

Sustainable Small-Cap Core Fund

Investor: **BIAYX** Institutional: **BAFYX**

Fourth Quarter 2022

SUSTAINABLE SMALL-CAP CORE

WHY INVEST IN BROWN ADVISORY SUSTAINABLE SMALL-CAP CORE FUND?

Our investment approach seeks outperformance through a concentrated, low-turnover portfolio of companies that we believe have best-in-breed business models, attractive valuations and strong or improving sustainable opportunities, stemming from underlying Sustainable Drivers.

Sustainable Drivers are characteristics that we believe have potential to drive tangible positive outcomes, in terms of financial performance, and environmental or social impact. We believe that our integration of fundamental and ESG research adds an informational edge to our investment process that helps us identify quality small-cap investment opportunities.

We believe the small-cap asset class presents unique ESG research challenges that our research process is well positioned to navigate.

We believe small-cap companies are often under-rated due to limited ESG disclosures. We believe this provides a compelling opportunity for our team to draw on our deep knowledge of the small-cap asset class. Our ESG research process helps us uncover information and construct a portfolio of what we believe to be quality investments to achieve goals of sustainability and performance.

A shared culture of thoughtful investing.

Brown Advisory's investment team is made up of independent thinkers who nonetheless share a common philosophy. We invest for the long term in companies with established or improving sustainable opportunities, strong fundamentals and attractive valuations that we believe will drive excess returns while limiting downside risk and generate long-term outperformance vs. our benchmark.

Portfolio Managers: Timothy Hathaway, CFA; Emily Dwyer

- Founded in 1993
- 100% of colleagues collectively own approximately 70% of the firm's equity

Before investing you should carefully consider the Fund's investment objectives, risks, charges, and expenses. This and other information is in the summary or statutory prospectus, a copy of which may be obtained by calling 1-800-540-6807 or visiting the Fund's website, www.brownadvisoryfunds.com. Please read the prospectus carefully before you invest.

Investments in smaller companies generally carry greater risk than is customarily associated with larger companies for various reasons such as narrower markets, limited financial resources and less liquid stock. The value of the Fund's investments in REITs may change in response to changes in the real estate market such as declines in the value of real estate, lack of available capital or financing opportunities, and increases in property taxes or operating costs. The Fund may invest in ETFs, which may trade at a discount to the aggregate value of the underlying securities and although expense ratios for ETFs are generally low, frequent trading of ETFs by the Fund can generate brokerage expenses. Investments in foreign securities entail certain risks not associated with investments in domestic securities, such as volatility of currency exchange rates, and in some cases, political and economic instability and relatively illiquid markets. These risks are greater for investment in emerging markets. Private Placement issued securities are restricted securities that are not publicly traded. Delay or difficulty in selling such securities may result in a loss to the Fund. The recent growth rate in the stock market has helped to produce short-term returns for some asset classes that are not typical and may not continue in the future. Because of ongoing market volatility, fund performance may be subject to substantial short-term changes. Diversification does not assure a profit, nor does it protect against a loss in a declining market.

All investments involve risk. The value of the investment and the income from it will vary. There is no guarantee that the initial investment will be returned. ESG considerations are one of multiple informational inputs into the investment process, alongside data on traditional financial factors, and so are not the sole driver of decision-making. ESG analysis may not be performed for every holding in the Fund. As a result, the Fund may invest in companies that do not reflect the beliefs and values of any particular investor. The Fund may also invest in companies that would otherwise be screened out of other ESG oriented funds. Security selection will be impacted by the combined focus on ESG assessments and forecasts of return and risk. The Fund intends to invest in companies with measurable ESG outcomes, as determined by Brown Advisory, and seeks to screen out particular companies and industries. Brown Advisory relies on third parties to provide data and screening tools. There is no assurance that this information will be accurate or complete or that it will properly exclude all applicable securities. Investments selected using these tools may perform differently than as forecasted due to the factors incorporated into the screening process, changes from historical trends, and issues in the construction and implementation of the screens (including, but not limited to, software issues and other technological issues). There is no guarantee that Brown Advisory's use of these tools will result in effective investment decisions.

The Russell 2000® Index measures the performance of the small-cap segment of the U.S. equity universe. The Russell 2000 is a subset of the Russell 3000® Index representing approximately 10% of the total market capitalization of that index. It includes approximately 2000 of the smallest securities based on a combination of their market cap and current index membership. The Russell 2000 Index is constructed to provide a comprehensive and unbiased small-cap barometer and is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true small-cap opportunity set. The Russell 2000 Index and FTSE Russell® are trademarks/service marks of the London Stock Exchange Group companies. An investor cannot invest directly into an index. Benchmark returns are not covered by the report of the independent verifiers.

Past performance is no guarantee of future results.

Terms and Definitions

Active Share is a measure of the percentage of stock holdings in a manager's portfolio that differ from the benchmark index. **Market Capitalization** is the value of the fund as determined by the market price of its issued and outstanding stock. The **Weighted Average Market Capitalization** of a portfolio equals the average of each holding's market cap, weighted by its relative position size in the portfolio (in such a weighting scheme, larger positions have a greater influence on the calculation). The **Weighted Median Market Capitalization** is the median market capitalization of a fund's equity portfolio gives you a measure of the size of the companies in which an equity fund invests. It is the trimmed mean of the market capitalizations of the stocks in the fund's portfolio. **Earnings growth rate** is the amount of increase that a specific variable has gained within a specific period and context and is based on consensus estimates derived from FactSet as of 12/31/2022 for the 3-5 year period, and is not a measure of the Fund's future performance. **Price-Earnings Ratio (P/E Ratio)** is the ratio of the share of a company's stock compared to its per-share earnings. The Fund's Investor Class is used to calculate **beta**, a measure of the magnitude of a fund's past share price fluctuations in relation to the fluctuations in the stock market (as represented by the fund's benchmark). While not predictive of the future, funds with a beta greater than 1 have in the past been more volatile than the benchmark.
