

Total Return Fund

Investor: **BIATX** Institutional: **BAFTX**

Second Quarter 2019

INTERMEDIATE CORE FIXED INCOME

WHY INVEST IN BROWN ADVISORY TOTAL RETURN FUND?

The Fund seeks to maximize potential total return through a diversified selection of intermediate-term, high-quality fixed income securities concentrated on our best ideas. This approach follows Brown Advisory's long history of managing core fixed income portfolios that have the flexibility to respond to changing market conditions and interest-rate environments. The Fund seeks to provide investors with a foundation for stability in their investment portfolios.

We believe that our investment process seeks to add alpha and control risk. We have a time-tested process that incorporates bottom-up, fundamental credit research, which drives security selection and emphasizes risk mitigation, and proprietary decision-making models that allow us to better identify market dislocations. We seek to identify opportunities for significant price appreciation potential, not just current yield, and focus attention to actively managing average duration to fall between three to seven years.

The Fund benefits from the philosophy, process and people at Brown Advisory. We follow a philosophy that fixed income strategies built from a foundation of stability coupled with fundamental credit research can seek to generate alpha and control risk. Portfolios are concentrated based on credit selection, but diversified across sectors. We have a culture and firm equity ownership structure that attract and retain professionals who share those beliefs, and we follow a repeatable investment process that helps us stay true to our philosophy.

Portfolio Manager: Thomas D.D. Graff, CFA

Benchmark Index: Bloomberg Barclays Aggregate Bond Index

OBJECTIVE

The Brown Advisory Total Return Fund seeks to provide a competitive total return consistent with the preservation of principal.

INVESTMENT APPROACH

Brown Advisory employs a bottom-up, fundamental investment process that looks for companies that are believed to be undervalued and offer an attractive balance of upside and downside potential. We seek to identify cases where improving balance sheets, business conditions becoming more favorable, or supply changes, which could temporarily cause a security to become underpriced, can cause price appreciation over time.

Sector selection is based on a combination of quantitative and fundamental inputs, including our outlook for interest rate policy, credit conditions, inflation, etc. We do not make portfolio decisions based on economic forecasts. We consider a range of possible scenarios and look for investments that can perform reasonably well across all scenarios or that are likely to perform favorably in highly probable scenarios with limited downside risk, given other possibilities.

The portfolio can invest in all sectors and maturities of the U.S. dollar bond market, including related derivatives. The portfolio can invest up to 20% in below investment-grade securities.

OVERALL MORNINGSTAR RATING™

As of 06/30/2019 for Investor Shares among 539 Intermediate-Term funds (derived from a weighted average of the fund's three-, five- and 10-year risk adjusted return measure).

CREDIT QUALITY COMPOSITION

(% As of 06/30/2019)

Source: FactSet®

Credit quality is calculated using ratings assigned by Moody's. If Moody's does not rate a holding then Standard & Poor's is used. If Moody's and Standard & Poor's do not rate a holding then Fitch is used. A bond is considered investment grade if its credit rating is BBB- or higher according to Standard & Poor's; more specifically, a rating of "AAA" represents the highest credit quality with minimal risk of default and a rating of "BB" or below represents speculative financial security. High Yield, if noted, includes holdings that are rated BB+ or lower according to Moody's. Not Rated category, if noted, includes holdings that are not rated by any rating agencies. All ratings are as of 06/30/2019.

Before investing, you should carefully consider the Fund's investment objectives, risks, charges and expenses. This and other information is in the summary or statutory prospectus. A copy of which can be obtained by calling 1-800-540-6807 or visiting the Fund's website, www.brownadvisoryfunds.com. Please read the prospectus carefully before investing.

Investments in debt securities typically decrease in value when interest rates rise. This risk is usually greater for longer-term debt securities. Investments in Asset-Backed and Mortgage-Backed securities include additional risks that investor should be aware of including credit risk, prepayment risk, possible illiquidity and default, as well as increased susceptibility to adverse economic developments. Investments in lower rated and non-rated securities present a great risk of loss to principal and interest than higher rated securities. In addition, the fund is susceptible to risks from investments in derivatives, U.S. Government securities, and changes in interest rates.

The Bloomberg Barclays Aggregate Bond Index (Bloomberg Barclays Agg Bond Index) is an unmanaged, market-value weighted index comprised of taxable U.S. investment grade, fixed rate bond market securities, including government, government agency, corporate, asset-backed, and mortgage-backed securities between one and ten years.

closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating™ for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating™ metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Morningstar Rankings represent a fund's total return percentile rank relative to all funds that have the same Morningstar Category. The highest percentile rank is 1 and the lowest is 100. It is based on Morningstar total return, which includes both income and capital gains or losses and is not adjusted for sales charges or redemption fees. Past performance is no guarantee of future results. Brown Advisory Total Return Fund was rated against the following numbers of U.S. domiciled Intermediate-Term funds over the following time periods: 539 funds in the last three years for the period ending 06/30/2019. With respect to these Intermediate-Term funds, Brown Advisory Total Return Fund received a Morningstar Rating of 3 stars for the three-year period.

Diversification does not assure a profit, nor does it protect against a loss in a declining market.

Terms and Definitions for Fund Characteristics

Alpha takes the volatility (price risk) of a mutual fund and compares its risk-adjusted performance to a benchmark index.

Effective Duration is a time measure of a bond's interest-rate sensitivity, based on the weighted average of the time periods over which a bond's cash flows accrue to the bondholder.

Average Life is the average period of time for all principal dollars to be returned to investors.
