

BA Beutel Goodman World Value Fund

Marketing Communication

Fund Objective and Proposition

The BA Beutel Goodman World Value Fund uses bottom-up, fundamental research to invest in companies at discounts to their business value, defined as the present value of their sustainable free cash flow:

- A high-conviction, concentrated, unconstrained portfolio representing the team's best ideas - typically 25-30 holdings diversified across industries and geographies.
- Stocks bought at a meaningful discount to business value may offer an inherent margin of safety and return potential.
- A focus on quality companies with stable, growing businesses and strong balance sheets should mitigate the potential of capital loss.
- Concentrated portfolio with highest conviction ideas – typically 25–30 holdings in a diversified portfolio.
- Process-driven sell discipline – one-third sale of stocks that exceed their upside target; secondary review for stocks that exceed their upside or downside targets.

Sustainable investment considerations are one of multiple informational inputs into the investment process, alongside data on traditional financial factors, and so are not the sole driver of decision-making. Sustainable investment analysis may not be performed for every holding in the Fund. Sustainable investment considerations that are material will vary by investment style, sector/industry, market trends and client objectives. The Fund seeks to identify companies that it believes may be desirable based on our analysis of sustainable investment related risks and opportunities, but investors may differ in their views. As a result, the Fund may invest in companies that do not reflect the beliefs and values of any particular investor. The Fund may also invest in companies that would otherwise be excluded from other funds that focus on sustainable investment risks. Security selection will be impacted by the combined focus on sustainable investment research assessments and fundamental research assessments including the return forecasts. The Fund incorporates data from third parties in its research process but does not make investment decisions based on third-party data alone.

Brown Advisory relies on third parties to provide data and screening tools. There is no assurance that this information will be accurate or complete or that it will properly exclude all applicable securities. Investments selected using these tools may perform differently than as forecasted due to the factors incorporated into the screening process, changes from historical trends, and issues in the construction and implementation of the screens (including, but not limited to, software issues and other technological issues). There is no guarantee that Brown Advisory's use of these tools will result in effective investment decisions. The decision to invest in the Fund should take into account all the characteristics and objectives of the Fund as described in the Prospectus.
