

Sustainable Bond Fund

Investor: **BASBX** Institutional: **BAISX**

First Quarter 2019

WHY INVEST IN THE BROWN ADVISORY SUSTAINABLE BOND FUND?

The Fund seeks to maximize total return while investing in fixed income securities that meet certain environmental, social and governance (ESG) criteria. The Fund seeks to provide investors with an opportunity to align their investments with their values and make an impact without sacrificing performance.

Concurrent ESG research and fundamental credit analysis provides the basis for a holistic understanding of companies. By incorporating both elements into the due diligence process, we are able to more keenly understand an issuer's associated risks. We seek to identify companies whose ESG characteristics strengthen their credit profiles, as well as issuers whose use of proceeds creates positive societal impact.

Brown Advisory's philosophy, process and people. We believe we can generate alpha and control risk through a repeatable process that combines stability and fundamental credit research. We concentrate portfolios based on credit, but diversify across sectors. Our experienced fixed income team has a long history of managing portfolios in all market environments.

Portfolio Managers: Thomas D.D. Graff, CFA and Amy Hauter, CFA

Benchmark Index: Bloomberg Barclays Aggregate Bond Index

IMPACT FACTORS

Affordable Housing: Aiding low-and moderate- income families

Clean Energy: Investing in projects that develop, build or provide renewable energy

Clean Water & Sanitation: Solving critical water quality and sanitation problems

Diversity, Inclusion & Equality: Driving racial and gender equality and improving minority populations

Economic Mobility & Community Development: Supporting community economic development and improving quality of life

Education: Supporting schools, especially those in underserved areas that eliminate barriers to education

Efficient Production and Conservation: Enhancing company operations through resource efficiency, renewable energy use, recycling and smart logistics

Food, Water & Sustainable Agriculture: Healthier, safer and more responsible farming and food production

Health & Wellness: Promoting health and well-being and providing access to health care services

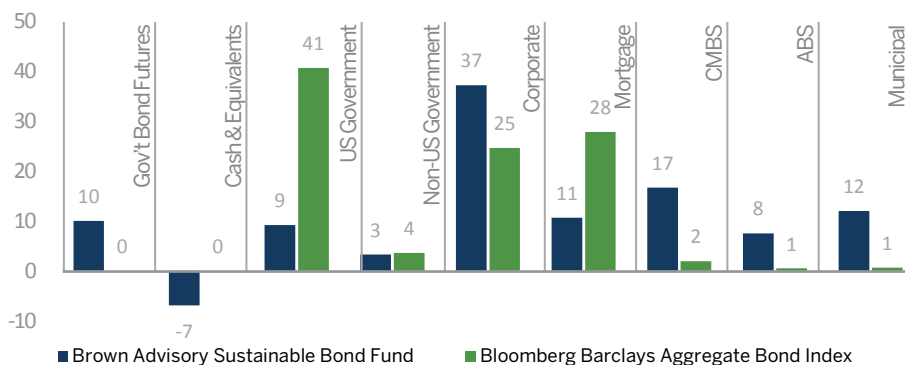

Innovative Technologies & Climate Awareness: Support eco-friendly technologies

Multi Sector: Bonds that finance a range of projects across one or more themes

Sustainable Agriculture & Natural Resource Management: Engaging in sustainable farming and natural resource management, ensuring long-term ecosystem productivity

Sustainable Technology Innovation: Producing innovative products and services that help solve critical sustainability needs

CREDIT QUALITY COMPOSITION

As of 03/31/2019	BASBX	INDEX
AAA/Aaa	39.5	72.6
AA/Aa	17.7	3.4
A	11.7	10.4
BBB	24.6	12.6
High Yield	6.4	0.8
Not Rated	0.1	0.3

Credit quality is calculated using ratings assigned by Moody's. If Moody's does not rate a holding then Standard & Poor's is used. If Moody's and Standard & Poor's do not rate a holding then Fitch is used. A bond is considered investment grade if its credit rating is BBB- or higher according to Standard & Poor's; more specifically, a rating of "AAA" represents the highest credit quality with minimal risk of default and a rating of "BB" or below represents speculative financial security. High Yield, if noted, includes holdings that are rated BB+ or lower according to Moody's. Not Rated category, if noted, includes holdings that are not rated by any rating agencies. All ratings are as of 03/31/2019.

Must be preceded or accompanied by a prospectus.

Mutual fund investing involves risk. Principal loss is possible.

Investments in debt securities typically decrease in value when interest rates rise. This risk is usually greater for longer-term debt securities. Investments in Asset-Backed and Mortgage-Backed securities include additional risks that investor should be aware of including credit risk, prepayment risk, possible illiquidity and default, as well as increased susceptibility to adverse economic developments. In addition, the fund is susceptible to risks from investments in derivatives, U.S. Government securities, municipal securities and its investments in other investment companies.

The Bloomberg Barclays Aggregate Bond Index (Bloomberg Barclays Agg Bond Index) is an unmanaged, market-value weighted index comprised of taxable U.S. investment grade, fixed rate bond market securities, including government, government agency, corporate, asset-backed, and mortgage-backed securities between one and ten years. Bloomberg Barclays Indices are trademarks of Bloomberg or its licensors, including Barclays Bank PLC. It is not possible to invest directly in an index.

The Fund's environmental, social and governance policy could cause it to make or avoid investments that could result in the portfolio underperforming similar funds that do not have an ESG policy.

Diversification does not assure a profit, nor does it protect against a loss in a declining market.

Gross Expense Ratios: 0.72% (Investor) 0.67% (Institutional)

Net Expense Ratios: 0.61% (Investor) 0.56% (Institutional)

Source: U.S. Bank. Performance data quoted represents past performance and is no guarantee of future results. Performance for periods greater than one year is annualized. Current performance may be lower or higher than the performance data quoted. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than original cost. Performance for other share classes will vary. Shares redeemed or exchanged within 14 days of purchase will be charged a 1.00% fee. Performance data quoted does not reflect the redemption or exchange fee. If reflected, total returns would be reduced. For the most recent month-end performance, please call 1-800-540-6807.

General Terms & Definitions

Alpha is a measure of performance on a risk-adjusted basis. Alpha takes the volatility (price risk) of a mutual fund and compares its risk adjusted performance to a benchmark index.

Total net assets are as of the last day of the quarter and include all share classes.

Average Maturity is the average period of time for all principal dollars to be returned to investors.

Effective Duration is a time measure of a bond's interest-rate sensitivity, based on the weighted average of the time periods over which a bond's cash flows accrue to the bondholder.

Yield to Worst is calculated by making worst-case scenario assumptions on the issue by calculating the returns that would be received if provisions, including prepayment, call or sinking fund, are used by the issuer.

SEC Yield (Unsubsidized) is computed under an SEC-standardized formula based on net income earned over the past 30 days excluding expense reimbursements.

SEC Yield (Subsidized) is computed under an SEC-standardized formula based on net income earned over the past 30 days.
