**Performance not available for the period since the Composite inception date is April 1, 2022

Brown Advisory Institutional claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Brown Advisory Institutional has been independently verified for the periods from January 1, 1993 through December 31, 2021. The Verification reports are available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

- *For the purpose of complying with the GIPS standards, the firm is defined as Brown Advisory Institutional, the Institutional and Balanced Institutional asset management divisions of Brown Advisory. As of July 1, 2016, the firm was redefined to exclude the Brown Advisory Private Client division, due to an evolution of the three distinct business lines.
- The Global Sustainable Total Return Bond (USD) Composite (the Composite) includes all discretionary portfolios invested in the Global Sustainable Total Return Bond (USD) strategy. The objective of the Global Sustainable Total Return Bond (USD) strategy is to target a positive total return (comprising current income and capital gains) above the Federal Reserve Bank of New York Secured Overnight Financing Rate (SOFR) Index over a full economic cycle, by investing in a broad range of global fixed-income securities and associated FDIs and currencies.
- ESG considerations that are material will vary by investment style, sector/industry, market trends and client objectives. The strategy seeks to identify issuers that it believes may have desirable ESG outcomes, but investors may differ in their views of what constitutes positive or negative ESG outcomes. As a result, the strategy may invest in issuers that do not reflect the beliefs and values of any particular investor. The strategy may also invest in issuers that would otherwise be screened out of other ESG oriented funds. Security selection will be impacted by the combined focus on ESG assessments and forecasts of return and risk. The strategy intends to invest in issuers with measurable ESG outcomes, as determined by Brown Advisory, and seeks to screen out particular issuers and industries. Brown Advisory relies on third parties to provide data and screening tools. There is no assurance that this information will be accurate or complete or that it will properly exclude all applicable securities. Investments selected using these tools may perform differently than as forecasted due to the factors incorporated into the screening process, changes from historical trends, and issues in the construction and implementation of the screens (including, but not limited to, software issues and other technological issues). There is no guarantee that Brown Advisory's use of these tools will result in effective investment decisions.
- The Composite creation date is May 31, 2022. The Composite inception date is April 1, 2022.
- The Composite benchmarks are the Federal Reserve Bank of New York Secured Overnight Financing Rate (SOFR) Index and the Bloomberg Global Aggregate 1-10 Year Total Return Index (USD Hedged). The Federal Reserve Bank of New York Secured Overnight Financing Rate (SOFR) Index measures the cumulative impact of compounding the SOFR on a unit of investment over time, with the initial value set to 1.00000000 on April 2, 2018, the first value date of the SOFR. The SOFR is a broad measure of the cost of borrowing cash overnight collateralized by Treasury securities. The Bloomberg Global Aggregate 1-10 Year Total Return Index (USD Hedged) represents a close estimation of the performance that can be achieved by hedging the currency exposure of its parent index, the Bloomberg Global Aggregate Index, to USD and limiting to bonds with maturities between 1 and 10 years. The Index is 100% hedged to the USD by selling the forwards of all the currencies in the parent index at the one-month Forward rate. The parent index is composed of government, government-related and corporate bonds, as well as asset-backed, mortgage-backed and commercial mortgage-backed securities from both developed and emerging markets issuers. The SOFR Index is subject to the Terms of Use posted at newyorkfed.org. The New York Fed is not responsible for publication of the SOFR Index by Brown Advisory Institutional, does not sanction or endorse any particular republication, and has no liability for your use. "Bloomberg®" and Bloomberg Global Aggregate Bond Index are service marks of Bloomberg Finance L.P. and its affiliates including Bloomberg Index Services Limited ("BISL"), the administrator of the index (collectively, "Bloomberg") and have been licensed for use for certain purposes by Brown Advisory. Bloomberg is not affiliated with Brown Advisory, and Bloomberg does not approve, endorse, review, or recommend the Global Sustainable Total Return Bond strategy. Bloomberg does not guarantee the timeliness, accurateness, or completeness of any data or information relating to the Global Sustainable Total Return Bond (USD) Composite. An investor cannot invest directly into an index. Benchmark returns are not covered by the report of the independent verifiers.
- Composite dispersion is an equal-weighted standard deviation of portfolio gross returns calculated for the accounts in the Composite for the entire calendar year period. The composite dispersion is not applicable (N/A) for periods where there were five or fewer accounts in the Composite for the entire period.
- Gross-of-fees performance returns are presented before management fees but after all trading commissions, and gross of foreign withholding taxes (if applicable). Net-of-fee performance returns reflect the deduction of actual management fees and all trading commissions. Other expenses can reduce returns to investors. The standard management fee schedule is as follows: 0.50% on the first \$50 million; 0.30% on the next \$50 million; 0.25% on the next \$50 million; and 0.20% on the balance over \$150 million, with a minimum account market value of \$100 million. Further information regarding investment advisory fees is described in Part II A of the firm's form ADV. Actual fees paid by accounts in the Composite may differ from the current fee schedule.
- The investment management fee for the Dollar Class B Shares of the Brown Advisory Global Sustainable Total Return Bond Fund (USD) (the UCITS), which is included in the composite, is 0.45%. The total expense ratio for the Dollar Class B Shares of the UCITS is 0.70%. Further information regarding investment management fees and expenses is described in the fund prospectus.
- The three-year annualized ex-post standard deviation measures the variability of the Composite (using gross returns) and the benchmark for the 36-month period ended on December 31. The 3 year annualized standard deviation is not presented as of December 31, 2021 because 36 month returns for the Composite were not available (N/A) and the Composite did not exist.
- The use of derivatives is integral to the investment process of the strategy. The strategy may use, for investment or hedging purposes, exchange traded and OTC derivatives, including futures and options, forward foreign currency contracts, FX futures and FX spots and OTC swaps, and credit default swaps on indices, the underlying reference assets for which will be bonds in which the fund may invest directly, and interest rates and currencies.
- The strategy may employ leverage, but it is not integral to the investment process. The strategy may borrow up to 10% of its Net Asset Value on a temporary basis. It is not intended to borrow for leverage purposes. The strategy may also be leveraged through the use of derivatives, and under normal circumstances is not expected to exceed 500% of its Net Asset Value.
- Valuations and performance returns are computed and stated in US Dollars. All returns reflect the reinvestment of income and other earnings.
- A complete list of composite descriptions and broad distribution and limited distribution pooled funds is available upon request.
- Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.
- Past performance is not indicative of future results.
- This is not an offer to sell securities. That may only be accomplished by the issuance of a private offering memorandum/subsorption documents.
