” - Obligations rated “A” are judged to be upper-medium grade and are subject to low credit risk.

“Baa” - Obligations rated “Baa” are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.

“Ba” - Obligations rated “Ba” are judged to be speculative and are subject to substantial credit risk.

“B” - Obligations rated “B” are considered speculative and are subject to high credit risk.

“Caa” - Obligations rated “Caa” are judged to be speculative of poor standing and are subject to very high credit risk.

“Ca” - Obligations rated “Ca” are highly speculative and are likely in, or very near, default, with some prospect of recovery of principal and interest.

“C” - Obligations rated “C” are the lowest rated and are typically in default, with little prospect for recovery of principal or interest.

Note: Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from "Aa" through "Caa." The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

"NR" - Is assigned to unrated obligations.

The following summarizes long-term ratings used by *Fitch*:

"AAA" - Securities considered to be of the highest credit quality. "AAA" ratings denote the lowest expectation of credit risk. They are assigned only in cases of exceptionally strong capacity for payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.

"AA" - Securities considered to be of very high credit quality. "AA" ratings denote expectations of very low credit risk. They indicate very strong capacity for payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

"A" - Securities considered to be of high credit quality. "A" ratings denote expectations of low credit risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.

"BBB" - Securities considered to be of good credit quality. "BBB" ratings indicate that expectations of credit risk are currently low. The capacity for payment of financial commitments is considered adequate, but adverse business or economic conditions are more likely to impair this capacity.

"BB" - Securities considered to be speculative. "BB" ratings indicate that there is an elevated vulnerability to credit risk, particularly in the event of adverse changes in business or economic conditions over time; however, business or financial alternatives may be available to allow financial commitments to be met.

"B" - Securities considered to be highly speculative. "B" ratings indicate that material credit risk is present

"CCC" - A "CCC" rating indicates that substantial credit risk is present.

"CC" - A "CC" rating indicates very high levels of credit risk.

"C" - A "C" rating indicates exceptionally high levels of credit risk.

Defaulted obligations typically are not assigned "RD" or "D" ratings but are instead rated in the "CCC" to "C" rating categories, depending on their recovery prospects and other relevant characteristics. Fitch believes that this approach better aligns obligations that have comparable overall expected loss but varying vulnerability to default and loss.

Plus (+) or minus (-) may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the "AAA" obligation rating category, or to corporate finance obligation ratings in the categories below "CCC".

"NR" - Is assigned to an unrated issue of a rated issuer.

The **DBRS** Morningstar long-term rating scale provides an opinion on the risk of default. That is, the risk that an issuer will fail to satisfy its financial obligations in accordance with the terms under which an obligation has been issued. Ratings are based on quantitative and qualitative considerations relevant to the issuer, and the relative ranking of claims. All rating categories other than AAA and D also contain subcategories “(high)” and “(low)”. The absence of either a “(high)” or “(low)” designation indicates the rating is in the middle of the category. The following summarizes the ratings used by DBRS Morningstar for long-term debt:

“AAA” - Long-term debt rated “AAA” is of the highest credit quality. The capacity for the payment of financial obligations is exceptionally high and unlikely to be adversely affected by future events.

“AA” - Long-term debt rated “AA” is of superior credit quality. The capacity for the payment of financial obligations is considered high. Credit quality differs from “AAA” only to a small degree. Unlikely to be significantly vulnerable to future events.

“A” - Long-term debt rated “A” is of good credit quality. The capacity for the payment of financial obligations is substantial, but of lesser credit quality than “AA.” May be vulnerable to future events, but qualifying negative factors are considered manageable.

“BBB” - Long-term debt rated “BBB” is of adequate credit quality. The capacity for the payment of financial obligations is considered acceptable. May be vulnerable to future events.

“BB” - Long-term debt rated “BB” is of speculative, non-investment grade credit quality. The capacity for the payment of financial obligations is uncertain. Vulnerable to future events.

“B” - Long-term debt rated “B” is of highly speculative credit quality. There is a high level of uncertainty as to the capacity to meet financial obligations.

“CCC”, “CC” and “C” - Long-term debt rated in any of these categories is of very highly speculative credit quality. In danger of defaulting on financial obligations. There is little difference between these three categories, although “CC” and “C” ratings are normally applied to obligations that are seen as highly likely to default, or subordinated to obligations rated in the “CCC” to “B” range. Obligations in respect of which default has not technically taken place but is considered inevitable may be rated in the “C” category.

“D” - A security rated “D” is assigned when the issuer has filed under any applicable bankruptcy, insolvency or winding up statute or there is a failure to satisfy an obligation after the exhaustion of grace periods, a downgrade to “D” may occur. DBRS Morningstar may also use “SD”

(Selective Default) in cases where only some securities are impacted, such as the case of a “distressed exchange”.

Municipal Note Ratings

An **S&P Global Ratings** U.S. municipal note rating reflects S&P Global Ratings’ opinion about the liquidity factors and market access risks unique to the notes. Notes due in three years or less will likely receive a note rating. Notes with an original maturity of more than three years will most likely receive a long-term debt rating. In determining which type of rating, if any, to assign, S&P Global Ratings’ analysis will review the following considerations:

- Amortization schedule - the larger the final maturity relative to other maturities, the more likely it will be treated as a note; and
- Source of payment - the more dependent the issue is on the market for its refinancing, the more likely it will be treated as a note.

Municipal Short-Term Note rating symbols are as follows:

“SP-1” - A municipal note rated “SP-1” exhibits a strong capacity to pay principal and interest. An issue determined to possess a very strong capacity to pay debt service is given a plus (+) designation.

“SP-2” - A municipal note rated “SP-2” exhibits a satisfactory capacity to pay principal and interest, with some vulnerability to adverse financial and economic changes over the term of the notes.

“SP-3” - A municipal note rated “SP-3” exhibits a speculative capacity to pay principal and interest.

“D” - This rating is assigned upon failure to pay the note when due, completion of a distressed debt restructuring, or the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions.

Moody’s uses the global short-term Prime rating scale (listed above under Short-Term Credit Ratings) for commercial paper issued by U.S. municipalities and nonprofits. These commercial paper programs may be backed by external letters of credit or liquidity facilities, or by an issuer’s self-liquidity.

For other short-term municipal obligations, *Moody’s* uses one of two other short-term rating scales, the Municipal Investment Grade (“MIG”) and Variable Municipal Investment Grade (“VMIG”) scales provided below.

Moody’s uses the MIG scale for U.S. municipal cash flow notes, bond anticipation notes and certain other short-term obligations, which typically mature in three years or less. Under certain circumstances, *Moody’s* uses the MIG scale for bond anticipation notes with maturities of up to five years.

MIG Scale

“MIG-1” - This designation denotes superior credit quality. Excellent protection is afforded by established cash flows, highly reliable liquidity support, or demonstrated broad-based access to the market for refinancing.

“MIG-2” - This designation denotes strong credit quality. Margins of protection are ample, although not as large as in the preceding group.

“MIG-3” - This designation denotes acceptable credit quality. Liquidity and cash-flow protection may be narrow, and market access for refinancing is likely to be less well-established.

“SG” - This designation denotes speculative-grade credit quality. Debt instruments in this category may lack sufficient margins of protection.

“NR” - Is assigned to an unrated obligation.

In the case of variable rate demand obligations (“VRDOs”), a two-component rating is assigned. The components are a long term rating and a short-term demand obligation rating. The long-term rating addresses the issuer’s ability to meet scheduled principal and interests payments. The short-term demand obligation rating addresses the ability of the issuer or the liquidity provider to make payments associated with the purchase-price-upon demand feature (“demand feature”) of the VRDO. The short-term demand obligation rating uses the VMIG scale. VMIG ratings with liquidity support use as an input the short-term Counterparty Risk Assessment of the support provider, or the long-term rating of the underlying obligor in the absence of third party liquidity support. Transitions of VMIG ratings of demand obligations with conditional liquidity support differ from transitions on the Prime scale to reflect the risk that external liquidity support will terminate if the issuer’s long-term rating drops below investment grade.

Moody’s typically assigns the VMIG short-term demand obligation rating if the frequency of the demand feature is less than every three years. If the frequency of the demand feature is less than three years but the purchase price is payable only with remarketing proceeds, the short-term demand obligation rating is “NR”.

“VMIG-1” - This designation denotes superior credit quality. Excellent protection is afforded by the superior short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

“VMIG-2” - This designation denotes strong credit quality. Good protection is afforded by the strong short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

“VMIG-3” - This designation denotes acceptable credit quality. Adequate protection is afforded by the satisfactory short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

“SG” - This designation denotes speculative-grade credit quality. Demand features rated in this category may be supported by a liquidity provider that does not have a sufficiently strong short-term rating or may lack the structural and/or legal protections necessary to ensure the timely payment of purchase price upon demand.

“NR” - Is assigned to an unrated obligation.

About Credit Ratings

An ***S&P Global Ratings*** issue credit rating is a forward-looking opinion about the creditworthiness of an obligor with respect to a specific financial obligation, a specific class of financial obligations, or a specific financial program (including ratings on medium-term note programs and commercial paper programs). It takes into consideration the creditworthiness of guarantors, insurers, or other forms of credit enhancement on the obligation and takes into account the currency in which the obligation is denominated. The opinion reflects S&P Global Ratings’ view of the obligor’s capacity and willingness to meet its financial commitments as they come due, and this opinion may assess terms, such as collateral security and subordination, which could affect ultimate payment in the event of default.

Ratings assigned on ***Moody’s*** global long-term and short-term rating scales are forward-looking opinions of the relative credit risks of financial obligations issued by non-financial corporates, financial institutions, structured finance vehicles, project finance vehicles, and public sector entities.

Fitch's credit ratings are forward-looking opinions on the relative ability of an entity or obligation to meet financial commitments. Issuer default ratings (IDRs) are assigned to corporations, sovereign entities, financial institutions such as banks, leasing companies and insurers, and public finance entities (local and regional governments). Issue level ratings are also assigned, often include an expectation of recovery and may be notched above or below the issuer level rating. Issue ratings are assigned to secured and unsecured debt securities, loans, preferred stock and other instruments. Credit ratings are indications of the likelihood of repayment in accordance with the terms of the issuance. In limited cases, Fitch may include additional considerations (i.e., rate to a higher or lower standard than that implied in the obligation's documentation).

DBRS Morningstar provides independent credit ratings services for financial institutions, corporate and sovereign entities and structured finance products and instruments. Credit ratings are forward-looking opinions about credit risk that reflect the creditworthiness of an entity or security. The Rating Committee process facilitates rating decisions, which are a collective assessment of DBRS Morningstar's opinion rather than the view of an individual analyst. Ratings are based on sufficient information that incorporates both global and local considerations and the use of approved methodologies. They are independent of any actual or perceived conflicts of interest. DBRS Morningstar credit ratings are formed and disseminated based on established methodologies, models and criteria (Methodologies) that apply to entities and securities that we rate, including corporate finance issuers, financial institutions, insurance companies, public finance and sovereign entities as well as Structured Finance transactions. DBRS Morningstar methodologies are periodically reviewed and updated by the team.

APPENDIX B – PROXY VOTING POLICIES

BROWN ADVISORY LLC AND BROWN ADVISORY LIMITED PROXY VOTING POLICY ON SECURITIES

The firm receives proxy ballots on behalf of clients and shall vote such proxies consistent with this Policy, which sets forth the firm’s standard approach to voting on common proxy questions. In general, this Policy is designed to ensure that the firm votes proxies in the best interest of clients, so as to promote the long-term economic value of the underlying securities. These votes are informed by both financial and extra-financial data, including material ESG factors.

Clients may, at any time, opt to change their proxy voting authorization. Upon notice that a client has revoked the firm’s authority to vote proxies, the firm will have the client account removed from omnibus voting and have the proxy setting updated accordingly. This update at the custodian routes all ballots and annual reports to the legal address on record of the account holder.

To facilitate the proxy voting process, the firm has engaged Institutional Shareholder Services (“ISS”), an unaffiliated, third-party proxy voting service, to provide proxy research and voting recommendations. In addition, the firm subscribes to ISS’s proxy vote management system, which provides a means to receive and vote proxies, as well as services for record-keeping, auditing, reporting and disclosure regarding votes. However, securities held within institutional equity strategies are voted on a case-by-case basis, meaning, we do not rely exclusively on the proxy policy, and complement our proxy provider’s research with our own proprietary research to arrive at independent decisions, when needed. The firm will regularly review our relationship with ISS in order to assess its capacity and competency to provide services to the firm and to review certain of its significant policies and procedures, including those governing conflicts of interests, error identification and correction and processes to evaluate additional information received during the proxy process.

On a regular basis, a list of upcoming proxies issued for companies held within the institutional strategies are provided to the institutional portfolio managers. Except in situations identified as presenting material conflicts of interest, the institutional portfolio manager responsible for the institutional strategy that holds the security may make the final voting decision based on a variety of considerations. In circumstances where the securities are not held within an institutional strategy, proxies will be voted according to Brown Advisory’s policy, unless the client-specific guidelines provided by Brown Advisory to ISS specify otherwise. Generally, Brown Advisory’s proxy voting philosophy is aligned with ISS recommendations.

In keeping with its fiduciary obligations to clients, the firm considers each proxy voting proposal related to holdings in the firm’s institutional strategies on its own merits and an independent determination is made based on the relevant facts and circumstances, including both fundamental and ESG factors. Proxy proposals include a wide range of routine and non-routine matters. The firm generally votes with management on routine matters and takes a more case-by-case approach regarding non-routine matters.

Voting preferences of clients may differ based on values. The firm seeks to provide clients with the opportunity to have proxies voted in line with these values. From time to time, clients may prefer to select alternative voting guidelines that better align with their values. In these cases, the firm will work with ISS to identify an appropriate alternative policy. Where no appropriate alternative policy is available, the firm will endeavor to work with the client to set up appropriate guidelines and procedures to vote case-by-case.

Proxy Voting Principles for Securities Held within our Institutional Strategies

- The following principles serve as a foundation of our approach to proxy voting for securities held within our institutional strategies. For these securities, Brown Advisory's equity research team has researched the company and generally is well-informed of any issues material to the company's business model and practices. As such, we believe we are in a position to engage with companies on these issues both through proxy voting and other engagement practices. Proxy voting is a democratic process that offers shareholders the opportunity to have their voice heard and express their sentiment as owners. For this reason, we believe that the rights of shareholders with regard to these resolutions should be protected by regulators to ensure that investors' perspectives can always be heard in a public forum. We seek to participate in industry-wide activities that express support for these rights, such as sign-on letters and other initiatives to communicate views to the SEC, FINRA and other regulatory bodies.
- **Proxy voting is our fiduciary duty.** We hold ourselves responsible for aligning our investment decision-making process and our proxy voting, in order to be consistent about what we seek from companies we hold in our institutional portfolios. We seek investments that are building and protecting long-term shareholder value, and we believe this is reflected in all of our proxy voting decisions. Responsible management of ESG issues is one input to achieving long-term shareholder value, and as such, we are likely to support those shareholder proposals that encourage company action on what we believe are material ESG risks or opportunities.
- **Transparency is essential.** Brown Advisory is committed to providing proxy reporting and standardized disclosure of our voting history, as well as publishing N-PX filings for our mutual funds as required by law. Transparency is an important step in helping our clients evaluate whether we uphold our stated principles within our Sustainable and ESG strategies.
- **Bottom-up due diligence should inform voting decisions.** We review each proposal that comes up for vote. Our analysts seek to dive below the surface and fully understand the implications of especially complex and material proposals. The recommendations of our proxy voting partner, ISS, are taken into consideration but do not determine our final decisions.
- **Collaboration with other stakeholders can inform our voting choice and amplify the signal of our vote.** We collaborate on voting research, through dialogue between our analysts and portfolio managers. Where additive and practicable, we also collaborate with external stakeholders including company management, ISS, issue experts, ESG research networks and other stakeholders. We believe this collaboration leads to better-informed decisions, and in certain instances, collaboration can help to send a stronger message to a company about how the investment community views a given issue.
- **Proxy voting can be a part of a larger program to encourage positive changes.** Proxy voting is just one way to communicate with companies on risks and opportunities. To complement our proxy voting process, and sometimes as a result of it, our investment team might choose to pursue an extended engagement with a company as it relates to any information found during the due-diligence process for determining the vote.

Institutional Proxy Voting Process

- Proxy voting for our institutional investment strategies is overseen by a Proxy Voting Committee made up of equity research analysts, ESG research analysts, trading operations team members, the Head of Sustainable Investing, our Director of Equity Research and our General Counsel (among others).
- The Committee is responsible for overseeing the proxy voting process. Responsibility for determining how a vote is cast, however, rests with our investment and ESG research teams and, ultimately, with the portfolio managers for each Brown Advisory equity investment strategy. While we use the recommendations of ISS as a baseline for our voting, especially for routine management proposals, we vote each proposal after consideration on a case-by-case basis.

- Our customized Proxy Voting Policy, developed in consultation with ISS, is reviewed each year and aims to reflect our fundamental and ESG thinking, so as to achieve as much alignment between recommendations and execution as possible, while still enabling our case-by-case approach.
- A 30-day outlook of upcoming proposals is circulated to our full equity investment research team each week. Fundamental analysts guide vote recommendations on management proposals, and ESG analysts guide vote recommendations on shareholder proposals, with both groups working together to think through the relevant issues.
- Proposals may require additional due diligence and benefit from collaborative investigation, and this is determined on a case-by-case basis. Where necessary, our analysts will conduct research on each proposal, which may include information contained in public filings, policy recommendations and management conversations. When additional proxy materials become available after a voting determination is made, we will seek to consider such filings when they are made sufficiently in advance and where we believe such information would reasonably be expected to affect our voting determination. To enhance our analysis, we may collaborate with our internal and external networks, the resolution filer and/or associated coalition, ISS analysts about their recommendation, the company itself and relevant industry experts. If our additional due diligence uncovers factual errors, incompleteness or inaccuracies in the analysis or recommendation underpinning our vote, the firm will bring this to the attention of ISS.
- The majority of voting recommendations are in line with our Proxy Voting Policy, and in these cases the vote is automatically cast accordingly.
- When our recommendation diverges from the Policy, the responsible analyst will contact the portfolio managers who own the name and who have final decision-making power. In most cases, the portfolio managers agree with the analyst's recommendation, in rare cases they may overrule. In either case, the final recommendation is provided to Brown Advisory's operations team, which documents the rationale for the vote and ensures vote execution. All votes cast against policy require approval from the firm's General Counsel.
- In the event that portfolio managers of different strategies disagree on the vote recommendation for a name they all own, a split vote may be conducted. In general, this disagreement is due to portfolio managers having unique views on an issue. A split vote divides all of the company's shares held by Brown Advisory and splits the vote in accordance with the strategy's share ownership to reflect the individual preferences of each strategy's portfolio manager(s). Split votes trigger a review from the Proxy Voting Committee, and such votes must be approved by the firm's General Counsel.

General Positions

Below is a summary of Brown Advisory's general positions for voting on common proxy questions when Brown Advisory is authorized to vote shares at its discretion rather than by a client's specific guidelines. Given the dynamic and wide-ranging nature of corporate governance issues that may arise, this summary is not intended to be exhaustive.

Management Recommendations

Since the quality and depth of management is a primary factor considered when investing in an issuer, the recommendation of the issuer's management on any issue will be given substantial weight. Furthermore, Brown Advisory runs concentrated equity portfolios which we believe generally results in holding high quality companies that have strong and trustworthy management teams. This quality bias results in our portfolio managers generally supporting management proposals. Although proxies with respect to most issues are voted in line with the recommendation of the issuer's management, the firm will not blindly vote in favor of management. The firm will not support proxy proposals or positions that compromise clients' best interests or that the firm determines may be detrimental to the underlying value of client positions.

Election of Directors.

Although proxies will typically be voted for a management-proposed slate of directors, the firm may vote against (or withhold votes for) such directors if there are compelling corporate governance reasons for doing so. Some of these reasons include where a director: attends less than 75% of board and relevant committee meetings; is the CEO of a company where a serious restatement occurred after the CEO certified the financial statements; served at a time when a poison pill was adopted without shareholder approval within the prior year; is the CFO of the company; has an interlocking directorship; has a perceived conflict of interest (or the director's immediate family member has a perceived conflict of interest); or serves on an excessive number of boards.

The firm seeks to support independent boards of directors comprised of members with diverse backgrounds (including gender and race), a breadth and depth of relevant experience (including sustainability), and a track record of positive, long-term performance. The firm may vote against any boards that do not have the following levels of diversity (i.e. directors who are women or other underrepresented groups):

- For boards consisting of six or fewer directors, the firm may vote against the Nominating Committee Chair where the board does not have one diverse director by 2022, and two diverse directors by 2024.
- For boards consisting of more than six directors, the firm may vote against the Nominating Committee Chair where the board does not have 20% diverse board members by 2022, and 30% diverse directors by 2024.
- In cases where the Nominating Committee Chair is not up for re-election, the firm may vote against other board members including the Chair of the board.

Separation of the roles of Chairman and CEO is generally supported, but the firm will not typically vote against a CEO who serves as chairman or director. In the absence of an independent chairman, however, the firm generally supports the appointment of a lead director with authority to conduct sessions outside the presence of the insider chairman.

The firm will typically vote against any inside director seeking appointment to a key committee (audit, compensation, nominating or governance), since the firm believes that the service of independent directors on such committees best protects and enhances the interests of shareholders. Where insufficient information is provided regarding performance metrics, or where pay is not tied to performance (e.g., where management has excessive discretion to alter performance terms or previously defined targets), the firm will typically vote against the chair of the compensation committee.

Appointment and Rotation of Auditors

Management recommendations regarding selection of an auditor shall generally be supported, but the firm will not support the ratification of an auditor when there appears to be a hindrance on auditor independence, intentional accounting irregularity or negligence by the auditor. Some examples include: when an auditing firm has other relationships with the company that may suggest a conflict of interest; when the auditor bears some responsibility for a restatement by the company; when a company has aggressive accounting policies or lack of transparency in financial statements; and when a company changes auditors as a result of disagreement between the company and the auditor regarding accounting principles or disclosure issues. The firm will generally support proposals for voluntary auditor rotation with reasonable frequency and/or rationale.

Changes in State of Incorporation or Capital Structure

Management recommendations about reincorporation are generally supported unless the new jurisdiction in which the issuer is reincorporating has laws that would dilute the rights of shareholders of the issuer. The firm will

generally vote against reincorporation where it believes the financial benefits are minimal and there is a decrease in shareholder rights. Shareholder proposals to change the company's place of incorporation will only be supported in exceptional circumstances.

Proposals to increase the number of authorized shares will be evaluated on a case-by-case basis. Because adequate capital stock is important to the operation of a company, the firm will generally support the authorization of additional shares, unless the issuer has not disclosed a detailed plan for use of the shares, or where the number of shares far exceeds those needed to accomplish a detailed plan. Additionally, if the issuance of new shares will limit shareholder rights or could excessively dilute the value of outstanding shares, then such proposals will be supported only if they are in the best interest of the client.

Corporate Restructurings, Mergers and Acquisitions

These proposals should be examined on a case-by-case basis because they are an extension of an investment decision.

Proposals Affecting Shareholder Rights

The firm generally favors proposals that are likely to promote shareholder rights and/or increase shareholder value. Proposals that seek to limit shareholder rights, such as the creation of dual classes of stock, generally will not be supported.

Anti-takeover Issues

Measures that impede takeovers or entrench management will be evaluated on a case-by-case basis, taking into account the rights of shareholders, since the financial interest of shareholders regarding buyout offers is so substantial. Although the firm generally opposes anti-takeover measures because they tend to diminish shareholder rights and reduce management accountability, the firm generally supports proposals that allow shareholders to vote on whether to implement a "poison pill" plan (shareholder rights plan). In certain circumstances, the firm may support a limited poison pill to accomplish a particular objective, such as the closing of an important merger, or a pill that contains a reasonable 'qualifying offer' provision. The firm generally supports anti-greenmail proposals, which prevent companies from buying back company stock at significant premiums from a large shareholder.

Shareholder Action

The firm generally supports proposals that allow shareholders to call special meetings, with a minimum threshold of shareholders requesting such a meeting. The firm believes that best practice for a minimum threshold of shareholders required to call a special meeting is generally considered to be between 20-25%, however the firm assesses this on a company-by-company basis. Proposals that allow shareholders to act by written consent are also generally supported, if there is a threshold of the minimum number of votes that would be necessary to authorize the action at a meeting at which all shareholders entitled to vote were present and voting. The firm believes that best practice for a minimum threshold of shareholders required to act by written consent is generally considered to be between 20-25%, however the firm assesses this on a company-by-company basis. In order to assess the appropriateness of special meeting and written consent provisions the firm would, for example, consider the make-up of the existing investor base/ownership, to determine whether a small number of investors could easily achieve the required threshold, as well as what other mechanisms or governance provisions already exist for shareholders to access management.

Proxy Access

The firm believes that shareholders should, under reasonable conditions, have the right to nominate directors of a company. The firm believes that it is generally in the best interest of shareholders for companies to provide shareholders with reasonable opportunity to exercise this right, while also ensuring that short-term investors or

investors without substantial investment in the company cannot abuse this right. In general, we believe that the appropriate threshold for proxy access should permit up to 20 shareholders that collectively own 3% or more of the company's outstanding shares for 3 or more years to nominate the greater of 2 directors or 20% of the board's directors, however the firm assesses this on a case-by-case basis.

Executive Compensation.

Although management recommendations should be given substantial weight, proposals relating to executive compensation plans, including stock option plans and other equity-based compensation, should be examined on a case-by-case basis to ensure that the long-term interests of management and shareholders are properly aligned. This alignment includes assessing whether compensation is tied to both ESG and financial KPIs. Share count and voting power dilution should be limited.

The firm generally favors the grant of restricted stock units (RSUs) to executives, since RSUs are an important component of compensation packages that link executives' compensation with their performance and that of the company. The firm typically opposes caps on executive stock RSUs, since tying an executive's compensation to the performance of the company provides incentive to maximize share value. The firm also supports equity grants to directors, which help align the interests of outside directors with those of shareholders, although such awards should not be performance-based, so that directors are not incentivized in the same manner as executives.

Proposals to reprice or exchange RSUs are reviewed on a case-by-case basis, but are generally opposed. The firm generally will support a repricing only in limited circumstances, such as if the stock decline mirrors the market or industry price decline in terms of timing and magnitude and the exchange is not value destructive to shareholders.

Although matters of executive compensation should generally be left to the board's compensation committee, proposals to limit executive compensation will be evaluated on a case-by-case basis. The firm generally supports shareholder proposals to allow shareholders an advisory vote on compensation. Absent a compelling reason, companies should submit say-on-pay votes to shareholders every year, since such votes promote valuable communication between the board and shareholders regarding compensation. Where there is an issue involving egregious or excessive bonuses, equity awards or severance payments (including golden parachutes), the firm will generally vote against a say-on-pay proposal. The firm may oppose the election of compensation committee members at companies that do not satisfactorily align executive compensation with the interests of shareholders.

Environmental, Social and Governance Issues

Shareholder proposals regarding environmental, social and governance issues, in general, are supported, especially when they would have a clear and direct positive financial effect on shareholder value and would not be burdensome or impose unnecessary or excessive costs on the issuer. The environmental, social and governance proposals we generally support often result in increased reporting and disclosure, which deepens our understanding of the risks and opportunities pertaining to a specific company. Although policy decisions are typically better left to management and the board, in cases where the firm believes a company has not adequately mitigated significant ESG risks, the firm may vote against directors.

Brown Advisory broadly supports proposals that encourage the following considerations that we believe are in the best long-term economic interest of our clients:

Environment

- Climate change and emissions reporting, goal setting, and action
- Water quality, accessibility, and management
- Responsible and effective waste management

- Energy efficiency and renewable, lower-carbon energy sourcing

Social

- Social justice
- Human rights and responsible labor management
- Data privacy and AI ethics

Governance

- Executive compensation measures that are linked to ESG metrics
- Diverse and inclusive board composition
- Transparency with regard to political spending

Non-U.S. Proxy Proposals

For actively recommended issuers domiciled outside the United States, the firm may follow ISS's international proxy voting guidelines, including, in certain circumstances, country-specific guidelines.

Conflicts of Interest

A "conflict of interest" means any circumstance when the firm or one of its affiliates (including officers, directors and employees), or in the case where the firm serves as investment adviser to a Brown Advisory Fund, when the Fund or the principal underwriter, or one or more of their affiliates (including officers, directors and employees), knowingly does a material amount of business with, receives material compensation from, or sits on the board of, a particular issuer or closely affiliated entity, and, therefore, may appear to have a conflict of interest between its own interests and the interests of clients or Fund shareholders in how proxies of that issuer are voted. For example, a perceived conflict of interest may exist if an employee of the firm serves as a director of an actively recommended issuer, or if the firm is aware that a client serves as an officer or director of an actively recommended issuer. Conflicts of interest will be resolved in a manner the firm believes is the best interest of the client.

The firm should vote proxies relating to such issuers in accordance with the following procedures:

Routine Matters and Immaterial Conflicts

The firm may vote proxies for routine matters, and for non-routine matters that are considered immaterial conflicts of interest, consistent with this Policy. A conflict of interest will be considered material to the extent that it is determined that such conflict has the potential to influence the firm's decision-making in voting a proxy. Materiality determinations will be made by the Chief Compliance Officer or designee based upon an assessment of the particular facts and circumstances.

Material Conflicts and Non-Routine Matters

If the firm believes that (a) it has a material conflict and (b) that the issue to be voted upon is non-routine or is not covered by this Policy, then to avoid any potential conflict of interest:

- i. In the case of a Fund, the firm shall contact the Fund board for a review and determination;
- ii. In the case of all other conflicts or potential conflicts, the firm may "echo vote" such shares, if possible, which means the firm will vote the shares in the same proportion as the vote of all other holders of the issuer's shares; OR in cases when echo voting is not possible, the firm may defer to ISS recommendations, abstain or vote in a manner that the firm, in consultation with the General Counsel, believes to be in the best interest of the client.
- iii. If the aforementioned options would not ameliorate the conflict or potential conflict, then the firm may abstain from voting, as described below.

Abstention

In recognition of its fiduciary obligations, the firm generally endeavors to vote the proxies it receives. However, the firm may abstain from voting proxies in certain circumstances. For example, the firm may determine that abstaining from voting is appropriate if voting is not in the best interest of the client. In addition to abstentions due to material conflicts of interest, situations in which we would not vote proxies might include:

- Circumstances where the cost of voting the proxy exceeds the expected benefits to the client
- Circumstances where there are significant impediments to an efficient voting process, including with respect to non-US issuers where the vote requires translations or other burdensome conditions
- Circumstances where the vote would not reasonably be expected to have a material effect on the value of the client's investment.

Client-Specific Guidelines

From time to time clients may prefer to elect alternative voting guidelines in cases where the guidelines previously outlined in this document do not align with the client's investment or value objectives. The firm seeks to provide clients with the opportunity to have proxies voted in line with their values and objectives. Where a client desires to elect alternative voting guidelines, the firm will work with the client and ISS to identify appropriate alternative voting guidelines. Where no appropriate pre-defined alternative guidelines are available, the firm will endeavor to work with the client to define and set up guidelines to vote proxies on a case-by-case basis. If the firm has not previously implemented the alternative guidelines, members of the firm's proxy voting committee will review the policy to ensure alignment with our fiduciary duty. The firm may recommend a departure from specific aspects of the selected policy's guidelines when it deems such a departure to be in the client's best interest.
