

Large-Cap Sustainable Growth

STRATEGY OVERVIEW

First Quarter 2022

We believe that a concentrated portfolio of companies that offer durable fundamental strengths, sustainable competitive advantages and compelling valuations can outperform over a full market cycle. Sustainable competitive advantages can positively contribute to a company's fundamental strength and financial performance by specifically driving revenue growth, cost improvements and enhanced franchise value.

Source: Universe performance rankings from eVestment, all other statistics from FactSet®. The performance rankings may not be representative of any one client's experience because the ranking reflects an average of the accounts that make up the composite and is provided as Supplemental Information. eVestment U.S. Large-Cap Growth Equity represents managers that invest in companies with a market capitalization value of more than \$10 billion. Managers in this category will typically indicate Large-Cap and a "Primary Style Emphasis" equal to Growth. The expected benchmarks for this universe would include the Russell 1000® Index or S&P 500® Index. The minimum criteria necessary for inclusion in an eVestment Universe are 1) minimum of one year of performance history, and 2) updated portfolio characteristics for the product. All products meeting the criteria are evaluated for inclusion. Managers voluntarily populate performance data into the database for inclusion, and the number of managers in each period only consists of managers that were in the universe for that entire period.

*The portfolio characteristics and holdings information provided is based on a representative Brown Advisory Large-Cap Sustainable Growth account as of 03/31/2022 and is provided as Supplemental Information. Portfolio characteristics exclude cash and equivalents; top 10 portfolio holdings exclude cash and equivalents which was 1.5% and provided as Supplemental Information. Numbers may not total due to rounding.

Composite performance is based on the Brown Advisory Large-Cap Sustainable Growth Composite. Returns are shown through 03/31/2022, and all returns greater than one year are annualized. The composite performance shown above reflects the Brown Advisory Large-Cap Sustainable Growth composite managed by Brown Advisory Institutional. Brown Advisory Institutional is a GIPS compliant firm and is a division of Brown Advisory LLC. Past performance is not indicative of future results. Please see the Brown Advisory Large-Cap Sustainable Growth compliant presentation on the last page for additional information and a complete list of terms and definitions.

Seeking Sustainable Competitive Advantages

- Durable business models
- Secular market drivers
- Competitive differentiation
- Sustainable Business Advantage (SBA)
- Favorable reward versus risk, confirmed through research-driven financial models

WE BELIEVE THAT SUSTAINABLE BUSINESS ADVANTAGES CAN DRIVE ATTRACTIVE LONG-TERM REVENUE GROWTH, COST REDUCTION AND ENHANCE FRANCHISE VALUE

UNIVERSE & IDEA GENERATION > DUE DILIGENCE > DECISION PROCESS > PORTFOLIO MANAGEMENT > SELL DISCIPLINE

- Large investible universe of more than 1,000 companies with a market cap over \$2 billion at the time of purchase
- Portfolio managers and research analysts seek investment opportunities and assess sustainability risks and opportunities
- Assess ESG risks
- Identify drivers of earnings growth: business strength, market opportunity and sustainable business advantages
- Group discussion leads to robust analysis and ultimately more comprehensive decision-making
- Roughly 20-30 companies are extensively evaluated each year; approximately 8-10 new positions per year in a portfolio that generally holds 30-40 stocks
- Typical position size: 1%-5%
- Top 10 weight typically: 35%-50% of total portfolio; cash position: 1%-5%
- Fundamental breakdown: growth drivers do not materialize; strategy or management change
- SBA breakdown
- Valuation becomes excessive
- Alternative opportunities offer more compelling growth

FUNDAMENTAL ANALYSIS SEEKS TO IDENTIFY DRIVERS OF

Revenue Growth, Cost Improvement, Enhanced Franchise Value

SBA PROFILES FOR TOP FIVE PORTFOLIO HOLDINGS (% AS OF 03/31/2022)

COMPANY	% OF PORTFOLIO	SBA PROFILE
Microsoft Corp.	4.8	Microsoft offers a compelling customer value proposition through its efficient Azure cloud computing and infrastructure. When customers move to a Azure, many reduce their per-user carbon footprint by up to 98%. The company provides innovative ways to support customers' sustainability goals—for example, Azure customers can access a carbon calculator that tracks emissions generated on the cloud. Microsoft has operated as a carbon-neutral company since 2012, commits to being carbon negative by 2030, and intends to remove all the carbon the company has emitted either directly or by electrical consumption since its founding by 2050.
UnitedHealth Group, Inc.	4.8	Provides health care coverage, software and data consultancy services. Its Optum software provides customers with analytical insights that help drive increased quality and efficiency in the health care system, enabling customers to reduce costs and patient health risks, improve clinical performance and patient outcomes, and adapt to the changing health system landscape.
Alphabet, Inc. CIA	4.8	Alphabet is a trailblazer with regards to corporate sustainability - striving to build sustainability into everything they do including many of their products. For example, Alphabet's custom-designed data centers are meaningfully more energy-efficient than the industry average (a notable advantage as energy costs have become an ever-larger percentage of data center budgets). Alphabet has operated as carbon neutral since 2007, and since 2020 the company has neutralized their legacy carbon footprint.
Visa, Inc.	4.5	Visa's electronic transaction network gives emerging market populations access to electronic financial services via mobile phone that would otherwise be unavailable. This global payments system is a key ingredient in improving the flow of goods and services in emerging markets, ultimately helping to create major societal benefits, as well as a powerful platform for future growth.
Amazon.com, Inc.	4.3	A leader in e-commerce and in cloud computing services through Amazon Web Services (AWS). AWS auctions computation power in real time, allowing Amazon to more evenly distribute its servers' loads and process more data on less hardware. AWS enables secondary environmental and health benefits to customers (e.g., performing intensive simulations to streamline clinical trials, improving safety and reducing patient burdens). In 2017, Amazon acquired Whole Foods Market, a leading retailer of organic and natural foods (a category growing more rapidly than conventional food products).

KARINA FUNK, CFA

Portfolio Manager
Karina joined Brown Advisory in 2009 and has extensive environmentally oriented investment experience spanning early-stage ventures to debt and public equities. She was previously an equity research analyst for Winslow Management Company, a principal at Charles River Ventures and an investment manager at the Massachusetts Renewable Energy Trust.

DAVID POWELL, CFA

Portfolio Manager
David joined Brown Advisory in 1999 as an equity research analyst focused on identifying and recommending investment opportunities in the industrials and energy sectors. Prior to joining, David held a position in investor relations at T. Rowe Price.

95th Percentile	0.66	0.70	0.85	0.86	0.88	0.78	0.76	0.93
# of Managers in Universe	271	246	199	214	142	232	174	197
Active Share								
	12/31/2015	12/31/2016	12/31/2017	12/31/2018	12/31/2019	12/31/2020	12/31/2021	03/31/2022
Brown Advisory LCSG Rep. Account	84.61	79.06	76.92	76.22	76.05	76.25	74.87	74.64
Peer Comparison: eVestment U.S. Large-Cap Growth Equity Universe								
5th Percentile	88.68	87.58	86.62	83.09	82.72	83.15	85.38	84.46
25th Percentile	80.88	80.22	78.83	76.95	75.94	73.96	75.37	75.07
Median	73.02	72.55	69.41	67.64	68.26	64.45	66.83	64.70
75th Percentile	66.46	66.28	61.87	59.56	57.62	52.88	53.93	53.01
95th Percentile	55.21	55.47	53.54	47.21	46.83	40.95	42.11	40.87
# of Managers in Universe	206	188	188	190	141	202	164	154

Example: As of 03/31/2022, a Brown Advisory Large-Cap Sustainable Growth representative account had a longer average holding period and higher active share than the median U.S. large-cap growth equity manager, according to eVestment.

The eVestment U.S. Large-Cap Growth Equity universe classification ("universe") includes U.S. equity strategies that invest primarily in large capitalization stocks with fundamental growth characteristics or products that invest in growth stocks/sectors. The expected benchmarks for this universe would include the Russell 1000®, or S&P 500. Managers in this category will typically indicate a "Primary Capitalization Emphasis" equal to Large-Cap and a "Primary Style Emphasis" equal to Growth. The minimum criteria necessary for inclusion in an eVestment Universe are 1) minimum of one year of performance history, and 2) updated portfolio characteristics for the product. All products meeting the criteria are evaluated for inclusion. Managers voluntarily populate performance data into the database for inclusion, and the number of managers in each period consists only of managers that provided that data point and were in the universe for that entire period. For example, the number of managers that provided turnover and active share statistics as of 12/31/2014 differed from 259 to 145, respectively, despite representing the same eVestment U.S. large-cap growth equity universe. Historical manager data for active share, which has become more widely used since 2009, is notably limited prior to 2014.

The analysis is provided as supplemental information. Please see the Brown Advisory Large-Cap Sustainable Growth compliant presentation on the last page for additional information and a complete list of terms and definitions.

Active Management Provides Risk-Adjusted Results

Source: eVestment, Quarterly, 12/31/2009-03/31/2022

Performance Metrics as of 03/31/2022 for the since-inception period beginning 12/31/2009				
	Sharpe Ratio	Treynor Ratio	Information Ratio	Annualized Alpha
Brown Advisory LCSG Composite (gross)	1.11	18.88	0.37	2.35
Peer Comparison: eVestment U.S. Large-Cap Growth Equity Universe				
Brown Advisory LCSG Peer Rank (%)	Top 1%	Top 2%	Top 2%	Top 1%
5th Percentile	1.04	17.69	0.20	1.38
25th Percentile	0.95	16.11	-0.11	0.01
Median	0.90	15.10	-0.25	-0.90
75th Percentile	0.83	14.14	-0.44	-1.70
95th Percentile	0.74	13.06	-0.87	-2.86
# of Managers in Universe	226	226	226	226

Example: As of 03/31/2022, Brown Advisory Large-Cap Sustainable Growth composite (gross of fees) ranked in the top 2% for sharpe ratio, treynor ratio, information ratio and alpha generation, out of 226 U.S. large-cap growth equity managers since its 12/31/2009 inception, according to eVestment.

Source: eVestment. Composite performance characteristics shown are as of 03/31/2022 and are based on the Brown Advisory Large-Cap Sustainable Growth Composite (gross of fees) for its 12/31/2009 since-inception period. It is shown as supplemental information to the Brown Advisory Large-Cap Sustainable Growth compliant presentation on the last page. The composite performance shown above reflects the Brown Advisory Large-Cap Sustainable Growth composite managed by Brown Advisory Institutional. Brown Advisory Institutional is a GIPS compliant firm and is a division of Brown Advisory LLC. Past performance is not indicative of future results.

Upside Participation, Downside Protection

Source: eVestment, Monthly, 12/31/2009-03/31/2022

Market Capture	3-Year		5-Year		Since Inception (12/31/2009)	
	Up-Market Capture	Down-Market Capture	Up-Market Capture	Down-Market Capture	Up-Market Capture	Down-Market Capture
Brown Advisory LCSG Composite (gross)	89.05	89.27	95.03	87.54	97.87	88.24
Peer Comparison: eVestment U.S. Large-Cap Growth Equity Universe						
Brown Advisory LCSG Peer Rank (%)	42%	Top 20%	32%	14%	44%	Top 9%
5th Percentile	102.86	78.64	107.18	81.71	108.03	84.21
25th Percentile	94.17	90.53	96.68	91.89	100.59	95.56
Median	86.91	95.65	91.56	95.90	96.93	100.66
75th Percentile	80.32	99.19	84.83	99.27	91.10	104.27
95th Percentile	70.21	107.91	73.52	104.73	81.04	110.63
# of Managers in Universe	284	284	267	267	226	226

Example: As of 03/31/2022, Brown Advisory Large-Cap Sustainable Growth composite (gross of fees) provided meaningful downside protection since its 12/31/2009 inception and ranked in the top 9% of 226 U.S. large-cap growth equity managers for the period, according to eVestment. Conversely, the Brown Advisory Large-Cap Sustainable Growth composite (gross of fees) has provided 97.87% up-market capture for the same period and ranks 44% in the same universe, according to eVestment.

Source: eVestment. Composite performance characteristics shown are as of 03/31/2022 and are based on the Brown Advisory Large-Cap Sustainable Growth Composite (gross of fees) for its 3- and 5-year, and 12/31/2009 since-inception periods. Note that a negative down-market capture ratio means that the strategy's returns were positive when the Index returns were negative for that specified period. It is shown as supplemental information to the Brown Advisory Large-Cap Sustainable Growth compliant presentation on the last page. Past performance is not indicative of future results.

About Brown Advisory

Brown Advisory is a leading independent investment firm that offers a wide range of solutions to institutions, corporations, nonprofits, families and individuals. Our mission is to make a material and positive difference in the lives of our clients. We are committed to delivering a combination of first-class performance, customized strategic advice and the highest level of personalized service.

We follow a philosophy that low-turnover, concentrated portfolios derived from sound bottom-up fundamental research provide an opportunity for attractive performance results over time. We have a culture and firm equity ownership structure that help us attract and retain professionals who share those beliefs, and we follow a repeatable investment process that helps us stay true to our philosophy.

Brown Advisory Institutional claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Brown Advisory Institutional has been independently verified for the periods from January 1, 1993 through December 31, 2020. The Verification reports are available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

- *For the purpose of complying with the GIPS standards, the firm is defined as Brown Advisory Institutional, the Institutional and Balanced Institutional asset management divisions of Brown Advisory. As of July 1, 2016, the firm was redefined to exclude the Brown Advisory Private Client division, due to an evolution of the three distinct business lines.
- The Large-Cap Sustainable Growth Composite (the Composite) includes all discretionary portfolios invested in the Sustainable Large Cap Strategy. The strategy invests primarily in large market capitalization companies with financially and environmentally sustainable business models. The minimum account market value required for Composite inclusion is \$1.5 million.
- ESG considerations that are material will vary by investment style, sector/industry, market trends and client objectives. The strategy seeks to identify companies that it believes may have desirable ESG outcomes, but investors may differ in their views of what constitutes positive or negative ESG outcomes. As a result, the strategy may invest in companies that do not reflect the beliefs and values of any particular investor. The strategy may also invest in companies that would otherwise be screened out of other ESG oriented funds. Security selection will be impacted by the combined focus on ESG assessments and forecasts of return and risk. The strategy intends to invest in companies with measurable ESG outcomes, as determined by Brown Advisory, and seeks to screen out particular companies and industries. Brown Advisory relies on third parties to provide data and screening tools. There is no assurance that this information will be accurate or complete or that it will properly exclude all applicable securities. Investments selected using these tools may perform differently than as forecasted due to the factors incorporated into the screening process, changes from historical trends, and issues in the construction and implementation of the screens (including, but not limited to, software issues and other technological issues). There is no guarantee that Brown Advisory's use of these tools will result in effective investment decisions.
- Prior to March 31, 2013, the strategy was named Large-Cap Sustainability. Prior to December 31, 2011, the strategy was named Winslow Green Large Cap. No changes have been made to the strategy since inception.
- Prior to 2012, the minimum account market value required for Composite inclusion was \$100,000.
- The Composite was created in 2010. The Composite inception date is January 1, 2010.
- The benchmark is the Russell 1000® Growth Index. The Russell 1000® Growth Index measures the performance of the large-cap growth segment of the U.S. equity universe. It includes those Russell 1000® Index companies with higher price-to-book ratios and higher forecasted growth values. The Russell 1000® Growth Index is constructed to provide a comprehensive and unbiased barometer for the large-cap growth segment. The Index is completely reconstituted annually to ensure new and growing equities are included and that the represented companies continue to reflect growth characteristics. The Russell 1000® Growth Index and Russell® are trademarks/service marks of the London Stock Exchange Group companies. An investor cannot invest directly into an index. Benchmark returns are not covered by the report of the independent verifier.
- The composite dispersion presented is an equal-weighted standard deviation of portfolio gross returns calculated for the accounts in the Composite for the entire calendar year period. The composite dispersion is not applicable (N/A) for periods where there were five or fewer accounts in the Composite for the entire period.
- Gross-of-fees performance returns are presented before management fees but after all trading commissions, and gross of foreign withholding taxes (if applicable). Net-of-fee performance returns reflect the deduction of actual management fees and all trading commissions. Certain accounts in the Composite pay asset-based custody fees that include commissions. For these accounts, gross and net returns are also net of custody fees. Other expenses can reduce returns to investors. The standard management fee schedule is as follows: 0.80% on the first \$10 million; 0.65% on the next \$15 million; 0.50% on the next \$25 million; and 0.40% on the balance over \$50 million. Further information regarding investment advisory fees is described in Part II A of the firm's form ADV. Actual fees paid by accounts in the Composite may differ from the current fee schedule.
- The investment management fee for the Investor Shares of the Brown Advisory Sustainable Growth Fund (the Fund), which is included in the Composite, is 0.60%, and represents the highest fee charged excluding Advisory Shares. The total expense ratio for the Investor Shares of the Fund as of the most recent fiscal year end (June 30, 2020) was 0.85%. Further information regarding investment management fees and expenses is described in the fund prospectus and annual report.
- The investment management fee for the Dollar Class B Acc Shares of the Brown Advisory US Sustainable Growth Fund (the UCITS), which is included in the Composite, is 0.75%. The total expense ratio for the Dollar Class B Acc Shares of the UCITS as of the most recent fiscal year end (October 31, 2020) was 0.91%. Further information regarding investment management fees and expenses is described in the fund prospectus and annual report.
- The three-year annualized ex-post standard deviation measures the variability of the Composite (using gross returns) and the benchmark for the 36-month period ended on December 31. The 3-year annualized standard deviation is not presented as of December 31, 2010 and December 31, 2011 because 36 month returns for the Composite were not available (N/A).
- Valuations and performance returns are computed and stated in U.S. Dollars. All returns reflect the reinvestment of income and other earnings.
- A complete list of composite descriptions and broad distribution and limited distribution pooled funds is available upon request.
- Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.
- Past performance is not indicative of future results.
- This piece is provided for informational purposes only and should not be construed as a research report, a recommendation or suggestion to engage in or refrain from a particular course of action or to make or hold a particular investment or pursue a particular investment strategy, including whether or not to buy, sell or hold any of the securities mentioned, including any mutual fund managed by Brown Advisory.

Terms and Definitions For Representative Account Calculations

FactSet® is a registered trademark of FactSet Research Systems, Inc. **Market Capitalization** refers to the aggregate value of a company's publicly traded stock. **Weighted Average Market Cap** refers to the average of each holding's market cap, weighted by its relative position size in the portfolio (in such a weighting scheme, larger positions have a greater influence on the calculation). **Enterprise Value/Free Cash Flow (EV/FCF)** is the enterprise value of a company (defined as market value plus debt minus cash and minority interests) divided by its free cash flow (defined as operating cash flow minus net capital expenditure). EV/FCF calculations presented use FY2 earnings estimates; FY1 estimates refer to the next unreported fiscal year, and FY2 estimates refer to the fiscal year following FY1. **Dividend Yield** is the ratio of a stock's projected annual dividend payment per share for the fiscal year currently in progress, divided by the stock's price. All of the above ratios for a portfolio are expressed as a weighted average of the relevant ratios of each portfolio holdings, except for P/E ratios, which are expressed as a weighted harmonic average. **Portfolio Turnover** is the ratio of the lesser of the portfolio's aggregate purchases or sales during a given period, divided by the average value of the portfolio during the period, shown on page one for the three-year period, calculated on a monthly basis. **Duration** is calculated as one over the portfolio turnover rate for the last 12 months, which shows on average the time in years that a manager holds a typical investment in the portfolio. **Active Share** is calculated by taking the sum of the absolute value of the differences of the weight of each holding in the manager's portfolio versus the weight of each holding in the benchmark index and dividing by two. **Sharpe Ratio** is defined as average return earned in excess of the risk-free rate (Citigroup 3-Month T-Bill) per unit of volatility or total risk. **Treynor Ratio** is a measurement of the returns earned in excess of that which could have been earned on an investment that has no diversifiable risk per each unit of market risk assumed. **Information Ratio** is the measure of the risk-adjusted return of a portfolio defined as expected active return divided by tracking error, where active return is the difference between the return of the portfolio and the return of a selected benchmark index, and tracking error is the standard deviation of the active return. **Alpha** is a measure of performance on a risk-adjusted basis. Alpha takes the volatility (price risk) of a portfolio and compares its risk-adjusted performance to a benchmark index. **Upside Capture** is defined as how well a portfolio performs in time periods where the benchmark's returns are greater than zero. **Downside Capture** is defined as how well a portfolio performs in time periods where the benchmark's returns are less than zero. The upside/downside capture ratio is based on the Brown Advisory Large-Cap Sustainable Growth Composite returns (gross of fees) and the Russell 1000® Growth Index returns for its since-inception period. It is provided as supplemental information to the Large-Cap Sustainable Growth composite above. Past performance is not indicative of future results.
