

Global Sustainable Total Return Bond Fund (USD)

Marketing Communication

Fund Objective and Proposition

The objective of the Fund is to target a positive total return (comprising current income and capital gains) above the Federal Reserve Bank of New York Secured Overnight Financing Rate (SOFR) over a full economic cycle, by investing in a broad range of global fixed-income securities and currencies. The Fund is not constrained by any benchmark.

Philosophy

We believe that dynamic asset allocation informed by comprehensive top-down macro analysis, combined with rigorous bottom-up security selection and a differentiated sustainable investment approach, can deliver attractive risk-adjusted returns through the economic cycle while producing positive environmental and social impact.

ESG SCREENS

The Fund intends to invest in companies with measurable ESG outcomes, as determined by Brown Advisory, and seeks to screen out particular companies and industries. In addition to our proprietary and qualitative ESG analysis, we rely on a third-party provider to apply a rules-based screening process which seeks to identify companies that may have controversial business involvement, as determined by Brown Advisory. For example, the Fund seeks to exclude knowingly owning bonds issued by companies that may defy the United Nations Global Compact Principles and seeks to impose investment guide lines on possible controversies including, but not limited to, weapons, animal testing, fossil fuels, adult entertainment, alcohol, tobacco and gambling. The Fund is an Article 8 financial product for the purposes of Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability related disclosures in the financial services sector (SFDR).

Note: For further information please contact us and see our website: www.brownadvisory.com/intl/sustainable-investing. It is important for investors to understand that the data informing this process is derived from third party sources, including companies themselves. Although we believe our process is reasonably designed, such data is inherently subject to interpretation, restatement, delay and omission outside of our control. Investors are informed that criteria applied in developing "socially responsible" screens may be additional to the criteria disclosed above.
