

Global Sustainable Total Return Bond Fund (GBP)

Marketing Communication

Fund Objective and Proposition

The objective of the Fund is to target a positive total return (comprising current income and capital gains) above the Bank of England's SONIA Compounded Index over a full economic cycle, by investing in a broad range of global fixed-income securities and currencies. The Fund is not constrained by any benchmark.

Philosophy

We believe that dynamic asset allocation informed by comprehensive top-down macro analysis, combined with rigorous bottom-up security selection and a differentiated sustainable investment approach, can deliver attractive risk-adjusted returns through the economic cycle while producing positive environmental and social impact.

SCREENS

The Fund intends to invest in companies that promote environmental and social characteristics, as determined by Brown Advisory, and seeks to screen out particular companies and industries. In addition to our in house and qualitative sustainable investment research, we rely on a third-party provider to apply a rules-based screening process which seeks to identify companies that may have controversial business involvement, as determined by Brown Advisory. For example, the Fund seeks to exclude knowingly owning bonds issued by companies that may defy the United Nations Global Compact Principles and seeks to impose investment guidelines on possible business practices including, but not limited to, weapons, animal testing for non-medical purposes (where the companies do not exhibit strong ethical policies and practices), fossil fuels, adult entertainment, alcohol, tobacco and gambling. The exception to this is that the Fund may invest in labelled bonds, or other fixed-income securities that are issued to raise capital to support environmental or social projects and objectives, and often times help to facilitate the transition to more sustainable practices. Such labelled bonds may be issued by issuers that are involved in one or more of the business activities that Brown Advisory would normally avoid. The Fund is an Article 8 financial product for the purposes of Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability related disclosures in the financial services sector (SFDR).

Note: For further information please contact us and see our website: www.brownadvisory.com/intl/sustainable-investing. It is important for investors to understand that the data informing this process is derived from third party sources, including companies themselves. Although we believe our process is reasonably designed, such data is inherently subject to interpretation, restatement, delay and omission outside of our control. Investors are informed that criteria applied in developing "socially responsible" screens may be additional to the criteria disclosed above.

⁵ OCFs are the actual OCFs as of 31 January 2024. The maximum OCF of B share classes is 0.70%. The ongoing charges figure (OCF) is based on expenses, excluding transaction costs. The charges include the costs of marketing and distribution. For more information about charges, please see the Fund's prospectus, available at www.brownadvisory.com.

The Fund is an Article 8 financial product for the purposes of Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability related disclosures in the financial services sector (SFDR). Sustainable investment considerations are one of multiple informational inputs into the investment process, alongside data on traditional financial factors, and so are not the sole driver of decision-making. Sustainable investment analysis may not be performed for every holding in the fund. Sustainable investment considerations that are material will vary by investment style, sector/industry, market trends and client objectives. The Fund seeks to identify companies that it believes may be desirable based on our analysis of sustainable investment related risks and opportunities, but investors may differ in their views. As a result, the Fund may invest in companies that do not reflect the beliefs and values of any particular investor. The Fund may also invest in companies that would otherwise be excluded from other funds that focus on sustainable investment risks. Security selection will be impacted by the combined focus on sustainable investment research assessments and fundamental research assessments including the return forecasts. The Fund incorporates data from third parties in its research process but does not make investment decisions based on third-party data alone.

Brown Advisory relies on third parties to provide data and screening tools. There is no assurance that this information will be accurate or complete or that it will properly exclude all applicable securities. Investments selected using these tools may perform differently than as forecasted due to the factors incorporated into the screening process, changes from historical trends, and issues in the construction and implementation of the screens (including, but not limited to, software issues and other technological issues). There is no guarantee that Brown Advisory's use of these tools will result in effective investment decisions. The decision to invest in the Fund should take into account all the characteristics and objectives of the Fund as described in the Prospectus. This piece is intended solely for our clients and prospective clients, is for informational purposes only, and is not individually tailored for or directed to any particular client or prospective client.
