DISCLOSURES

For institutional investors and professional clients only.
Past performance may not be a reliable guide to future performance and investors may not get back the amount invested. All investments involve risk.
The value of the investment and the income from it will vary. There is no guarantee that the initial investment will be returned.

The views expressed are those of the author and Brown Advisory as of the date referenced and are subject to change at any time based on market or other conditions. These views are not intended to be and should not be relied upon as investment advice and are not intended to be a forecast of future events or a guarantee of future results. Past performance is not a guarantee of future performance and you may not get back the amount invested. The information provided in this material is not intended to be and should not be considered to be a recommendation or suggestion to engage in or refrain from a particular course of action or to make or hold a particular investment or pursue a particular investment strategy, including whether or not to buy, sell, or hold any of the securities mentioned. It should not be assumed that investments in such securities have been or will be profitable. To the extent specific securities are mentioned, they have been selected by the author on an objective basis to illustrate views expressed in the commentary and do not represent all of the securities purchased, sold or recommended for advisory clients. The information contained herein has been prepared from sources believed reliable but is not guaranteed by us as to its timeliness or accuracy, and is not a complete summary or statement of all available data. This piece is intended solely for our clients and prospective clients, is for informational purposes only, and is not individually tailored for or directed to any particular client or prospective client.

Portfolio Information based on a Representative Large-Cap Growth account and provided as Supplemental Information.

Commentary regarding an investment's contribution to return and relative performance has been assessed on a gross performance basis.

Attribution Analysis is calculated on a gross of fees basis.

The performance of any stocks discussed may differ as a holding within the strategy portfolio based on factors that include, but are not limited to, the timing of purchases and sales of the security within the portfolio, the reinvestment of dividends, and Brown Advisory fees and expenses.

All financial statistics and ratios are calculated using information from FactSet as of the report date unless otherwise noted. Magnificent Seven stocks: Alphabet, Amazon, Apple, Meta, Microsoft, Nvidia, and Tesla.

Portfolio Turnover is the ratio of the lesser of the portfolio's aggregate purchases or sales during a given period, divided by the average value of the portfolio during that period, calculated on a monthly basis.

Earnings per Share (EPS) is a measure of a company's profitability, calculated by dividing quarterly or annual income (minus dividends) by the number of outstanding stock shares. The higher a company's EPS, the greater the profit and value perceived by investors.

The down-market capture ratio is a statistical measure of an investment manager's overall performance in down-markets. It is used to evaluate how well an investment manager performed relative to an index during periods when that index has dropped. The ratio is calculated by dividing the manager's returns by the returns of the index during the down-market and multiplying that factor by 100.

The up-market capture ratio is the statistical measure of an investment manager's overall performance in up-markets. It is used to evaluate how well an investment manager performed relative to an index during periods when that index has risen.

Alpha is the excess return of an investment relative to the return of a benchmark index.

Downside Protection is a strategy designed to mitigate or prevent a decrease in the value of an investment. This can be achieved through various methods such as options contracts, stop-loss orders, or diversification, which help limit potential losses in adverse market conditions

Brown Advisory Institutional claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Brown Advisory Institutional has been independently verified for the periods from January 1, 1993 through December 31, 2024. The Verification reports are available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

1. *For the purpose of complying with the GIPS standards, the firm is defined as Brown Advisory Institutional, the Institutional and Balanced Institutional asset management divisions of Brown Advisory. As of July 1, 2016, the firm was redefined to exclude the Brown Advisory Private Client division, due to an evolution of the three distinct business lines.
2. The Large-Cap Growth Institutional Composite (the Composite) includes all discretionary institutional portfolios invested in U.S. equities with strong earnings growth characteristics and large market capitalizations. The minimum account market value required for Composite inclusion is $1.5 million.
3. The Composite was created in 1997. The Composite inception date is June 1, 1996.
4. The benchmark is the Russell 1000® Growth Index. The Russell 1000® Growth Index measures the performance of the large-cap growth segment of the U.S. equity universe. It includes those Russell 1000® Index companies with higher price-to-book ratios and higher forecasted growth values. The Russell 1000® Growth Index is constructed to provide a comprehensive and unbiased barometer for the large-cap growth segment. The Index is completely reconstituted annually to ensure new and growing equities are included and that the represented companies continue to reflect growth characteristics. The Russell 1000® Growth Index and Russell® are trademarks/service marks of the London Stock Exchange Group companies. An investor cannot invest directly into an index. Benchmark returns are not covered by the report of the independent verifiers.
5. The composite dispersion presented is an equal-weighted standard deviation of portfolio gross returns calculated for the accounts in the Composite for the entire calendar year period.
6. Gross-of-fees performance returns are presented before management fees but after all trading commissions, and gross of foreign withholding taxes (if applicable). Net-of-fees performance returns are calculated by adjusting the gross-of-fees performance return by the highest fee for the institutional strategy as outlined in Part 2A of the firm's Form ADV, applied on a monthly basis. Certain accounts in the Composite may pay asset-based custody fees that include commissions. For these accounts, gross returns are also net of custody fees. Other expenses can reduce returns to investors. The standard management fee schedule is as follows: For accounts below $150 million, 0.70% on the first $25 million; 0.50% on the next $25 million; and 0.40% on the next $100 million. For accounts over $150 million, 0.465% on the first $150 million; 0.30% on the next $100 million; 0.25% on the next $250 million; and 0.20% on the balance over $500 million. Further information regarding investment advisory fees is described in Part 2A of the firm's Form ADV. Actual fees paid by accounts in the Composite may differ from the current fee schedule.
7. Effective July 1, 2023, the firm transitioned from using actual account fees in the calculation of net performance returns to applying the highest fee for the institutional strategy as outlined in Part 2A of the firm's Form ADV. The net performance track record was revised back to Composite inception.
8. The three-year annualized ex-post standard deviation measures the variability of the Composite (using gross returns) and the benchmark for the 36-month period ended on December 31.
9. Valuations and performance returns are computed and stated in U.S. Dollars. All returns reflect the reinvestment of income and other earnings.
10. A complete list of composite descriptions and broad distribution and limited distribution pooled funds is available upon request.
11. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.
12. Past performance is not indicative of future results.
13. This is not an offer to sell securities. That may only be accomplished by the issuance of a private offering memorandum/subscription documents.
14. This piece is provided for informational purposes only and should not be construed as a research report, a recommendation or suggestion to engage in or refrain from a particular course of action or to make or hold a particular investment or pursue a particular investment strategy, including whether or not to buy, sell or hold any of the securities mentioned, including any mutual fund managed by Brown Advisory.

DISCLOSURES

For institutional investors and professional clients only.
Past performance may not be a reliable guide to future performance and investors may not get back the amount invested. All investments involve risk.
The value of the investment and the income from it will vary. There is no guarantee that the initial investment will be returned.

The views expressed are those of the author and Brown Advisory as of the date referenced and are subject to change at any time based on market or other conditions. Sustainable investment considerations are one of multiple informational inputs into the investment process, alongside data on traditional financial factors, and so are not the sole driver of decision-making. Sustainable investment analysis may not be performed for every holding in the strategy. Sustainable investment considerations that are material will vary by investment style, sector/industry, market trends and client objectives. The strategy seeks to identify companies that it believes may be desirable based on our analysis of sustainable investment related risks and opportunities, but investors may differ in their views. As a result, the strategy may invest in companies that do not reflect the beliefs and values of any particular investor. The strategy may also invest in companies that would otherwise be excluded from other funds that focus on sustainable investment risks. Security selection will be impacted by the combined focus on sustainable investment research assessments and fundamental research assessments including the return forecasts. The strategy incorporates data from third parties in its research process but does not make investment decisions based on third-party data alone.

Portfolio Information based on a Representative Large-Cap Sustainable Growth account and provided as Supplemental Information.

Commentary regarding an investment's contribution to return and relative performance has been assessed on a gross performance basis.

Attribution Analysis is calculated on a gross of fees basis.

The down-market capture ratio is a statistical measure of an investment manager's overall performance in down-markets. It is used to evaluate how well an investment manager performed relative to an index during periods when that index has dropped. The ratio is calculated by dividing the manager's returns by the returns of the index during the down-market and multiplying that factor by 100.

The up-market capture ratio is the statistical measure of an investment manager's overall performance in up-markets. It is used to evaluate how well an investment manager performed relative to an index during periods when that index has risen.

Earnings per share (EPS) is calculated as a company's profit divided by the outstanding shares of its common stock.

EBITDA, or earnings before interest, taxes, depreciation, and amortization, is a measure of a company's overall financial performance and is sometimes used as an alternative to net income.

Return on Investment (ROI) is a financial ratio that measures the profit generated by an investment relative to its cost.

Sustainable investment analysis may not be performed for every holding in the strategy. Sustainable investment considerations that are material will vary by investment style, sector/industry, market trends and client objectives. The Flexible Equity Strategy ("Strategy") seeks to identify companies that it believes may be desirable based on our analysis of sustainable investment related risks and opportunities, but investors may differ in their views. As a result, the Strategy may invest in companies that do not reflect the beliefs and values of any particular investor. The Strategy may also invest in companies that would otherwise be excluded from other strategies that focus on sustainable investment risks. Security selection will be impacted by the combined focus on sustainable investment research assessments and fundamental research assessments including the return forecasts. The Strategy incorporates data from third parties in its research process but does not make investment decisions based on third-party data alone.
4. The Composite was created in 1985. The Composite inception date is January 1, 1985.
5. The benchmark is the S&P 500® Index. The S&P 500 Index is a capitalization-weighted index of 500 stocks that is designed to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries. Index returns assume reinvestment of dividends and do not reflect any fees or expenses. An investor cannot invest directly into an index. Benchmark returns are not covered by the report of the independent verifiers. Standard & Poor's, S&P ®, and S&P 500® are registered trademarks of Standard & Poor's Financial Services LLC ("S&P"), a subsidiary of S&P Global Inc.
6. The composite dispersion presented is an equal-weighted standard deviation of portfolio gross returns calculated for the accounts in the Composite for the entire calendar year period.
7. Gross-of-fees performance returns are presented before management fees but after all trading commissions, and gross of foreign withholding taxes (if applicable). Net-of-fees performance returns are calculated by adjusting the gross-of-fees performance return by the highest fee for the institutional strategy as outlined in Part 2A of the firm's Form ADV, applied on a monthly basis. Certain accounts in the Composite may pay asset-based custody fees that include commissions. For these accounts, gross returns are also net of custody fees. Other expenses can reduce returns to investors. The standard management fee schedule is as follows: For accounts below $150 million, 0.60% on the first $25 million; 0.50% on the next $25 million; and 0.45% on the next $25 million, and 0.35% on the next $50 million. For accounts over $150 million, 0.45% on the first $150 million; 0.275% on the next $100 million; 0.25% on the next $250 million; and 0.20% on the balance over $500 million. Further information regarding investment advisory fees is described in Part 2A of the firm's Form ADV. Actual fees paid by accounts in the Composite may differ from the current fee schedule.
8. Effective July 1, 2023, the firm transitioned from using actual account fees in the calculation of net performance returns to applying the highest fee for the institutional strategy as outlined in Part 2A of the firm's Form ADV. The net performance track record was revised back to Composite inception.
9. The three-year annualized ex-post standard deviation measures the variability of the Composite (using gross returns) and the benchmark for the 36-month period ended on December 31.
10. Valuations and performance returns are computed and stated in U.S. Dollars. All returns reflect the reinvestment of income and other earnings.
11. A complete list of composite descriptions and broad distribution and limited distribution pooled funds is available upon request.
12. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.
13. Past performance is not indicative of future results.
14. This is not an offer to sell securities. That may only be accomplished by the issuance of a private offering memorandum/subscription documents.
15. This piece is provided for informational purposes only and should not be construed as a research report, a recommendation or suggestion to engage in or refrain from a particular course of action or to make or hold a particular investment or pursue a particular investment strategy, including whether or not to buy, sell or hold any of the securities mentioned, including any mutual fund managed by Brown Advisory.

DISCLOSURES

For institutional investors and professional clients only.
Past performance may not be a reliable guide to future performance and investors may not get back the amount invested. All investments involve risk.
The value of the investment and the income from it will vary. There is no guarantee that the initial investment will be returned.

The views expressed are those of the author and Brown Advisory as of the date referenced and are subject to change at any time based on market or other conditions. These views are not intended to be and should not be relied upon as investment advice and are not intended to be a forecast of future events or a guarantee of future results. Past performance is not a guarantee of future performance and you may not get back the amount invested. The information provided in this material is not intended to be and should not be considered to be a recommendation or suggestion to engage in or refrain from a particular course of action or to make or hold a particular investment or pursue a particular investment strategy, including whether or not to buy, sell, or hold any of the securities mentioned. It should not be assumed that investments in such securities have been or will be profitable. To the extent specific securities are mentioned, they have been selected by the author on an objective basis to illustrate views expressed in the commentary and do not represent all of the securities purchased, sold or recommended for advisory clients. The information contained herein has been prepared from sources believed reliable but is not guaranteed by us as to its timeliness or accuracy, and is not a complete summary or statement of all available data. This piece is intended solely for our clients and prospective clients, is for informational purposes only, and is not individually tailored for or directed to any particular client or prospective client.

Sustainable investment considerations are one of multiple informational inputs into the investment process, alongside data on traditional financial factors, and so are not the sole driver of decision-making. Sustainable investment analysis may not be performed for every holding in the strategy. Sustainable investment considerations that are material will vary by investment style, sector/industry, market trends and client objectives. The strategy seeks to identify companies that it believes may be desirable based on our analysis of sustainable investment related risks and opportunities, but investors may differ in their views. As a result, the strategy may invest in companies that do not reflect the beliefs and values of any particular investor. The strategy may also invest in companies that would otherwise be excluded from other funds that focus on sustainable investment risks. Security selection will be impacted by the combined focus on sustainable investment research assessments and fundamental research assessments including the return forecasts. The strategy incorporates data from third parties in its research process but does not make investment decisions based on third-party data alone.

Brown Advisory Institutional claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Brown Advisory Institutional has been independently verified for the periods from January 1, 1993 through December 31, 2024. The Verification reports are available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

1. *For the purpose of complying with the GIPS standards, the firm is defined as Brown Advisory Institutional, the Institutional and Balanced Institutional asset management divisions of Brown Advisory. As of July 1, 2016, the firm was redefined to exclude the Brown Advisory Private Client division, due to an evolution of the three distinct business lines.
2. The Large-Cap Sustainable Value Composite (the Composite) includes all discretionary portfolios invested in the Large-Cap Sustainable Value strategy. The Large-Cap Sustainable Value strategy aims to invest in the equity securities of high-quality large-sized companies that have attractive and durable free cash flow yields, favorable capital structures, strong capital discipline, and which are listed or traded on the U.S. markets and exchanges. The minimum market value required for Composite inclusion is $1.5 million.
3. Sustainable investment considerations are one of multiple informational inputs into the investment process, alongside data on traditional financial factors, and so are not the sole driver of decision-making. Sustainable investment analysis may not be performed for every holding in the strategy. Sustainable investment considerations that are material will vary by investment style, sector/industry, market trends and client objectives. The Large-Cap Sustainable Value Strategy (“Strategy”) seeks to identify companies that it believes may be desirable based on our analysis of sustainable investment related risks and opportunities, but investors may differ in their views. As a result, the Strategy may invest in companies that do not reflect the beliefs and values of any particular investor. The Strategy may also invest in companies that would otherwise be excluded from other strategies that focus on sustainable investment risks. Security selection will be impacted by the combined focus on sustainable investment research assessments and fundamental research assessments including the return forecasts. The Strategy incorporates data from third parties in its research process but does not make investment decisions based on third-party data alone.
4. The Composite creation date is November 30, 2022. The Composite inception date is October 1, 2022.
5. The benchmark is the Russell 1000® Value Index. The Russell 1000® Value Index measures the performance of the large-cap value segment of the U.S. equity universe. It includes those Russell 1000 companies with lower price-to-book ratios and lower expected and historical growth rates. The Russell 1000® Value Index is constructed to provide a comprehensive and unbiased barometer for the large-cap value segment. The Index is completely reconstituted annually to ensure new and growing equities are included and that the represented companies continue to reflect value characteristics. The Russell 1000® Value Index and Russell® are trademarks/service marks of the London Stock Exchange Group companies. An investor cannot invest directly into an index. Benchmark returns are not covered by the report of the independent verifiers.
6. Composite dispersion is an equal-weighted standard deviation of portfolio gross returns calculated for the accounts in the Composite for the entire calendar year period. The composite dispersion is not applicable (N/A) for periods where there were five or fewer accounts in the Composite for the entire period.
7. Gross-of-fees performance returns are presented before management fees but after all trading commissions, and gross of foreign withholding taxes (if applicable). Net-of-fees performance returns are calculated by adjusting the gross-of-fees performance return by the highest fee for the institutional strategy as outlined in Part 2A of the firm’s Form ADV, applied on a monthly basis. Certain accounts in the Composite may pay asset-based custody fees that include commissions. For these accounts, gross returns are also net of custody fees. Other expenses can reduce returns to investors. The standard management fee schedule is as follows: 0.60% on the first $25 million; 0.50% on the next $25 million; and 0.40% on the next $50 million. Further information regarding investment advisory fees is described in Part 2A of the firm’s Form ADV. Actual fees paid by accounts in the Composite may differ from the current fee schedule.
8. Effective July 1, 2023, the firm transitioned from using actual account fees in the calculation of net performance returns to applying the highest fee for the institutional strategy as outlined in Part 2A of the firm’s Form ADV. The net performance track record was revised back to Composite inception.
9. The three-year annualized ex-post standard deviation measures the variability of the Composite (using gross returns) and the benchmark for the 36-month period ended on December 31. The 3 year annualized standard deviation is not presented as of December 31, 2022, December 31, 2023 and December 31, 2024 because 36 month returns for the Composite were not available (N/A).
10. Valuations and performance returns are computed and stated in U.S. Dollars. All returns reflect the reinvestment of income and other earnings.
11. A complete list of composite descriptions and broad distribution and limited distribution pooled funds is available upon request.
12. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.
13. Past performance is not indicative of future results.
14. This is not an offer to sell securities. That may only be accomplished by the issuance of a private offering memorandum/subscription documents.
15. This piece is provided for informational purposes only and should not be construed as a research report, a recommendation or suggestion to engage in or refrain from a particular course of action or to make or hold a particular investment or pursue a particular investment strategy, including whether or not to buy, sell or hold any of the securities mentioned, including any mutual fund managed by Brown Advisory.

DISCLOSURES

For institutional investors and professional clients only.
Past performance may not be a reliable guide to future performance and investors may not get back the amount invested. All investments involve risk.
The value of the investment and the income from it will vary. There is no guarantee that the initial investment will be returned.

Duration is a time measure of a bond's interest-rate sensitivity, based on the weighted average of the time periods over which a bond's cash flows accrue to the bondholder.

FactSet® is a registered trademark of FactSet® Research Systems, Inc.

The Sterling Overnight Interbank Average rate (SOFR) is the overnight interest rate for US dollar-denominated loans and derivatives. SOFR measures the cost to a bank of borrowing cash overnight, and so represents the amount of interest that a bank will have to repay to the lender the following day.

The Sterling Overnight Interbank Average rate (SONIA) is the effective overnight interest rate paid by banks for unsecured transactions in British sterling. It is the overnight funding charge for trades that occur in off-market hours and represents the amount of overnight business in the marketplace.

Bloomberg Global Aggregate Index measure of global investment grade debt from twenty-eight local currency markets. Duration is a time measure of a bond's interest-rate sensitivity, based on the weighted average of the time periods over which a bond's cash flows accrue to the bondholder.

5y5y Interest Rate Swaps is the market expectation of the average level of inflation over 5 years, 5 years from now.

Alpha is a measure of performance on a risk-adjusted basis. Alpha takes the volatility (price risk) of a portfolio and compares its risk-adjusted performance to a benchmark index.

Beta primarily used in the capital asset pricing model (CAPM), is a measure of the volatility–or systematic risk–of a security or portfolio compared to the market as a whole.

Duration is a time measure of a bond's interest-rate sensitivity, based on the weighted average of the time periods over which a bond's cash flows accrue to the bondholder.

Reference to **income inequality** is according to the Gini index which measures the extent to which the distribution of income or consumption among individuals or households within an economy deviates from a perfectly equal distribution. A Gini index of 0 represents perfect equality, while an index of 100 implies perfect inequality.

Volatility is the degree of variation of a trading price series over time, usually measured by the standard deviation of returns.

Brown Advisory Institutional claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Brown Advisory Institutional has been independently verified for the periods from January 1, 1993 through December 31, 2024. The Verification reports are available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

1. *For the purpose of complying with the GIPS standards, the firm is defined as Brown Advisory Institutional, the Institutional and Balanced Institutional asset management divisions of Brown Advisory. As of July 1, 2016, the firm was redefined to exclude the Brown Advisory Private Client division, due to an evolution of the three distinct business lines.
2. The Global Sustainable Total Return Bond (GBP) Composite (the Composite) includes all discretionary portfolios invested in the Global Sustainable Total Return Bond (GBP) strategy. The objective of the Global Sustainable Total Return Bond (GBP) strategy is to target a positive total return (comprising current income and capital gains) above the Bank of England's SONIA Compounded Index over a full economic cycle, by investing in a broad range of global fixed-income securities and associated FDIs and currencies.
3. Sustainable investment considerations are one of multiple informational inputs into the investment process, alongside data on traditional financial factors, and so are not the sole driver of decision-making. Sustainable investment analysis may not be performed for every holding in the strategy. Sustainable investment considerations that are material will vary by investment style, sector/industry, market trends and client objectives. The Global Sustainable Total Return Bond Strategy ("Strategy") seeks to identify issuers that it believes may be desirable based on our analysis of sustainable investment related risks and opportunities, but investors may differ in their views. As a result, the Strategy may invest in issuers that do not reflect the beliefs and values of any particular investor. The Strategy may also invest in issuers that would otherwise be excluded from other strategies that focus on sustainable investment risks. Security selection will be impacted by the combined focus on sustainable investment research assessments and fundamental research assessments including the return forecasts. The Strategy incorporates data from third parties in its research process but does not make investment decisions based on third-party data alone.
4. The Composite creation date is February 28, 2022. The Composite inception date is February 1, 2022.
5. The Composite benchmarks are the Bank of England's SONIA Compounded Index and the Bloomberg Global Aggregate 1-10 Year Total Return Index (GBP Hedged). The Bank of England's SONIA Compounded Index is a measure of the rate at which interest is paid on sterling short-term wholesale funds in circumstances where credit, liquidity and other risks are minimal. SONIA is measured as the trimmed mean of interest rates paid on eligible sterling denominated deposit transactions. The Bloomberg Global Aggregate 1-10 Year Total Return Index (GBP Hedged) represents a close estimation of the performance that can be achieved by hedging the currency exposure of its parent index, the Bloomberg Global Aggregate Index, to GBP and limiting to bonds with maturities between 1 and 10 years. The Index is 100% hedged to the GBP by selling the forwards of all the currencies in the parent index at the one-month Forward rate. The parent index is composed of government, government-related and corporate bonds, as well as asset-backed, mortgage-backed and commercial mortgage-backed securities from both developed and emerging markets issuers. SONIA and/or SONIA Compounded Index data licensed under the Open Government License v3.0 and copyright the Governor and Company of the Bank of England. The trade marks "Bank of England" and "SONIA" are registered trade marks of the Bank of England. "Bloomberg®" and Bloomberg Global Aggregate Bond Index are service marks of Bloomberg Finance L.P. and its affiliates including Bloomberg Index Services Limited ("BISL"), the administrator of the index (collectively, "Bloomberg") and have been licensed for use for certain purposes by Brown Advisory. Bloomberg is not affiliated with Brown Advisory, and Bloomberg does not approve, endorse, review, or recommend the Global Sustainable Total Return Bond strategy. Bloomberg does not guarantee the timeliness, accurateness, or completeness of any data or information relating to the Global Sustainable Total Return Bond (GBP) Composite. An investor cannot invest directly into an index. Benchmark returns are not covered by the report of the independent verifiers.
6. Composite dispersion is an equal-weighted standard deviation of portfolio gross returns calculated for the accounts in the Composite for the entire calendar year period. The composite dispersion is not applicable (N/A) for periods where there were five or fewer accounts in the Composite for the entire period.
7. Gross-of-fees performance returns are presented before management fees but after all trading commissions, and gross of foreign withholding taxes (if applicable). Net-of-fees performance returns are calculated by adjusting the gross-of-fees performance return by the highest fee for the institutional strategy as outlined in Part 2A of the firm's Form ADV, applied on a monthly basis. Other expenses can reduce returns to investors. The standard management fee schedule is as follows, converted to GBP at the prevailing exchange rate: 0.50% on the first $50 million; 0.30% on the next $50 million; 0.25% on the next $50 million; and 0.20% on the balance over $150 million, with a minimum account market value of $100 million. Further information regarding investment advisory fees is described in Part II A of the firm's Form ADV. Actual fees paid by accounts in the Composite may differ from the current fee schedule.
8. Effective July 1, 2023, the firm transitioned from using actual account fees in the calculation of net performance returns to applying the highest fee for the institutional strategy as outlined in Part 2A of the firm's Form ADV. The net performance track record was revised back to Composite inception.
9. The three-year annualized ex-post standard deviation measures the variability of the Composite (using gross returns) and the benchmark for the 36-month period ended on December 31. The 3-year annualized standard deviation is not presented as of December 31, 2022, December 31, 2023, and December 31, 2024, because 36 month returns for the Composite were not available (N/A).
10. The use of derivatives is integral to the investment process of the strategy. The strategy may use, for investment or hedging purposes, exchange traded and OTC derivatives, including futures and options, forward foreign currency contracts, FX futures and FX spots and OTC swaps, and credit default swaps on indices, the underlying reference assets for which will be bonds in which the fund may invest directly, and interest rates and currencies.
11. The strategy may employ leverage, but it is not integral to the investment process. The strategy may borrow up to 10% of its Net Asset Value on a temporary basis. It is not intended to borrow for leverage purposes. The strategy may also be leveraged through the use of derivatives, and under normal circumstances is not expected to exceed 500% of its Net Asset Value.
12. Valuations and performance returns are computed and stated in British Pounds. All returns reflect the reinvestment of income and other earnings.
13. A complete list of composite descriptions and broad distribution and limited distribution pooled funds is available upon request.
14. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.
15. Past performance is not indicative of future results.
16. This is not an offer to sell securities. That may only be accomplished by the issuance of a private offering memorandum/subscription documents.
17. This piece is provided for informational purposes only and should not be construed as a research report, a recommendation or suggestion to engage in or refrain from a particular course of action or to make or hold a particular investment or pursue a particular investment strategy, including whether or not to buy, sell or hold any of the securities mentioned, including any mutual fund managed by Brown Advisory.

**Return is for period April 1, 2022 through December 31, 2022.

Brown Advisory Institutional claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Brown Advisory Institutional has been independently verified for the periods from January 1, 1993 through December 31, 2024. The Verification reports are available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

1. *For the purpose of complying with the GIPS standards, the firm is defined as Brown Advisory Institutional, the Institutional and Balanced Institutional asset management divisions of Brown Advisory. As of July 1, 2016, the firm was redefined to exclude the Brown Advisory Private Client division, due to an evolution of the three distinct business lines.
2. The Global Sustainable Total Return Bond (USD) Composite (the Composite) includes all discretionary portfolios invested in the Global Sustainable Total Return Bond (USD) strategy. The objective of the Global Sustainable Total Return Bond (USD) strategy is to target a positive total return (comprising current income and capital gains) above the Federal Reserve Bank of New York Secured Overnight Financing Rate (SOFR) Index over a full economic cycle, by investing in a broad range of global fixed- income securities and associated FDIs and currencies..
3. Sustainable investment considerations are one of multiple informational inputs into the investment process, alongside data on traditional financial factors, and so are not the sole driver of decision-making. Sustainable investment analysis may not be performed for every holding in the strategy. Sustainable investment considerations that are material will vary by investment style, sector/industry, market trends and client objectives. The Global Sustainable Total Return Bond Strategy ("Strategy") seeks to identify issuers that it believes may be desirable based on our analysis of sustainable investment related risks and opportunities, but investors may differ in their views. As a result, the Strategy may invest in issuers that do not reflect the beliefs and values of any particular investor. The Strategy may also invest in issuers that would otherwise be excluded from other strategies that focus on sustainable investment risks. Security selection will be impacted by the combined focus on sustainable investment research assessments and fundamental research assessments including the return forecasts. The Strategy incorporates data from third parties in its research process but does not make investment decisions based on third-party data alone.
4. The Composite creation date is May 31, 2022. The Composite inception date is April 1, 2022.
5. The Composite benchmarks are the Federal Reserve Bank of New York Secured Overnight Financing Rate (SOFR) Index and the Bloomberg Global Aggregate 1-10 Year Total Return Index (USD Hedged). The Federal Reserve Bank of New York Secured Overnight Financing Rate (SOFR) Index measures the cumulative impact of compounding the SOFR on a unit of investment over time, with the initial value set to 1.00000000 on April 2, 2018, the first value date of the SOFR. The SOFR is a broad measure of the cost of borrowing cash overnight collateralized by Treasury securities. The Bloomberg Global Aggregate 1-10 Year Total Return Index (USD Hedged) represents a close estimation of the performance that can be achieved by hedging the currency exposure of its parent index, the Bloomberg Global Aggregate Index, to USD and limiting to bonds with maturities between 1 and 10 years. The Index is 100% hedged to the USD by selling the forwards of all the currencies in the parent index at the one-month Forward rate. The parent index is composed of government, government-related and corporate bonds, as well as asset-backed, mortgage-backed and commercial mortgage-backed securities from both developed and emerging markets issuers. The SOFR Index is subject to the Terms of Use posted at newyorkfed.org. The New York Fed is not responsible for publication of the SOFR Index by Brown Advisory Institutional, does not sanction or endorse any particular republication, and has no liability for your use. "Bloomberg®" and Bloomberg Global Aggregate Bond Index are service marks of Bloomberg Finance L.P. and its affiliates including Bloomberg Index Services Limited ("BISL"), the administrator of the index (collectively, "Bloomberg") and have been licensed for use for certain purposes by Brown Advisory. Bloomberg is not affiliated with Brown Advisory, and Bloomberg does not approve, endorse, review, or recommend the Global Sustainable Total Return Bond strategy. Bloomberg does not guarantee the timeliness, accurateness, or completeness of any data or information relating to the Global Sustainable Total Return Bond (USD) Composite. An investor cannot invest directly into an index. Benchmark returns are not covered by the report of the independent verifiers.
6. Composite dispersion is an equal-weighted standard deviation of portfolio gross returns calculated for the accounts in the Composite for the entire calendar year period. The composite dispersion is not applicable (N/A) for periods where there were five or fewer accounts in the Composite for the entire period.
7. Gross-of-fees performance returns are presented before management fees but after all trading commissions, and gross of foreign withholding taxes (if applicable). Net-of-fees performance returns are calculated by adjusting the gross-of-fees performance return by the highest fee for the institutional strategy as outlined in Part 2A of the firm's Form ADV, applied on a monthly basis. The standard management fee schedule is as follows: 0.50% on the first $50 million; 0.30% on the next $50 million; 0.25% on the next $50 million; and 0.20% on the balance over $150 million. Further information regarding investment advisory fees is described in Part 2A of the firm's Form ADV. Actual fees paid by accounts in the Composite may differ from the current fee schedule.
8. Effective July 1, 2023, the firm transitioned from using actual account fees in the calculation of net performance returns to applying the highest fee for the institutional strategy as outlined in Part 2A of the firm's Form ADV. The net performance track record was revised back to Composite inception.
9. The three-year annualized ex-post standard deviation measures the variability of the Composite (using gross returns) and the benchmark for the 36-month period ended on December 31. The 3 year annualized standard deviation is not presented as of December 31, 2022, December 31, 2023, and December 31, 2024, because 36 month returns for the Composite were not available (N/A).
10. The use of derivatives is integral to the investment process of the strategy. The strategy may use, for investment or hedging purposes, exchange traded and OTC derivatives, including futures and options, forward foreign currency contracts, FX futures and FX spots and OTC swaps, and credit default swaps on indices, the underlying reference assets for which will be bonds in which the fund may invest directly, and interest rates and currencies.
11. The strategy may employ leverage, but it is not integral to the investment process. The strategy may borrow up to 10% of its Net Asset Value on a temporary basis. It is not intended to borrow for leverage purposes. The strategy may also be leveraged through the use of derivatives, and under normal circumstances is not expected to exceed 500% of its Net Asset Value.
12. Valuations and performance returns are computed and stated in US Dollars. All returns reflect the reinvestment of income and other earnings.
13. A complete list of composite descriptions and broad distribution and limited distribution pooled funds is available upon request.
14. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.
15. Past performance is not indicative of future results.
16. This is not an offer to sell securities. That may only be accomplished by the issuance of a private offering memorandum/subscription documents.
17. This piece is provided for informational purposes only and should not be construed as a research report, a recommendation or suggestion to engage in or refrain from a particular course of action or to make or hold a particular investment or pursue a particular investment strategy, including whether or not to buy, sell or hold any of the securities mentioned, including any mutual fund managed by Brown Advisory.

DISCLOSURES

For institutional investors and professional clients only.
Past performance may not be a reliable guide to future performance and investors may not get back the amount invested. All investments involve risk.
The value of the investment and the income from it will vary. There is no guarantee that the initial investment will be returned.

Past performance may not be a reliable guide to future performance and investors may not get back the amount invested. All investments involve risk. The value of the investment and the income from it will vary. There is no guarantee that the initial investment will be returned.

Brown Advisory Institutional claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Brown Advisory Institutional has been independently verified for the periods from January 1, 1993 through December 31, 2024. The Verification reports are available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

1. *For the purpose of complying with the GIPS standards, the firm is defined as Brown Advisory Institutional, the Institutional and Balanced Institutional asset management divisions of Brown Advisory. As of July 1, 2016, the firm was redefined to exclude the Brown Advisory Private Client division, due to an evolution of the three distinct business lines.
2. The Sustainable International Leaders Composite (the Composite) includes all discretionary portfolios invested in the Sustainable International Leaders strategy. The Sustainable International Leaders strategy aims to achieve capital appreciation by investing primarily in international equities. The strategy intends to invest in equity securities of companies that the portfolio manager believes are leaders within their industry or country, as demonstrated by an ability to deliver high relative return on invested capital over time.
3. Sustainable investment considerations are one of multiple informational inputs into the investment process, alongside data on traditional financial factors, and so are not the sole driver of decision-making. Sustainable investment analysis may not be performed for every holding in the strategy. Sustainable investment considerations that are material will vary by investment style, sector/industry, market trends and client objectives. The Sustainable International Leaders Strategy (“Strategy”) seeks to identify companies that it believes may be desirable based on our analysis of sustainable investment related risks and opportunities, but investors may differ in their views. As a result, the Strategy may invest in companies that do not reflect the beliefs and values of any particular investor. The Strategy may also invest in companies that would otherwise be excluded from other strategies that focus on sustainable investment risks. Security selection will be impacted by the combined focus on sustainable investment research assessments and fundamental research assessments including the return forecasts. The Strategy incorporates data from third parties in its research process but does not make investment decisions based on third-party data alone.
4. The Composite creation date is October 6, 2021. The Composite inception date is September 1, 2021.
5. The benchmark is the MSCI ACWI ex U.S. Net Index rebalanced quarterly. The MSCI ACWI ex U.S. Net Index captures large and mid cap representation across Developed Markets (DM) countries (excluding the U.S.) and Emerging Markets (EM) countries. The Index covers approximately 85% of the global equity opportunity set outside the U.S. All MSCI indexes and products are trademarks and service marks of MSCI or its subsidiaries. An investor cannot invest directly into an index. Benchmark returns are not covered by the report of the independent verifiers.
6. As of September 1, 2022, the Composite benchmark was changed from the FTSE All-World ex-U.S. Net Index to the MSCI ACWI ex U.S. Net Index. The change was applied retroactively from the Composite inception date. The Advisor determined that MSCI indices are more widely used for global products, and thereby provide more relevant data to shareholders and prospects as well as comparisons to competitors.
7. Composite dispersion is an equal-weighted standard deviation of portfolio gross returns calculated for the accounts in the Composite for the entire calendar year period. The composite dispersion is not applicable (N/A) for periods where there were five or fewer accounts in the Composite for the entire period.
8. Gross-of-fees performance returns are presented before management fees but after all trading commissions, and gross of foreign withholding taxes (if applicable). Net-of-fees performance returns are calculated by adjusting the gross-of-fees performance return by the highest fee for the institutional strategy as outlined in Part 2A of the firm’s Form ADV, applied on a monthly basis. Certain accounts in the Composite may pay asset-based custody fees that include commissions. For these accounts, gross returns are also net of custody fees. Other expenses can reduce returns to investors. The standard management fee schedule is as follows: 0.80% on the first $50 million; 0.55% on the next $50 million; 0.45% on the next $50 million; and 0.40% on the balance over $150 million. Further information regarding investment advisory fees is described in Part 2A of the firm’s Form ADV. Actual fees paid by accounts in the Composite may differ from the current fee schedule.
9. Effective July 1, 2023, the firm transitioned from using actual account fees in the calculation of net performance returns to applying the highest fee for the institutional strategy as outlined in Part 2A of the firm’s Form ADV. The net performance track record was revised back to Composite inception.
10. The three-year annualized ex-post standard deviation measures the variability of the Composite (using gross returns) and the benchmark for the 36-month period ended on December 31. The 3 year annualized standard deviation is not presented as of December 31, 2021, December 31, 2022, and December 31, 2023 because 36 month returns for the Composite were not available (N/A).
11. Valuations and performance returns are computed and stated in U.S. Dollars. All returns reflect the reinvestment of income and other earnings.
12. A complete list of composite descriptions and broad distribution and limited distribution pooled funds is available upon request.
13. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.
14. Past performance is not indicative of future results.
15. This is not an offer to sell securities. That may only be accomplished by the issuance of a private offering memorandum/subscription documents.
16. This piece is provided for informational purposes only and should not be construed as a research report, a recommendation or suggestion to engage in or refrain from a particular course of action or to make or hold a particular investment or pursue a particular investment strategy, including whether or not to buy, sell or hold any of the securities mentioned, including any mutual fund managed by Brown Advisory.

DISCLOSURES

For institutional investors and professional clients only.

Past performance may not be a reliable guide to future performance and investors may not get back the amount invested. All investments involve risk. The value of the investment and the income from it will vary. There is no guarantee that the initial investment will be returned.

The MSCI ACWI® Index captures large and mid-cap representation across 23 Developed Markets (DM) and 24 Emerging Markets (EM) countries. As of May 2022, it covers more than 2,933 constituents across 11 sectors and approximately 85% of the global investable equity opportunity set. All MSCI indexes and products are trademarks and service marks of MSCI or its subsidiaries.

An investor cannot invest directly into an index.

We consistently apply the same DCF (discounted cash flow) framework across all potential investments in the research pipeline. Across this framework, we apply a minimum 10% WACC (Weighted Average Cost of Capital) assumption (higher for emerging markets), 10-year cash flow projection and a 3% nominal terminal cash flow growth rate. Within this analysis we look at bull, bear and base case scenarios to create a picture of the potential value generation. From our internal free-cash-flow estimates we generate a 5-year internal rate of return (IRR) using an exit multiple which is triangulated with an implied fair value yield from the DCF to apply consistency across the DCF, and FCF based IRR. For this calculation we assume that the current multiple (or yield) remains constant for 5 years. The market definition for this is a "A constant multiple IRR". The IRR is calculated using the IRR function in Excel. The IRR is then used to back out the ready-to-buy price at which we would see annualized double-digit returns

Terms and Definitions:

Alpha is a measure of performance on a risk-adjusted basis. Alpha takes the volatility (price risk) of a portfolio and compares its risk-adjusted performance to a benchmark index.

Return on Equity (ROE) is equal to a company's net income for a full fiscal year, divided by total shareholder equity. All of the above ratios for a portfolio are expressed as a weighted average of the relevant ratios of each portfolio holdings, EXCEPT for P/E ratios, which are expressed as a weighted harmonic average.

The return on assets (ROA) ratio shows how efficiently a company uses its assets to generate profits. It reveals what earnings are generated from invested capital.

The internal rate of return (IRR) is a measure of an investment's rate of return. The internal rate of return is a discount rate that makes the net present value (NPV) of all cash flows from a particular project equal to zero. It is also called the discounted cash flow rate of return. We underwrite investments at a minimum double-digit five-year base case IRR at initiation and focus on tight probabilities around these IRRs.

Downside Protection is a strategy designed to mitigate or prevent a decrease in the value of an investment. This can be achieved through various methods such as options contracts, stop-loss orders, or diversification, which help limit potential losses in adverse market conditions.

Brown Advisory Institutional claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Brown Advisory Institutional has been independently verified for the periods from January 1, 1993 through December 31, 2024. The Verification reports are available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

1. *For the purpose of complying with the GIPS standards, the firm is defined as Brown Advisory Institutional, the Institutional and Balanced Institutional asset management divisions of Brown Advisory. As of July 1, 2016, the firm was redefined to exclude the Brown Advisory Private Client division, due to an evolution of the three distinct business lines.
2. The Global Leaders Composite (the Composite) aims to achieve capital appreciation by investing primarily in global equities. The strategy will invest in equity securities of companies that the portfolio manager believes are leaders within their industry or country, as demonstrated by an ability to deliver high relative return on invested capital over time. The minimum account market value required for Composite inclusion is $1.5 million.
3. Sustainable investment considerations are one of multiple informational inputs into the investment process, alongside data on traditional financial factors, and so are not the sole driver of decision-making. Sustainable investment analysis may not be performed for every holding in the strategy. Sustainable investment considerations that are material will vary by investment style, sector/industry, market trends and client objectives. The Global Leaders Strategy ("Strategy") seeks to identify companies that it believes may be desirable based on our analysis of sustainable investment related risks and opportunities, but investors may differ in their views. As a result, the Strategy may invest in companies that do not reflect the beliefs and values of any particular investor. The Strategy may also invest in companies that would otherwise be excluded from other strategies that focus on sustainable investment risks. Security selection will be impacted by the combined focus on sustainable investment research assessments and fundamental research assessments including the return forecasts. The Strategy incorporates data from third parties in its research process but does not make investment decisions based on third-party data alone.
4. The Composite creation date is August 26, 2015. The Composite inception date is May 1, 2015.
5. The benchmark is the MSCI ACWI Net Index. The MSCI ACWI Net Index captures large and mid cap representation across Developed Markets (DM) and Emerging Markets (EM) countries. The Index covers approximately 85% of the global investable equity opportunity set. All MSCI indexes and products are trademarks and service marks of MSCI or its subsidiaries. An investor cannot invest directly into an index. Benchmark returns are not covered by the report of the independent verifiers.
6. Composite dispersion is an equal-weighted standard deviation of portfolio gross returns calculated for the accounts in the Composite for the entire calendar year period. The composite dispersion is not applicable (N/A) for periods where there were five or fewer accounts in the Composite for the entire period.
7. Gross-of-fees performance returns are presented before management fees but after all trading commissions, and gross of foreign withholding taxes (if applicable). Net-of-fees performance returns are calculated by adjusting the gross-of-fees performance return by the highest fee for the institutional strategy as outlined in Part 2A of the firm's Form ADV, applied on a monthly basis. Certain accounts in the Composite may pay asset-based custody fees that include commissions. For these accounts, gross returns are also net of custody fees. Other expenses can reduce returns to investors. The standard management fee schedule is as follows: 0.80% on the first $50 million; 0.55% on the next $50 million; 0.45% on the next $50 million; and 0.40% on the balance over $150 million. Further information regarding investment advisory fees is described in Part 2A of the firm's Form ADV. Actual fees paid by accounts in the Composite may differ from the current fee schedule.
8. Effective July 1, 2023, the firm transitioned from using actual account fees in the calculation of net performance returns to applying the highest fee for the institutional strategy as outlined in Part 2A of the firm's Form ADV. The net performance track record was revised back to Composite inception.
9. The three-year annualized ex-post standard deviation measures the variability of the Composite (using gross returns) and the benchmark for the 36-month period ended on December 31. The 3 year annualized standard deviation is not presented as of December 31, 2015, December 31, 2016 and December 31, 2017 because the 36 month returns were not available for the Composite (N/A).
10. Valuations and performance returns are computed and stated in U.S. Dollars. All returns reflect the reinvestment of income and other earnings.
11. A complete list of composite descriptions and broad distribution and limited distribution pooled funds is available upon request.
12. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.
13. Past performance is not indicative of future results.
14. This is not an offer to sell securities. That may only be accomplished by the issuance of a private offering memorandum/subscription documents.
