

SMALL-CAP GROWTH REVIEW AND OUTLOOK

Second Quarter 2023

2Q23 Summary

The Brown Advisory Small-Cap Growth strategy produced healthy returns during the second quarter of 2023, falling short of its benchmark, the Russell 2000® Growth Index, while outpacing the broader Russell 2000® Index. Our emphasis on “quality” was a headwind to recent quarterly and year-to-date results. However, we see this condition as temporary considering current economic and market dynamics. If current conditions persist, we think there could be an increased reliance on idiosyncratic successes to drive relative outperformance. Our overall approach remains steady as we continue to patiently wait for opportunities to introduce new ideas and increase our investment in a select group of existing portfolio holdings.

Decisions, Decisions, Decisions

Investment management is a straightforward, yet challenging profession. Success hinges upon an empirically derived philosophy, a committed team with clear roles, a culture fostering open and honest communication, and decisive actions informed by collected data and evidence. One should allocate their time, attention, and energy towards analyzing and refining the investment process – the controllable aspect – rather than the outcomes. Learning and growth should be the focus of both investment successes and failures.

Unlike more predictable professions, where following certain procedures guarantees certain outcomes, investing demands similarly precise methods but success is never guaranteed. We would all prefer it to be straightforward.

Legendary NFL coach Bill Parcells once said, “You are what your record says you are.” While football teams are judged by a season, investment teams should be assessed over an “investment cycle.” A 3–5-year investment record represents a culmination of all the bottom-up capital allocation decisions made during this time. We make numerous decisions every day, guided by one primary thought: what potential action is most likely to benefit long-term returns? As such, we must always consider any factors that might distort or obscure our perspective.

Being aware of our human fallibility, we foster a collaborative investment decision-making process. Each of us is influenced by several behavioral or cognitive biases such as anchoring, authority, confirmation, disposition effect, egocentricity, endowment effect, familiarity, framing, hindsight, loss aversion,

mental accounting, narrative bias, overconfidence, recency, and survivorship.

While our company due diligence drives our alpha potential, it is reasonable to suggest that the mental framework of the person assessing the information is equally critical. Having a dedicated, cohesive, and suitably incentivized team serves as a buffer against biased thinking.

“Toto, I’ve a feeling we’re not in Kansas anymore.” - Dorothy, The Wizard of Oz

Much like Dorothy's transition from Kansas to the fantastical Land of Oz, we too have been transported to a different world in the equity markets. The last decade has seen zero interest rate policy (ZIRP), a global pandemic, a surge in inflation, and a dramatic policy reversal by the Federal Reserve. The advent of passive capital (index funds, ETFs, etc.) has further altered the structure of the stock market.

This journey has led to dramatic changes in investment sentiment, capital flows, and market leadership. Our portfolio active share is pushing the high-90% range, which has caused significant shifts in short-term relative performance. Our year-to-date performance has been influenced by our quality bias against a lower quality rally, our being underweight in cyclical areas due to caution around a slowing macro, and perception issues around a couple of holdings, which hopefully prove to be short-lived.

Despite an interesting investment environment in 1H23, our core elements have stood the test of time over the last 17+ years and will continue to guide us in the future. We anticipate volatility will remain prevalent and intend to leverage it to our advantage.

SECTOR DIVERSIFICATION

Second Quarter 2023

- Our weighting in basic materials remained largely consistent with prior periods on an absolute basis and remains an underweight relative to our benchmark.
- Consumer discretionary is in line with the benchmark, although our weighting has contracted by more than 500 basis points over the past year. Our construction is likely much less pro-cyclical than the benchmark.
- Consumer staples has remained stable and in line with the benchmark.
- Energy has jumped in weight compared to the prior year; our exposure remains below the benchmark weight and our holdings are, in our view, decidedly higher in quality.
- Financials is a modest overweight.
- Health care is in line despite an underweight to biotechnology. The percentage of capital allocated to the category is roughly the same as last year.
- Industrials is less cyclical but a similar weight as the index.
- Technology is our largest underweight as we continue to monitor a few potential new ideas.
- Real estate, telecommunications and utilities are a collective and eclectic overweight.

- Consumer discretionary was a productive sector on an absolute and relative basis, primarily due to Bright Horizons' (BFAM) strong performance.
- Health care was a relative laggard despite two holdings within the sector making our top-five contributors list. A lack of biopharma exposure weighed on relative results along with one holding giving back a large portion of the strong returns it experienced in the prior quarter.

TOP FIVE CONTRIBUTORS TO RETURN

Second Quarter 2023 Representative Small-Cap Growth Account Top Five Contributors

	NAME	DESCRIPTION	AVERAGE WEIGHT (%)
ABCM	Abcam PLC Sponsored ADR	Produces and distributes research-grade antibodies and associated products	1.63
BFAM	Bright Horizons Family Solutions, Inc.	Provides child care and educational services	3.09
ENTG	Entegris, Inc.	Manufactures and supplies critical materials for the semiconductor, data storage & pharmaceutical industries	1.55
DT	Dynatrace, Inc.	Develops software for digital and application performance management	2.29
SIBN	SI-BONE, Inc.	Operates as a sacroiliac joint medical device company	1.52

- After a period of investment that suppressed profitability, Abcam (ABCM) provided updated operating metrics that were ahead of consensus expectations as well as a robust outlook for margin improvement over the remainder of FY23 and into FY24.
- Bright Horizons (BFAM) posted its second quarter in a row of improved operating metrics coming out of COVID due to both improving demand and easing wage pressure. While these results lead us to expect improved near-term performance, we also believe that if and when the American Rescue Plan's support for daycare ends as expected this September, it will hurt smaller, less well-capitalized competitors in the space and, by default, benefit Bright Horizons.
- Entegris, Inc. (ENTG) traded up on optimism that increased demand for its products, driven by generative AI, can fuel a quicker and steeper cyclical recovery. Additionally, it announced divestitures that could result in a reduced leverage profile, helping to lessen a perceived risk.
- Dynatrace (DT) reported a strong end to their FY23 in May and provided a healthy outlook for FY24. Their products remain a budget priority for customers, and several recent innovations, including Grail, could drive incremental revenue performance over the next several years.
- Shares of SI-BONE (SIBN) reacted positively as management continues to execute on its strategy with strong product uptake and improved margins.

BOTTOM FIVE CONTRIBUTORS TO RETURN

Second Quarter 2023 Representative Small-Cap Growth Account Bottom Five Contributors

	NAME	DESCRIPTION	AVERAGE WEIGHT (%)
G	Genpact Limited	Engages in business process management, outsourcing, shared services and information outsourcing	2.63
INFN	Infinera Corporation	Provides optical transport networking equipment, software and services to telecommunications carriers	1.04
AGL	agilon health inc	Provides healthcare services	1.45
BL	BlackLine, Inc.	Provides cloud-based solutions for accounting and finance operations	1.61
PB	Prosperity Bancshares, Inc.(R)	Operates as a bank holding company whose subsidiary provides banking services	2.51

- Genpact (G) reported healthy results, but investors deemed business process outsourcers as potential losers in an AI-powered future, due to their people-based pricing model. We believe Genpact has positioned itself for an AI future and that continued execution can yield multiple expansion.
- Infinera Corporation (INFN) traded down on 2Q23 guidance that came in below expectations. While the company is executing on its product roadmap, concerns linger that further inventory adjustments may be necessary in the second half of the year.
- Shares of agilon health Inc. (AGL) were pressured by concerns over accelerating medical cost trends raised by several large insurers.
- BlackLine, Inc. (BL) announced a CEO transition that has prompted investor concerns around its product roadmap and go-to-market strategy.
- Prosperity Bancshares, Inc. (PB) moved lower in sympathy with the rest of the regional bank sector in the wake of the U.S. regional banking crisis earlier this year. The company is likely receiving less credit than deserved for its history of strong risk management and execution during difficult times.

The portfolio information provided is based on a representative Small-Cap Growth account and is provided as Supplemental Information. Top five and bottom five contributors exclude cash and cash equivalents. Past Performance is not indicative of future results. Commentary regarding an investment's contribution to return and relative performance has been assessed on a gross performance basis. Contributors are sorted in order of their contribution to return on a gross basis. Please see the end of this presentation for a GIPS Report, important disclosures and a complete list of terms and definitions.

ADDITIONS

Second Quarter 2023 Representative Small-Cap Growth Account Portfolio Activity

- CCC Intelligent Solutions Holdings, Inc. sells the leading suite of software used by auto insurers and repair shops to estimate claims cost. Over 80% of its revenue comes from very sticky subscriptions, and increasingly management is monetizing its strategic position in the ecosystem by facilitating more automation. We think this could lead to consistent 7-10% organic top-line growth from cross/up sell and power up to 50-100 bps of margin expansion per year.
- Curtiss-Wright is a leading provider of original equipment for several significant commercial aerospace and U.S. Dept. of Defense programs. An expanded and expanding portfolio of products should drive premium growth and margins relative to peers, perhaps leading to through cycle multiple expansion.
- Houlihan Lokey is a boutique investment bank focused on middle-market corporate finance advisory, restructuring, and financial valuations. It has a long history of successful compound growth and possesses a balanced portfolio of businesses that we believe can prove resilient through business cycles.
- SiTime Corporation is a leading provider of unique MEMS-based timing products for semiconductor applications that is poised to take market share from traditional quartz-based technologies. The company is going through a multiquarter inventory adjustment, prompting the stock to retreat substantially from recent highs. While we concede that the business and the stock may remain volatile in the near term, we believe that its long-term earnings power should be substantial, justifying its still optically high valuation.

Terms and Definitions

All financial statistics and ratios are calculated using information from FactSet as of the report date unless otherwise noted.

The **Average Weight** of a position or sector refers to the daily average for the period covered in this report of a stock’s value as a percentage of the portfolio.

Allocation Effect measures the impact of the decision to allocate assets differently than those in the benchmark.

Selection and Interaction Effect reflects the combination of selection effect and interaction effect. Selection effect measures the effect of choosing securities that may or may not outperform those of the benchmark. Interaction effect measures the effect of allocation and selection decisions (i.e., did we overweight the sectors in which we underperformed).

Total Effect reflects the combination of allocation, selection and interaction effects. Totals may not equal due to rounding.

Brown Advisory Institutional claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Brown Advisory Institutional has been independently verified for the periods from January 1, 1993 through December 31, 2022. The Verification reports are available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

- *For the purpose of complying with the GIPS standards, the firm is defined as Brown Advisory Institutional, the Institutional and Balanced Institutional asset management divisions of Brown Advisory. As of July 1, 2016, the firm was redefined to exclude the Brown Advisory Private Client division, due to an evolution of the three distinct business lines.
- The Small-Cap Growth Equity Composite (the Composite) includes all discretionary portfolios invested in U.S. equities with strong earnings growth characteristics and small market capitalizations. The minimum account market value required for Composite inclusion is \$1.5 million.
- The Composite was created in 1997. The Composite inception date is March 1, 1993.
- The benchmark is the Russell 2000® Growth Index. The Russell 2000® Growth Index measures the performance of the small-cap growth segment of the U.S. equity universe. It includes those Russell 2000® Index companies with higher price-to-book ratios and higher forecasted growth values. The Russell 2000® Growth Index is constructed to provide a comprehensive and unbiased barometer for the small-cap growth segment. The Index is completely reconstituted annually to ensure new and growing equities are included and that the represented companies continue to reflect growth characteristics. The Russell 2000® Growth Index and Russell® are trademarks/service marks of the London Stock Exchange Group companies. An investor cannot invest directly into an index. Benchmark returns are not covered by the report of the independent verifiers.
- The composite dispersion presented is an equal-weighted standard deviation of portfolio gross returns calculated for the accounts in the Composite for the entire calendar year period.
- Gross-of-fees performance returns are presented before management fees but after all trading commissions, and gross of foreign withholding taxes (if applicable). Net-of-fees performance returns are calculated by adjusting the gross-of-fees performance return by the highest fee for the institutional strategy as outlined in Part 2A of the firm's Form ADV, applied on a monthly basis. Certain accounts in the Composite may pay asset-based custody fees that include commissions. For these accounts, gross returns are also net of custody fees. Other expenses can reduce returns to investors. The standard management fee schedule is as follows: 1.00% on the first \$25 million; 0.90% on the next \$25 million; 0.80% on the next \$50 million; and 0.70% on the balance over \$100 million. Further information regarding investment advisory fees is described in Part 2A of the firm's Form ADV. Actual fees paid by accounts in the Composite may differ from the current fee schedule.
- Effective July 1, 2023, the firm transitioned from using actual account fees in the calculation of net performance returns to applying the highest fee for the institutional strategy as outlined in Part 2A of the firm's Form ADV. The net performance track record was revised back to Composite inception.
- The investment management fee for the Investor Shares of the Brown Advisory Small-Cap Growth Fund (the Fund), which is included in the Composite, is 0.85%, and represents the highest fee charged excluding Advisor Shares. The total expense ratio for the Investor Shares of the Fund as of the most recent fiscal year end (June 30, 2022) was 1.10%.
